

HOW WEIRL CAN BE BEST
CONGEATED IN THE FALL
... To Be Done, To Secure p the
Rents Of Land on Their Control.

SYNTH.

OF HIGHWAYS

on the Road to the East
and State Authorities to Admit
Other Countries.

Monetary aid to the States is set up by the administration and will be given to the states in the fall being mapped out so definite manner. It is estimated that the cost will exceed \$100,000,000 or \$120,000,000. The federal highway and roads system especially requires that all roads be built and be open to a continuous stream of traffic consisting of not more than 7 per cent of the road users, 20 per cent of which is to consist of cattle and 10 per cent of passenger cars and 10 per cent of motor vehicles.

Proposed systems have been released by the Bureau of public roads of the United States Department of Agriculture. Coming for eight states they are plotted on a map showing the roads and country boundaries.

Farm Agent G. B. Dunlap has a letter from the A. & M. College which states that Prof. Sanborn and Prof. School, experts in the control of boll weevils, will be here early this month to check up on the results obtained in the county with the poison dust plan which many cotton growers have used this year. It is recalled that the First National Bank bought a car load of the poison powder as well as a large number of the dusting machines and the machines and dust were sold to the local farmers customers at cost. Reports to the bank indicate that the plan is a successful control for the boll weevil.

ROTARY CLUB MEETING

The Rotary Club's regular meeting was held Tuesday noon in hotel at the Woods with a larger attendance than usual. Weekly business was attended after which the club listened to a splendid short talk by Rev. Mr. Ryland, resident pastor of the First Baptist Church and pastor of the Cedar church. Mr. Ryland had a real message and pointed it home in a way which was impressive. A guest of the club also was Fred Sage, member of the Shawnee club, who spoke for ten minutes on the ideals of Rotary.

TANK BUILDER IS KILLED

S. J. Latham, a tank builder employed near Wilson, Oklahoma, was burned to death in a fire which destroyed a two-story frame hotel at Wilson Sunday morning.

Later on two women were arrested on suspicion that they had murdered Latham and then fired the building hoping to destroy evidence of the murder. It was not known that the man was burned in the fire until the charred corpse was found in the ruin.

BOSWELL EASILY BEATEN

Durant Hi football team easily defeated the Boswell Hi team here last Friday in a very one sided game, the locals winning by the score of 77 to 0. At the end of the first half the score was 52 to 0 in favor of the locals, after which the quarters were cut to eight minutes and the local second team finished the game, piling up 25 more points. The visitors were outweighed and outplayed at every stage of the game and on both offense and defense.

UNUSUAL BOND ROBBERY

The vault of the county treasurer's office at Jay, Oklahoma, was broken into last Friday night and \$35,000 worth of negotiable bonds stolen, according to officers. The securities are city bonds payable to the bearer. The robbery was discovered by W. M. Sanders, county treasurer, when he went to his office Saturday morning. The combination on the outer door of the vault had been worked and the inner door broken into with tools the burglars had previously stolen from a nearby blacksmith shop.

MUCH LOWER BIDS ARE MADE

According to Reports to Bureau of Public Roads Prices Will Be Greatly Reduced.

Early bids for the construction of federal aid roads indicate that prices during the coming season will be materially lower than last season, according to reports received by the Bureau of public roads of the United States Department of Agriculture. While bids have not been received on any large volume of work, there is, however, enough to indicate a lower level of prices.

Grading has been bid at 20, 23½ and 30 cents a cubic yard in Missouri, Arkansas and Minnesota, respectively, as compared with an average of 35 cents for the section in which these states are located in 1921.

Prices of reinforcing steel in place range around 3 cents as compared with the 1921 price of 8 per cent, and bridge steel at 18 cents against 7 to 8 cents.

A few bids for the best grade of concrete, of about \$17 a cubic yard have been received in sections where the 1921 price was about \$25 a cubic yard.

Prices bid for the construction of concrete, per square yard are as follows: Ohio, 3½; Colorado, 22½ and Georgia, 8. As compared with an average for the whole country during the period 1916-1920 of \$2.50 a square yard.

FEDERAL-AID ROAD PROJECTS

Total Mileage Under Construction in May Amounted to Nearly 15,000 Miles.

Federal aid road projects totaling 363 miles in length were completed and 511 miles were under construction during May, bringing the total under construction to nearly 15,000 miles and the mileage in completed projects to 17,068, according to reports of the Bureau of public roads, United States Department of Agriculture. These figures indicate that the federal-aid system grew at a rate of more than 20 miles per day on each working day of the month. Allocations of funds to definite projects amounted to \$7,828,000 during the month.

Mark Set for 1922.

Three hundred and fifty thousand miles of improved highways, extending through every state in the Union, is the mark set for the summer of 1922.

COURT MARTIAL ORDERED HELD AT DENISON, TEXAS

AMERICAN FROM TURKISH FIRING SQUAD RECENTLY Governor Wants Investigation Of Alleged Misconduct

Details of the escape from death of Charles MacLachlan, president of International College at Smyrna, the hands of Turkish soldiers during a raid on that city, have just reached this country.

Dr. MacLachlan, who was badly beaten by the Turks, was watching from the college grounds in the church of Paradise and expressed a desire to stop them.

The petty officer in charge of the marine detachment warned him not to leave the grounds, but he was possessed of such influence upon the Turks with whom he was friendly and went, several marines went with him. The group was fired on by the Turks from the inside of a house and the officer and MacLachlan were made prisoners. They were beaten with clubs and in general roughly handled and stripped of their clothing. When MacLachlan protested against such treatment, the two of them were stood against a wall to be shot. It so happened that a Turkish officer of a better sort was passing at the time and stopped the execution. The college president was slightly injured by the beating he had received.

WORK RESUMED ON BOLEAU TEST WELL NEAR COLBERT

After a suspension of three months drilling operations have been resumed on the Boeau test well near Colbert and it is hoped to complete the test this fall and winter.

The well is at present at a depth of about 1,300 feet and is being operated with a full crew of expert oil well drillers. They are working two shifts, day and night, in order to get to where they are going as soon as possible.

According to geologists' report, there are several sands at which a well can be brought in, but the drillers expect to drill to the most promising sand.

HIGHWAY PRESIDENT HERE

Dr. S. M. Johnson, president of the Lee Highway, was here for a brief visit Tuesday morning coming from Duncan and while here the meet of the Chamber of Commerce. While here he was also a guest of the Lions Club at their social at home held Monday night at the Avis Inn hotel.

The Lee Highway, of which Dr. Johnson is the president, will extend from New York City to San Diego, Calif., and will be one of the very few transcontinental highways crossing the United States without a break.

Mr. Johnson is out on a trip visiting the various cities on the route and went from here to Ardmore.

OLD TIMER IS MOVING

Mr. and Mrs. Tom Benson and their future home, Mr. Benson has been there for a few weeks getting settled and returned for his family last week. He will engage in the farm loan and real estate business there.

In losing Tom Benson, Durant loses another of the old timers. Tom is known to everybody in Bryan county who has lived here long enough to be acquainted, and has been a resident of Durant so long that the old timers say Tom was here when they arrived. He has been secretary of the election board for many years and has held other public offices which entail lots of work and little or no reward. Tom will be missed by many people and in many ways from midwest.

REPUBLICAN NOMINEE IS TO SPEAK HERE OCTOBER 11TH

The announcement is made from Republican State headquarters John Fields, Republican nominee for Governor of Oklahoma, will address the voters of Bryan county on the night of October 11th. It is expected that the meeting will be held either on the lawn of the court house or in the district court room, depending on the weather.

It is about time to pack the summer furs away in moth balls.

SERVICE
and a
PREMIUM

When you get ready to buy your fruit trees (and now is the season to be thinking about it) pay a visit to our nursery at the west end of Main street. We have one of the largest stocks of fruit trees of every kind adapted to this country, in the whole southwest. Here you may select new fresh nursery stock, all home grown, and acclimated to this climate, and may have free our expert advice on the selection, planting and care of orchards. You cannot possibly get better trees or better service or lower prices than we can give you.

Everyone who buys from us this fall \$10.00 worth of stock or more, will
