

Which Would You Choose?

If you had your choice as a gift which would you take—the cheapest engine offered to you, or the best? So would we—and never hesitate a second. Then why not, when you pay out your good money, buy a Mogul kerosene engine?

The quality you would appreciate in a gift, you would appreciate more in a purchase. As a matter of fact, that same quality makes a Mogul the cheapest engine you can buy, from any business point of view. It burns cheap, low-grade kerosene that you can always get. No man yet knows how long the Mogul will last. With proper care it is good for many years. Figuring the cost as any cost should be figured—per year of service—you cannot buy an engine that will cost you less money. If you are going to buy an engine anywhere from 1 to 50-H.P. in size—any time—come in now and see this low cost Mogul kerosene engine.

We have a full line of gasoline and kerosene engines in stock, ready to run for you. Come in and see them. From \$35.00 up.
