Fashions in Earnest.

According to the rules of Boston fashion it is deemed necessary to mold one's limbs into a more shapely form than that bestowed by nature. This is done really effectively by winding strong brass wire round the ankles, the wrists, under the knees and above the elbows of children. Growth at these points is in consequence greatly hampered, with the result that the limbs come to be deformed or, according to Dyak ideas, brought into proper shape.—Exchange.
