NOTES AND COMMENTS.

The area of the Cumberland Plateau is 5,100 square miles.

Mrs. Percival, with her daughter, from Ohio, is staying at the Brown House, with the intention of building or purchasing a residence in Rugby. All will be pleased to welcome her to the colony.

At the meeting of the shareholders of the Rugby Canning Company, last week, it was decided to increase the capital to \$10,000, and the first issue of shares from 50 to 500. The meeting adjourned for a fortnight, when the election of permanent directors will be held.

Mr. John White, an old citizen of Morgan County, died at his brother's, near Kismet, last week. Many years ago he went to Missouri and prospered considerably. About twelve months ago he returned to this section and scene of his early days. He died much respected.

The Chattanooga Times says: "At Rugby there has been started a large blast furnace, and iron and metal are being manufactured from ore taken from the land adjoining, etc." This would be an important and interesting fact if there were any truth in the statement.

The weather on the plateau lately, for several days, has been very spring-like, bringing out the neat little Quaker Maidens and various other early garden flowers. But the sudden change at the beginning of the week rather unceremoniously told us not to expect too much too soon.

The General Assembly, by law, is limited to a session of seventy-five days. There is a difference of opinion as to whether Sundays should be counted in the number. If they are the adjournment sine die will take place about the 28th inst. If not, the session will be prolonged till the 8th or 9th of April.

The Prince of Wales, as Grand Master, has granted the warrant for the formation of a Temperance Masonic Lodge at Manchester, said to be the first lodge ever established on total abstinence principles. Lord Welsely, whose name the lodge will bear, appears to be the prime mover in the foundation of this new departure in Freemasonry.

"EASTER"—The piece is above the average merit of original sentimental poetry, but we have, with but one exception, abstained from publishing sentimental verse. Rhyme with point we are always glad to receive, but original poetry we class under the head of advertisements. We may err in poetic judgment, but its our whim to follow the rule laid down. Personally, we have done a good deal in original poetry—we live in the hope that we shall be forgiven.

At Oakdale, Friday last week, a man named Cook finished a barn for Cal. Edwards, and asked for payment. Edwards said the contract had not been kept and refused to pay up. A quarrel ensued, and next day the two men again meeting, Cook made for Edwards with a knife, when the latter stepped indoors, propped his pistol and coming out shot his assailant in the shoulder, the bullet traversing towards the heart. Cook instantly expired and Edwards has not yet been apprehended.

In the "First Monthly Report of Weather Service," containing the observations for the month of February, issued by Commissioner Hawkins, we note the observations made at Grassy Cove, Cumberland county, which is about the center of the plateau, by Miss Nettie M. Stratton:

"Station, Grassy Cove.—Lat. 36°; long. 8°; Altitude 1,700 ft.; observations commenced on 4th; rain on 4th, 5th, 6th, 7th, 8th, 10th, 11th, 12th, 13th, 14th, 15th, 16th, 17th, 18th, 19th, 23rd, 24th, 25th and 26th; very light snow on 4th, 14th, 17th and 23rd; total precipitation 3.92 inches; minimum temperature 20° on the 19th and 27th; maximum 73° on 16th; fog on 6th; thunder storms on 15th and 21st; winds quite variable; 8 clear days."

A peach orchard planted and left without attention, as is so frequently seen, will hardly last more than ten years. Of these four are required for the tree to attain the age of fruitage, and as there are rather more than two years of total failure in every five, not more than three or four crops are raised. Now, if the same trees be cultivated, pruned and wormed, they are quite certain to be in a better state of preservation when twenty years old than the neglected ones at ten, and the number of years of profit is very nearly doubled. —Chattanooga Times.

W. T. Parham relates in the Jackson (Tenn.) Dispatch his experience with the red Brazilian artichoke, imported seed from which was distributed by the Washington Agricultural Department. He finds it next to clover as a land renovator, and the cheapest of hog food, yielding more than anything else that is grown, 800 to 1,000 bushels per acre. The artichokes lie in the ground all winter without rotting, and the hogs root them out and grow fat. They contain much sugar, and are easy to cultivate. They are excellent for improving poor land.

Professor Henry P. Colton, geologist of the State Bureau of Agriculture, has been a trip through the mining region of Western Pennsylvania, and returned home more firmly convinced than ever of the great mineral wealth of Tennessee, and the fine prospect the State has of becoming the home of emigrants. He had numerous enquiries made him, and the Hand Books were eagerly sought for. The agents of railway lines, even in Cincinnati, were all anxious to get just such a book, and had time permitted much effective work might have been done. Professor Colton's opinion is that the class of settlers who may be brought here are intelligent, educated people, able to pay their way.

Mr. Kelly, of Shelby county, introduced the following resolution in the House, on St. Patrick's day, the 17th inst., which, under a suspension of the rules, was unanimously adopted:

Resolved by the General Assembly of the State of Tennessee, That on this the national holiday of Ireland, in appreciation of her heroic people, whose love of country, resistance to tyranny, courage in the field, eloquence in the forum, and sympathy for the oppressed, have in all ages shown for them the admiration of all who admire that which is true, noble, grand and self-sacrificing, we the representatives of the people of Tennessee extend to the Irish our sympathy in the struggle which they are waging against the oppression of alien landlords.

Fourteen years ago some citizens of Pittsburg, Pa., bought 50,000 acres of land in the north-east part of Tennessee, giving ten cents an acre. They had no immediate object in purchasing, their idea being to wait till local development raised the value of their property, and then to "go in and win." The taxes were regularly paid up, \$5 per annum for 1,000 acres, by a Knoxville lawyer, who had care of the large tract. A thousand acres of the land were lately sold, and then the squatter difficulty arose, the settlers claiming that they had a common law right to all they had enclosed, having been in undisputed possession for twenty-one years. Suits of ejectment will shortly be commenced at Knoxville against the squatters, and the contest, as it involves a most valuable mineral, timber and agricultural area, will be one of great legal and local interest. The Chattanooga Times says "the tract lies near to that owned by the Rugby colony, established by Thomas Hughes."

"A Mountain Boy." at Hiwassee College, writes us—"We receive your paper regularly every Monday, and think it a splendid paper, and that every citizen of the three counties which it represents should take it. Spring is here, the farmers are sowing oats, planting gardens and breaking corn ground. All are busily engaged. Wheat looks well and there are indications of an abundant harvest. Mr. Alen Cathcart, an old citizen of this county, died last Saturday, of fever. Professor Hamilton is out to-day (March 20th) with his class surveying and running lines for a farm. O. C. Conatser, of Pall Mall, Fentress county is one of his class. By the way, why doesn't some one write something to encourage the farmers? they are the men who support our country. All other professions would be in a bad condition were it not for the farmers."

We quite agree with you; the farmer is the begin-all and the end-all of every country, and it has been well said by Bourk that "the plow is the first creditor in every state." There is much about farming, however, that is not only laborious, but in a certain sense unrefining and opposed to "society" ways. There will always be much labor connected with it, but if there is any unrefinement it does not lie in the avocation of the agriculturist so much as it does in his inability to see and appreciate—and apply—the manifestations of nature and the teachings of science. Eyes seeing these things will make a refined and profitable use of the profession, and build up a happy and independent life, with a scorn of the hollow ways of "society," and the often godless and unprincipled schemes of the city money-maker.

"Oseuse me, but you said you was from Idaho?" "Yes, right from Idaho. I have just founded the town of Beaver Creek." "Many beoples dere yet?" "Well, not many." "I tink it has a good blace fur der clothing vesness, eh?" "Hardly. Why, there's only me and a mule and a nigger there as yet, and I buy all my clothing in Omaha."

"Vhall, I tink it vvas a good opening shust der same for my brudder, and I mair my ready to-morrow to go. Eaferybody must expect to begin way down and grow op mid der city, und by spring der population may grow to be five niggers and ten mules.—Wall Street Times.

CLASSIFICATION OF STRAWBERRIES.

E. B. Underhill, of Poughkeepsie, New York, in his strawberry circular, gives the following classification of the varieties he grows and recommends. It will be found valuable to all small fruit growers:

Worth Knowing.

One bottle of Johnson's Anodyne Linctum will effectually cure bronchitis, inflammatory sore throat, sore lungs, bleeding at the lungs, chronic hoarseness, hacking cough, whooping cough, and lame stomach.

Dr. Sturdevant says that potash, whether in the shape of wood ashes or in the form of sulphate or muriate, is a special fertilizer for melons.

In Baltimore, on St. Paul street, is displayed the sign: "Charles J. Bonaparte, attorney-at-law." This grand-nephew of the great Emperor is a busy member of his profession.

A Philadelphia editor, thinks the enemies of General Grant ought not to object to having him put on the two-cent postage stamp, as that is the only way ever contrived to get him licked.

Ex-Congressman Flower, of New York, has returned to the Treasury the sum \$458.50, the amount overpaid him on account of salary and mileage while a member of the Forty-seventh Congress.

The owners of a fruit cannery at Weldon, De Witt county, Ill., have bought 50,000 pounds of tin, which will make 250,000 cans—enough to fill 30 cars with fruit after the cans are filled.

There is an alarming increase of law-yers in England. One hundred years ago there were a few less than 300, and at the beginning of the present century there were between 600 and 700. Now there is nearly 7,000.

A forty-two inch vein of iron ore has just been discovered on the farm of B. F. Roberts, within a couple of miles of Oakdale. The vein is eight or ten miles long and extends through the farms of Adkisson, Church Hester, Abe Mays, Benj. Henrickson, Cox and others.—East Tennesseean.

A family of two grown persons and three children can rear, in about forty days, thirty-eight thousand silkworms, which will produce thirty-eight thousand cocoons. Thirty-eight thousand cocoons weigh about two hundred pounds. The average price of cocoons is about one dollar per pound; when very good and heavy it is about a dollar and a half per pound.—Professor Barrielli.

London, as it is to be consolidated by Parliament, will have a population of 4,764,317, equal to the combined population of the cities of New York, Boston, Philadelphia, Providence, Brooklyn, Chicago, New Orleans, Cincinnati, St. Louis and Baltimore, or, to put it by States, a population as great as that of Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut and Minnesota.

"Mean people take advantage of their neighbor's difficulties to annoy them." Mean diseases, such as piles, rheumatism, constipation, dyspepsia, malaria, lame backs, etc., take advantage of people's exposures and attack them it is then that Kidney-Wort appears on the field and by its timely agency puts to rout this flock of evil ailments. It is a friend in need and therefore a friend indeed.

"Oseuse me, but you said you was from Idaho?" "Yes, right from Idaho. I have just founded the town of Beaver Creek." "Many beoples dere yet?" "Well, not many." "I tink it has a good blace fur der clothing vesness, eh?" "Hardly. Why, there's only me and a mule and a nigger there as yet, and I buy all my clothing in Omaha."

CHEAP HOMES ON THE BOARD OF AID ESTATE, CUMBERLAND PLATEAU.

COMPARATIVE ELEVATION.
Cincinnati..... 550 feet above sea level.
Chattanooga..... 885 " " " "
Rugby..... 1410 " " " "

HEALTH AND CLIMATE.
All health seekers, whether from Northern or Southern States, should try the climate of the Plateau. The recent United States Census shows it to be almost the only district east of the Rocky Mountains, entirely free from malarial, pulmonary and intestinal diseases. The Plateau has a double climate, one resulting from latitude and the other from elevation. The air is pure and invigorating. The water is freestone; cool and sparkling. Mineral springs are numerous.
The mean summer temperature is 72 deg. Fahr., and in winter 37 deg. Fahr. The nights are always cool and refreshing.

SOIL.
The soil is a sandy loam upon a mulatto clay subsoil. It is light, friable, holds manure, is easily cultivated and responds readily and generously to the least fertilizer.

CROPS AND GRASSES.
Corn, wheat, rye, oats, and barley all grow well, though this is not claimed as a grain growing soil. Tobacco is a profitable crop here, as also is sorghum. Herd grass, orchard grass, German and pearl millet, timothy and red clover have all been tried, and take hold and root well. Kentucky blue grass also thrives wherever introduced. The natural pasturage is abundant.

VEGETABLES.
Grow abundantly. Cabbage, onions, beans, sweet and Irish potatoes all make a fine return. The Irish potatoes are unexcelled by any grown in America. Sweet potatoes and onions yield 500 bushels per acre.

FRUIT AND GRAPE CULTURE.
This region is especially adapted to fruit, and particularly to the winter apple and the grape. The apple crop here has never been known to fail. The trees are healthy, and the fruit smooth, plump, juicy and firm, rarely ever specking or rotting. The grape is also a sure crop where proper varieties are planted. The vines are robust, and the grapes make excellent wines, which are in good demand. These two fruits are destined to become the great staple products of the Plateau. Strawberries, blackberries, raspberries, currants, cherries, plums, and nearly all the small fruits thrive and bear prolifically.

STOCK AND SHEEP RAISING.
The excellent natural pasturage, good drainage, abundance of running water and freedom from fires make these occupations eminently suitable and remunerative.
Stop feeding stock for eight months in the year. Come South, where you can buy cheap lands, work outdoors all the winter and turn your stock into the woods most of the year.

LAND—TITLES WARRANTED AND DEFENDED.
The Board of Aid Estate, centrally situated on this plateau, consists of 35,000 acres of grazing, farming, fruit raising and vine growing lands.

IT DEPARTS TEN MILES OF FRONTAGE ON THE CINCINNATI SOUTHERN RAIL ROAD, WITH FOUR DEPOTS LOCATED ON IT.
The lands enumerated below are being offered in tracts suitable to all purchasers, at low figures and with def. red payments.

Board lands on the Cin. So. R.R., west of Glen Mary Station. About 3,000 acres of very desirable land fronting on the Cin. So. R.R., is here laid out in 100 acre farms. No farm is more than three miles from either Sunbright or Glen Mary Depots; to the latter are adjacent the Crooke Coal Mines, employing 200 men and with an out-put of twice as much per day. Glen Mary has 200 inhabitants, three stores, telegraph station and post-office, and is stopped at by all trains, four passenger and four freight daily. Good and ready market, with best shipping facilities for either agricultural produce or timber and tan-bark.
Also several fine tracts of land fronting and lying on the east side of the C.S.R.R., and half a mile south of Glen Mary.
Board lands on the Cin. So. R.R., west of Sunbright. These lands lie directly south of the above and are close to the thriving town of Sunbright, with 200 inhabitants, two hotels, Masonic Lodge, six stores and post-office. They are well watered and timbered, and have excellent market, shipping and especially lumbering facilities.

Founded in 1880, has many social advantages, viz., Two Good Hotels, Fine Church and School Building, Public Library with 6,000 volumes. Large Commissary, Drug Store, Weekly Newspaper, Post Office with two mails per day, and also numerous good houses and attractive villa residences. Choice building lots are now being offered at very reasonable prices.

Sedgemoor, the station for the above, has also been laid out in town lots, and the Board is prepared to offer liberal inducements to persons settling there for manufacturing or business purposes. Sedgemoor has two stores and boarding houses, and promises to be a flourishing town in the near future. The C.S.R.R. has just put in there a siding, 1,500 feet long.

The Board's Rugby lands comprise several tracts lying west of Rugby, in Morgan and Fentress Counties, as well as all their territory between Rugby and Sedgemoor and Robbin's Depots on the C.S.R.R. These lands are traversed by the Rugby and Sedgemoor Pike, a graded road, seven miles long and pronounced the best dirt road in Tennessee, and are, on account of the superior communication, as accessible to the railroad as the less remote lands of the Board. They are situated on the direct and, in winter, only line of traffic from the C.S.R.R. to Jamestown, Livingston, Celina and Byrdstown, respectively the county seats of Fentress, Overton, Clay and Pickett Counties.

CONCLUSION.
The past season has been eminently successful as regards all farming and gardening operations, the crops being invariably full and of excellent quality. We invite all interested persons to correspond with settlers now upon the ground.

Maps and plans can be seen at the Board's Office on Central Avenue.

Intending Settlers will be most liberally dealt with, and any information cheerfully given by
