Inland Empire's Banner County

Wallowa county, Oregon, is situated in the N. E. corner of the state, and is a most inviting field for the homeseeker. It is about 100 miles square and has a population of 10,000. It is new, prosperous and ever growing; is settled mostly by eastern people who, having grown tired of cyclones, blizzards, malaria, high rents and other disadvantages of the over crowded East, have been attracted to the free homesteads, rich soil and healthy climate of Wallowa county, as a most desirable place to live forever. In appearance Wallowa county is rough and uneven and is divided by nature into mountains, hills and valleys. The mountains are imposing in their wealth of scenic beauty and are valuable as a summer range for stock and their mines of precious metals. The hills are level and undulating and produce abundant crops of wheat, oats, rye and barley, and the famous bunch grass, on which vast herds of stock thrive and grow fat, making easy fortunes for their owners.

The valleys are well irrigated, rich and productive, and in addition to the crops raised in "the hills" produce immense yields of clover, timothy and alfalfa. The county is particularly well adapted to fruit raising; garden truck of all kinds do exceedingly well. It is well watered by four rivers, numerous streams, and fine springs; it has the heaviest rainfall of any county in the state

east of the Cascades.

The principal river is Wallowa, a very rapid mountain stream, of crystal clearness, whose swift flowing waters afford immense water-power, and flow for forty miles through a valley as rich as the Nile, turning the wheels of machinery, irrigating vast acres of fertile land and finally emptying into the Grande Ronde. There are thousands of acres of Government lands within the borders of Wallowa valley, yet subject to homestead. This land is deep, rich and productive and each homestead usually contains living water.

The county embraces every variety of climate from snow capped mountains to its warm valleys, where apples, peaches, apricots and grapes are a never failing crop.

Its summers are warm with cool nights; its winters are moderate and equable.

The resources of the county are as diversified as its surface. In the valleys and on the Grande Ronde, Snake and Imnaha rivers fruits and vegetation of all kinds abound. In the valley hogs, grasses, and grain of all kinds make abundant yields; and the hills and mountains furnish feed for thousands of head of sheep, cattle and horses.

Wages range from \$40 per month on the farm, to \$6 per day for skilled labor. And laboring men are always in demand.
