SONG OF THE SPRING.

De spring-time en us an' de March wind squallin'...

THE TEST OF THE SECOND WIFE.

(From Mrs. Paddock's "Tale of Madame La Tour.")

It had always been Brigham Young's policy to outlaw his followers, and thus prevent the possibility of their return to civilized society...

"I know what is keeping you back. It is the fear that your wife will say to you: 'I want you to tell her from me that the judgments of God have rested on her these many years because of her rebellion against his will...'"

"You will give me a week to decide?" Philip inquired in his own voice as he pronounced the words.

"Yes, just one week, and not a day over. You may go now; I have said all that I had to say, and with a look on his face as hard and cruel as when, fifteen years before, he gave Madame La Tour the choice of alternatives which brought her to the valley, the prophet pointed to the door. Philip groped his way out blindly."

"Forgive me, love," she said, laying her hand on his bowed head. "I did not mean to make the trial harder for you."

It is needless to dwell upon the struggle, which did not end with the night, but lasted throughout the week. The result was what might have been foreseen. From a man who had saved their lives over from profanation, and when the time arrived for making his decision known to the prophet, Philip said, "I will obey."

wretched day that followed his interview with the prophet. Hour after hour passed. It was almost night, and Jessie would be anxious and disturbed if he stayed away any longer, so at last with the courage of desperation he turned his face homeward, resolved to speak out at once and come to a decision before another sun rose.

His wife was at the door, his hand on the baby to welcome him. Both faces were bright with smiles, and one was as unconscious as the other of coming evil. "How can I ever tell her?" he thought, and for a moment a wild wish to break out and fly far from the cruel fate that threatened them all possessed him, but only for a moment.

"I cannot fly from God," this was his next thought, and the duty of the Mormon faith—conscientious, true, unflinching—seemed to his excited imagination to stand in the way with a drawn sword, barring up escape and driving him forward to the destiny he dreaded.

It was the sweet voice of his wife that fell on his ear, but the words smote him like a blow. How could he bear her tenderness, her wifely solicitude, when he was about to desert her again? He was ill. For a minute he strained her to his heart, covering her face with passionate kisses; then putting her away from him and pointing to a chair, he said, in a strange, hoarse voice:—"Sit down, Jessie, I have something to tell you."

"She obeyed, with an amazed look on her sweet face, and yet as plainly unconscious of the blow that awaited her as the lamb of the uplifted knife. Twice or thrice he essayed to speak, but his voice failed him. At last, summoning all his strength, he began: "Jessie, President Young sent me to-day to tell me that he had already borne too long with my disobedience to counsel, and that I must now take another wife, or be cut off from the church, and—has given me one week in which to decide."

Jessie's cheek blanched, and for a moment she could not reply; but continuing herself directly, she spoke bravely:—"If we are cut off from the church, we cannot leave us. We can go to Camp Douglas, as others have done, and will be there, though, of course, glancing around the pleasant town, 'we shall lose the home, and I suppose the store, too; but we shall be free, and we shall have each other and our children to comfort us."

"I am not afraid of the man who can only kill the body, but I fear Him who is able to destroy both soul and body in hell." "Philip, you do not mean—you cannot mean that!" Speech failed, and the unhappy wife, upon whom possibility which she had never before contemplated dawned at last, could only clasp her hands in mute appeal.

"I mean that I fear we may be fighting against God. President Young says our children have been taken because we have been disobedient, and if we continue to rebel our baby will be left beside the other before another month."

"God speaks to us by the voice of his prophet. I must believe. If I doubt one word I must give up all." "You are up to the eyes in it, Philip, this religion is false—as false as it is cruel. It yields nothing but discord, and misery, and wickedness. Look at the families where they say they have obeyed the law of God! The wife, if she is not changed into fury, is dying of grief, and the children are perishing. Their lives in the midst of strifes and jealousy that kills all the good in them. And the children I had rather bury my baby to-morrow than have him grow up like them."

"Jessie, my wife, hear me. If God commands a thing, we must not question his wisdom. We must look beyond the present for results. He knows that it will cost me more to obey him in this thing and he would not require such a sacrifice of me if no good could come of it."

"Philip! She rose to her feet and stood before him. "Answer me plainly, and once. Do you believe that God requires you to take another wife?" "Yes, he has a little pity on me. That is the question I am trying to decide. I have been trying all day. I dared not come home. I could not face you; and I feel now as though I were going mad."

The stern look faded from her face, and the fire in her eyes softened. She was again the tender, loyal wife. "Forgive me, love," she said, laying her hand on his bowed head. "I did not mean to make the trial harder for you."

She had lived too long in the midst of such scenes not to know that the end would be, and she read her death-warrant in Philip's face before a single word was spoken to reveal the choice he had made.

Can Egypt Fight? The Egyptian army, as at present organized, says the New York Herald, consists of nine regiments of infantry, two regiments of artillery, three regiments of cavalry, and four regiments of engineers.

The North Pole? Dr. Talmage on the Achievements of the Explorers. In his Friday evening lecture, in the Brooklyn Tabernacle, upon secular topics as viewed from a religious standpoint, Dr. Talmage said:—

Approaching Quantine is the steamer bearing Danenhower and other escaped members of the brave company of men who went forth to battle their way toward the North Pole. Their comrades fallen in the Anseritz of icebergs, those men come back wounded, their attempts to submerge their endurance terrific, and their heroic exploits to do but receive the laurels of a martyr's crown.

A Dissolution. "It is seldom," says the Albany Argus, "that a bill introduced into the Legislature has within it the key to a romance, but such a one is that proposed by Assemblyman Danenhower, providing that the marriage of Daniel Walrath to Emma A. Sawyer be declared null and void. The story of the marriage which is thus sought to be set aside is a strange one. Mrs. Walrath here in the East. The goal is so near reached that the hero is now born who will wear the coronal of final achievement. The ship may now be in some cradle or dry dock which shall glide over the bones of the dead fleet of Walrath's ships."

The Price of Beef. William H. Lyon, chairman of the Purchasing Committee of the Indian Commission, said in conversation with a reporter:—"I do not see any reason for the prevailing high price of beef in Chicago and here in the East. It is higher than I have ever known it before, though I remember many worse seasons for cattle than last winter. There are plenty of cattle on the plains. They are not quite so fat as usual at this season. It is true, but still they are cheap and abundant. We have purchased nearly 40,000,000 pounds of beef for our various Indian agencies, and at a very small advance over last year's. Mr. Lyon gives the following figures: Last year we paid \$1.50 for the beef, and this year we pay \$1.75. The advance is due to the fact that the price of the principal agencies."

By all our cities, the American Government has organized a great expedition, the purpose of which is to explore the interior of the continent, and to determine the feasibility of a route to the North Pole. The expedition is to be led by a man of the name of Danenhower, and is to consist of a large number of men, and a great amount of equipment.

Trials for Treason. A witness of Onapside, who had an inn called the Crown, said one day to his only son:—"Don't let me hear a word, I will make his hair to the Crown." The worthy Boniface had refused to pay certain dues imposed upon him and had become obnoxious to the persons in power of that day, and his light words were reported to the king in high places. He was arrested for high treason, and although his words, "the Crown," and although he referred to the Crown Inn, of which he was landlord, they were looked upon as referring to the Crown Royal of England. He was tried before Lord Chief Justice Byles, convicted and executed. In another case a gentleman of Essex had in his park a favorite white hart, which the king hunted with his nobles, pursued and killed. On hearing of his death the king exclaimed, "I will be the best, horns and all, were inside the man who advised the king to this act." He was arrested, and the serious legal argument used to convict him was thus: If the hart, horns and all, were in the king (he being his own adviser); but the prisoner wished the slayer of his property in this predicament, ergo, he wished the king so situated, and therefore he wished the king's death! A conviction was obtained, but so hard a case did it appear, that Lord Chief Justice Markham, who opposed the conviction, resigned his judgment upon the sentence of death being carried into execution. More recently, a sermon prepared, but never actually preached, containing alleged traitorous matter, and a paper found in a private recitade, were considered sufficient to convict Pencheon and Algernon Sidney of treason.—Lecture Hours.

A Circular.—Secretary Sims, of the Kansas State Board of Agriculture, has issued a circular letter to farmers saying:—"From information received at this office I am satisfied that hogs will feed upon the young and tender plants from cockleburrs, and that such plants are very injurious to stock, resulting in death to large numbers of animals. I call the attention of farmers all over the country to this subject, for the purpose of prompting investigation."

How a Good-Looking Guest Got a Night's Lodging and \$83 for Nothing. (From the Remerwell Courier.) "Do you see that man standing along just behind the starters' stand?" said a gentleman to a reporter last Tuesday at the Jersey Club grounds. "I never saw him but once before, and don't know his name, but I will give you \$10 that he will be a winner on to-day's race."

How a Good-Looking Guest Got a Night's Lodging and \$83 for Nothing. (From the Remerwell Courier.) "Do you see that man standing along just behind the starters' stand?" said a gentleman to a reporter last Tuesday at the Jersey Club grounds. "I never saw him but once before, and don't know his name, but I will give you \$10 that he will be a winner on to-day's race."

The Wages of Farm Labor. An investigation of the rate of wages of farm labor, which has been made by the Department of Agriculture at Washington shows an increase of 24 per cent, since 1879 in the Eastern States. From 1875 to 1879 the decline was heaviest in manufacturing sections, and in the agricultural periods, it is shown that wages declined gradually from 1868 to 1875; very heavily from that date to 1879, when a rapid recuperation began. The decline was most marked in the period between 1868 and 1869, when the high price of cotton advanced the rate of wages. The fluctuation has been less in the South, the improvement in the industry of the West, and the fact that the general tendency to lower rates. Thus, the average rate per month was \$16 when cotton was 30 cents per pound, and \$15.30 when cotton was 12 cents per pound.

A Tough Kind of Witness. During a recent trial before Justice Dougherty it was thought important by counsel to determine the length of time that certain quarters of beef were in front of the plaintiff's store before they were taken away by the defendant. The witness under examination was a German, whose knowledge of the English language was limited; but he testified in plain, straight-forward way to having weighed the meat, and to having afterward carried it out and put it into the storehouse. Then the following ensued: "Counselor Enos: 'Show to the jury how long it was that you took the meat from the store and put it into the wagon before it was taken away.'"

Mystery Explained. The mystery of Zoe Watkins's disappearance in St. Louis has been partly dispelled by the discovery of her body in the river, but the manner of her death remains unexplained. No concrete statement in that city. Zoe was the daughter of a wealthy man in Denver, aged sixteen, and a particularly light-hearted, intelligent, and successful young woman. After writing several letters home, telling how well she was enjoying the trip, and what she expected to do at a party that evening, she went out to post them in a laundry, and only five days later she had died from drowning. There was no disorder about her clothing, even her hands being neatly groomed, the money which had been in her pocketbook was still there, and some jewelry remained untouched. Where she spent the three days between her disappearance and death can only be conjectured. Her father believes that she was abducted, and that the guilty person or persons, frightened by the hue and cry, murdered her to conceal the crime.

How many peck peach-baskets, each holding six quarts, will be required to seven bushels of peaches, each bushel of which is short four quarts? A certain city has a population of 420,000. The census man can't find but 231,589. What is the difference, and where did the rest of the population go during the census taking? A man pays three cents for three pounds of evaporated apples and gets a \$14 newspaper puff for sending them to an orphan asylum. Does he gain or lose, and how much? Jesse has 5 boxes and Emily has 3, while the old maid next door has none. How many boxes in all, and how many would be left if they should give the old maid half the crop? If it takes eighteen men to do the hoeing and four men to do the lifting of a bushel of wheat, how many men would it take to lift a bushel of wheat? If six men who talk poetically and dispute on Biblical questions can build a wall in five days, how long will it take ten men who talk and fight with the widow on the corner to do the same work? A man has an overcoat for which he paid \$18, and his wife trades it off for two redolent quilts of American manufacture. How much money does she get for the overcoat, and how much money will she get from her husband to buy a full bottom?

If it takes eighteen men to do the hoeing and four men to do the lifting of a bushel of wheat, how many men would it take to lift a bushel of wheat? If six men who talk poetically and dispute on Biblical questions can build a wall in five days, how long will it take ten men who talk and fight with the widow on the corner to do the same work? A man has an overcoat for which he paid \$18, and his wife trades it off for two redolent quilts of American manufacture. How much money does she get for the overcoat, and how much money will she get from her husband to buy a full bottom?

How many peck peach-baskets, each holding six quarts, will be required to seven bushels of peaches, each bushel of which is short four quarts? A certain city has a population of 420,000. The census man can't find but 231,589. What is the difference, and where did the rest of the population go during the census taking? A man pays three cents for three pounds of evaporated apples and gets a \$14 newspaper puff for sending them to an orphan asylum. Does he gain or lose, and how much? Jesse has 5 boxes and Emily has 3, while the old maid next door has none. How many boxes in all, and how many would be left if they should give the old maid half the crop? If it takes eighteen men to do the hoeing and four men to do the lifting of a bushel of wheat, how many men would it take to lift a bushel of wheat?
