Do You Hear Well?

The Stolz Electrophone—A New, Scientific and Practical Invention for Those Who Are Deaf or Partially Deaf—May Now Be Tested in Your Own Home

Deaf or partially deaf people may now make a month's trial of the Stolz Electrophone at home.

This is unusually important news for the deaf, for in this plan the deaf selection of the one completely satisfactory hearing aid is made easy and inexpensive for everyone.

The Stolz Electrophone (U. S. Patent No. 76,375) renders unnecessary such unsatisfactory, clumsy and frequently harmful devices as trumpets, horns, tubes, ear drums, face, etc. It is a tiny electric telephone that fits on the instant it is applied, transmits the sound waves in such manner as to cause an astonishing increase in the clearness of all sounds. It overcomes the buzzing and electrically neutralizes the vital parts of the ear, thereby, the natural, unaided hearing itself is gradually restored.

Prominent Business Man's Opinion

STOZ ELECTROPHONE CO., Chicago—An inventor. He says the Electrophone is very satisfactory. Being small in size and great in power, it is the best thing I have ever used. I have tried all of them. I can recommend it to all persons who have defective hearing.—M. W. HOYT, Wholesale Grocer, Michigan Ave. and River St., Chicago.

A bill has been prepared by Charles Francis Adams and introduced in the Massachusetts Legislature to provide that there shall be no alteration or change in the name of any public way, street, place or square, or of any public park, where the name altered or changed has been in use for twenty-five years, without the consent of the Highway Commission of the State. At a hearing on the measure representatives of many patriotic societies favored it.

The women of Paris have discovered a new method of stimulation in the tea cigarette. To make one about as much tea is required as would make two strong cups of tea. As many Paris women are reported to be smoking on an average ten a day, it is easy to see why the doctors should be taking measures to nip the fashion in the bud. They describe it as a horribly easy method of stimulation and sure to undermine the strongest constitution in a few months.

Canton, China, at present is full of robbers. It is said that in some parts the people are really afraid to go to rest at night, inasmuch as it is certain that thieves will enter and rob the place. Accordingly some one sits up, while others sleep. The following is a queer criticism of China's policy by a correspondent: "We have a police force, whose work consists mostly in sleeping at post or helping the nearby shopkeeper to chop wood or a neighboring blacksmith to blow his fire."

Mrs. George F. Lowell received more applause than any of the other speakers at the recent meeting of the Massachusetts Press Association. Her address was on woman suffrage, and in reply to a statement made by a speaker preceding her that the women of America could get the ballot or anything else they wanted, Mrs. Lowell said they could, provided they waited long enough. She reminded them that it took Massachusetts women fifty-five years to obtain the equal guardianship of children, and almost as long to get that of equal inheritance between husband and wife.

The legal adage de minimis non curat lex was apparently reversed in the Glamorgan County Court, held at Cardiff, Wales, recently, when a workman seriously sued his employers for compensation for injuries sustained while putting in a shop front, the injuries being the result of a flea bite.

The claimant's solicitor asked for an adjournment, as he said his client was ill. The judge granted the adjournment, but was informed immediately that the claimant had been seen in the neighborhood of the court. Thereupon the judge called the case again and gave judgment for the defendants on the ground that the man might have been carrying the flea for half an hour before he went to work.

PRESIDENT TAFT'S WHITE STEAMER

President Taft and His Family in Their White Steamer

When the announcement was made several months ago that Mr. Taft would use an automobile during his term as president, much rivalry developed among the leading manufacturers for the honor of selling him a car and the public watched with interest to see what Mr. Taft's choice would be. The knowing ones predicted that the White Steamer would be selected and they pointed out that President Roosevelt had used White Steamers for two years at his summer home at Oyster Bay and had recommended this make to Mr. Taft as the most desirable.

This prediction proved correct, although Mr. Taft did not rely solely on Mr. Roosevelt's recommendation but, with his usual thoroughness, determined to have an investigation made of all the principal makes. Accordingly, he asked several officers of the War Department to look into the matter for him and they tested many makes of cars, visited a number of factories so that they might see what materials were used and, finally, they investigated the records of the different types of cars in public contests and in private services.

When their labors were completed, the officials reported unanimously to Mr. Taft in favor of the White, and, accordingly, a car of this make was immediately ordered from the manufacturers, The White Company of Cleveland.

The new car was delivered to Mr. Taft in Washington a few days before his inauguration and since that time it has been in almost constant use. There has not been a day when the president or some members of his family have not been seen riding around the national capital in the new car. It is hinted that Mr. Taft likes fast traveling and that when he rides out into the open country, he does not always insist that the speed of the car be kept within the legal limits.

C. A. Hawkins, manager of the Pacific coast branch of The White Company, 1470 Market street, San Francisco, said recently to a correspondent of this paper: "We are receiving many inquiries each day asking for full details regarding the construction of Mr. Taft's car and in reply we are sending copies of our catalog. Mr. Taft's car is exactly like any other Model 'M' 40 horsepower White Steam-

er except that his car has the United States coat of arms painted on either door. In other words, when we make a car for the president of the United States there is no way in which we can make it any better than the car which you, or anybody else, can purchase from us.

"Some of those writing to me about Mr. Taft's car say that although they are very desirous of having a car like Mr. Taft's, they are afraid that such a car is somewhat larger and more expensive than they desire. In reply to these letters I point out that our Model 'O' 20 horsepower car is exactly like our 40 horsepower model, except as regards the size of the different parts. The principle of construction is exactly the same and the smaller car possesses all the desirable qualities of our larger model. In other words, I point out that they can secure an exact duplicate of Mr. Taft's car for \$4,000, or a car of the same quality but of smaller dimensions for only \$2,000. Judging by the demand for White cars, a good proportion of those desiring to purchase automobiles are quite content to trust President Taft's judgment as to the best and most desirable make."
