From the New York Herald, Sept. 80. The Turf-The Iashion Course-The Four Mile Day-a Great Crowd, but not a Great Race.

We never remember to have seen, since the great race between Boston and Fashion, a larger assemblage of people than graced the Fashion Course yesterday. To attempt to enumerate the numbers present will be out of our power, for their name was legion. From an early hour in the morning until a short time before starting the horses the erowd was gathering fast, and by two c'clock every available spot within the enclosure was occupied. There were more ladies on the stand than were ever before seen in attendance at a race course in America-at least in the North-and notwithstanding the interest of the great event of the day was marred by an untoward accident which befel Charleston the day previous, causing his withdrawal from the race, yet their joyousness and admiration of what took place were unbounded .-Most of them never witnessed a race before, and they vowed that in future they would never miss another. They were delighted-the sterner sex disappointed. The accident to Charleston, alluded to above, was occasioned by the breaking of a stirrup in his exercise on Monday, and the injury done him was of such a character that his owner deemed it prudent to pay torfeit, and withdraw him from the race. There was much discussion among betters as to whether wagers made on the field against Nicholas were void or not, he having been the favorite against the field at one hundred to sixty previous to the uc ident. A gentleman in the judges stand attempted to elucidate the matter in a long and unintelligible rigmarole of words, which were capital Greek to everybody but himself-as every one was inquiring of his neighbor the nature of the argument, and what where the "pints." The race seemed long in coming off; although

the horses were called at the time announced, the interest having died away with the withdrawal of the Southern champion; and the betting, when done, was on Nicholas, at one hundred to twenty, and in some cases at a lower figure. The general arrangements for the comfort of visitors were the best we have seen, the refectories, the police, and everything else being conduct-

At half past two o'clock Charleston was brought before the stand with his near fore leg bandaged, so that the spectators might see that there was no humbug intended-that the injury was real, and that he was unfit to run. He is a beautiful horse, and was much admired; and it was a great pity that he could not have shown the people how fast his legs could carry him. Nicholas was ridden on this occasion by Gilpatrick, the rider of Prioress in the late Goodwood race. His nag yesterday ran much faster than the one he backed in England, and the time of that celebrated race was beaten into lint. Our space will not admit of further comment, we therefore give a brief review of the running: First Heat-Both borses got off at the tap of the drum, Engineer leading. The pace for the first mile was rather slow, the mile being ran in 2:02. The second heat was somewhat quicker-the time being 1:551. And after entering on the third mile Engineer began to show symptoms of exhaustion, although it was run in 1:56. Nicholas, who had been trailing along the previous part of the race, now made play, and going up to Engineer, passed him like a shadow. All hopes of Engineer winning the heat were now at an end, and Nicholas led in the score, a winner of the heat in 7:45.

Second Hest-The second was nearly a repetition of the first, except that the pace was somewhat quicker for the first three miles, which were run in the capital time of 5:41. There seemed to be a struggle on the part of the Engineer us to which should lead to the end of the third mile, his rider using the most strenuous efforts to force him along -without avail, however, as Nicholas went by him as they came the home stretch, and led by the stand at a rapid rate. Here Engineer seemed to relinquish the contest, and further forts on the part of his rider was fruitless, and nothing more could be done than get him home to the best advantage, Nicholas won the heat, coming home in a canter,

Arresting a Banker. Barry & M'Daniel of this city, arrested one of the proprietors of the Tazewell Free Bank, yesterday morning, and made him disgorge some seven or eight hundred dollars of his hard money, in lieu of his paper issues. They sued out an attachment, and served on him on board of the cars, where he had the assets of his Bank, going west! Look out for shavers now, who will buy up the issues of the Free Banks at heavy discounts, and those who are fools enough to submit to a shave can do so.

Since writing the above, we learn that the man who had the assers of the Bank in charge, was by the name of Skeggs, a brother to the principal owner of the Bank. Mr. McDaniel stayed all night at the same house with Skeggs-the former going to Tazewell-the latter returning with the assers, and professed ignorance of the Bank and its affairs, in every respect! When McDaniel got there the Cashier told him that the Bank was entirely out of his bands-that a gentleman had come and taken its effects to Knoxville! This induced McDaniel to hurry back, and he was in time to take out the attachment, and seize opon him with the Speriff.

THE TOBACCO CROP.-Our State exchanges begin to turnish reports in regard to the tobacco crep, which has happily, thus far, escaped the dangers of an early frost. A forthnight's continuance of the fine weather now prevailing will enable the farmers to secure a large crop, notwithstanding the adverse influence of wind, rain and vermin, The Salem Register says:

A heavy rain accompanied with violent wind and forerunners in a want of brevity. hail, visited some portions of this country, on Saturday last, the 19th, doing immense damage to the tobacco crop. The hail tell in immense counks in some instances. Capt. Jacob Miller rulates that he had the curiosity to measure one of these, and found it to measure seven inches in circumference. Some farmers lost the largest part of their tobacco

Where the hail did it but little lajary, the wind was so violent as to break and tear it to pieces. The Fredericksburg Herald says:

The cutting and housing of the tobacco crop is now employing the agricultural force of this and neighboring counties. As a general rule the crop is a good one, though we hear of occasional short crops. The season has been a good one thus far, and we hazard little in the opinion that both in quality and quantity it will exceed that of last

The Petersburg Express says : We learn from several country friends that the tobacco crops in the surrounding counties are suffering extensively from the ravages of the tobacco worm. A gentleman raising a small crop in Chesterfield on experiment, has now about two pounds and a half of sound leaves in the field. He did not tend it properly, it is true, but the fact forms a striking instance of the voracity and multiplicity of the destructive monster.

NARROW ESGAPE. - The Charlotteville (Vs.) Ad. s ocate, in referring to the risks run by persona attempting to get on the railroad cars when in mo-# tion, says:

Captain Herndon, The press teems with tributes to the gallant Virginian who commanded the Central America, and who so nobly performed his duty. The Virginia Fentiuel says: "Deep will be the regrets that will follow him to the ocean cave where he sleeps; mapy the tears with the stricken family. But if he had to fall-and all have to fall-what time more propitious to his lame? He had, through terrible days and nights, maintained his courage and composed the spirits of multitudes of men, women and children, whose sole earthly reliance be was, and who scanned his countenance to read their doom. He had saved all the women and children, 59 in number, and prepar d the men culmiy to struggle with their fate. He declared that if he should go into Convention, he would violate his oath. Entertaining these opinions, how could be accept the position of Senator, if elected by a Convention, and then take an oath to support the Constitution? He couldn't do it. No; if the sham democracy wish him to represent them in the United States Senate they must undo what they have done, and elect him by the separate action of the two

We subjoin extracts from the speech of Gov. Johnson, referred to above, as we find it in the Nashville Whig, of Nov. 19,

"He (Mr. Johnson) contended that the Legislature was composed of two distinct bodies, and inquired if it was a Legislature, in the proper sense of the term, when in convention. In this case, he said the Legislature loses its distinctive character, -the Senate was dissipated in the more numerous body. He contended that they should always be kept distinct. Such was the intention of the constitution, that the distinctive character of the two houses could only be maintained when they were kept separate-that when in convention it was no

"Custom had established the mode of election by joint ballot; he said such a mode was unconstiutional although sanctioned by precedent, and it was time that the custom should be abolished, and the not have thought of this, if the contest had not been close one-on this account we now resort to first principles, and thus ascertain the true meaning of the constitution. In the division of powers, the two houses are checks upon each other, but this can only be in their separate and distinct character; when in convention the check is lost, as the two houses form but one body.

"In support of his opinion that the election should be by the concurrent vote of the two houses, and not by joint ballot in convention, he referred to the opinions of chancellor Kent, Judge Story, the Federalist and the Federal Farmer, all of whom titled to no weight unless it conformed to the true dr. principles of the constitution which he said was opposed to the practice of electing by joint ballot. Is the view which he entertained of the constitution Mr. J. said he would violate his oath and the principles of the constitution if he voted to go into the esting information relative to the Fair. election by joint ballot-upon this platform he he planted himself," &c.

Shall we have a Long Session? From the opening indications, we fear this question will be practically answered in the affirmative. The tendency, of late years, has been, to prolong the sessions of our Legislature, to what appears to the people at large, an upreasonable length. The sesion of 1853-4 was no less remarkable for its duration, than for the small amount of business done for the general interest of the State. The last session was about the same length, and although it performed more service than its predecessor, yet it take his place, in the order named. was unnecessarily protracted. We have no idea that any member comes to the Legislature with the deliberate view of lengthening the sessions unnecessarily. But it is nevertheless true that it is done, though unwittingly. There is unquestionably a large amount of time consumed at every session, in the consideration of useless legislation, and still more thrown away in gaseous discussions. White Slaves. The English, who are so opposed to negro slavery under the american regime, are not at all opposed to a system which, in their own hands, is an outrage of the blackest and most heartless nature, -While "American slavery" gives Exeter Hall, the "Westminster Review," and other humane pen-and k mouth-pieces of the English nation such troue and anxiety, it is a notorious fact that a system of slavery, in Chinese and other Asiatics, infinitely rorse, is openly sustained and patronized. NEW PUBLICATIONS

Fanny Fern's New Book.

Fresh Leaves.

BY FANNY PERN. In one volume, Blue and Gold.

From the New York Courier. Fanny's leaves are always fresh, lively and piquant, and ney have the aroma of nature about bem. There are a cod many professed ori ies who say that Fauny is rude, cultur and flippant. But this class of critic think that anything is coarse and vulgar, and flippant, that is not common-place and cull, and sturid, S' skespesre, and fare n, and Sterne, and Addison, and Fish low, are dread-ully coarse, and they are dreadfull popular. A French printe has compared Shakspeare to a dung hill, but what critic has compared that spears to a dump hill, but what of it? Critics will have their ray, and they have a right to say what they think; and the public has a right to think too; and it always exercises this right without any worse resard to the opinion of critics than the weather shows for the vane on a church steeple. The public have tiven unquestionable evider ces of thing Fanny I eru's rivel ches, and the public never approves of what is come and vulgar. Fanny's style has the vivariy, terseness, and epigrammanica! I liveliness of the French school, while her fancy is so full of geniul tenderness, and as terming with aimple dramatic scenes and feelless as the most hearty and iciomatic of English writers. There are some who complain that she is a were par-graph's t, and so she is, and plain that she is a were paregrap! I t, and so she is, and so were Solomon, and Franklin and Pope, and Montaigne, and La Rochefoucauld and Bacon. But it would be an add objection to male to any author that he compress into a raragraph the wit which another in vain attempted to diduce through an essay or a volume. Famy Fern climbed into a reputation through the greatest difficulties, she wrote for chacure journals, and compelled the world to remain the stream of the world. the recognize her genius in spile of the unfortunate chan-nels through which the addressed it. The present volume is a very pretty little one with gitt edges, and a quait binding which has an antiquated look, making a very agreeable contrast to the common blue and

gold now the rage am ng book manufacturers. From the New Yorker, Framy Form the New Yorker.

Fanny Form may appear a thousand times with Fern Leaves, Palm Leaves, and any leaver but final leaves taking, and she will be as agreeable as ever. Although she call-her last book, is used in superbadyle by Messrs, Mason. "Fresh Leaves," whatever she writes has on its face the common look and vigor of an intel set in its prime.—The eye is fixed as kren, the voice just as decisive as ever. Let her faults be what they may wherever Fanny Fern Let her faults be what they may wherever Fanny Fern weites on a subject it is concluded - you feel the comfort there is in being in the hands of a raster, or mistress raiber. This is one of her richest publications brim-full of life, varied and abundant. The call for the book will, no doubt, be loud and long.
