The fair weather of the past few days has advanced the work on the Drowne block to a noticeable degree and about ten days more of fair weather will finish the brick work on the building. The walls are to be plastered entirely with asbestos from the mines of the New England Mining and Milling Company of Eden. Asbestos is the waste or refuse from the asbestos rock and as it makes an entirely fireproof wall it is coming into quite common use. # A SAFE SUMMER PILL

Constipation usually precedes cholera morbus, diarrhea, dysentery, flux, and all morbid bowel disorders marked by pain and too frequent evacuation. Overcome constipation and you guard against these painful, weakening and dangerous attacks. But the remedy must be a mild one—one that regulates the bowels by awakening the liver.

## Dr. Hall's Little Liver Pills

are so mild and gentle because they give tone to the liver and stimulate the secretion of bile. Bile is nature's laxative and there is no need of harsh and drastic drugs.
