

MORRISVILLE

L. C. Tillotson was a business visitor in Burlington Monday.

Mrs. A. H. Slayton was a recent visitor at the home of her brother, Charles Kellogg, in Boston.

Mr. and Mrs. W. M. Tillotson of St. Johnsbury have been in town several days the past week, guests of relatives.

Maurice Kelley was home from the U. V. M. a part of last week. Maurice stands the arduous strain of collegiate work very well.

You can still get those felt pillow tops with emblems—Eastern Star, Knights Templar, Mystic Shrine, or Grand Army—at Briggs' Drug Store at 25 cents each—by parcel post if you wish—adv.

Fred Child, Jr., who has been taking a course at Albany Business College, returned last Wednesday, accompanied by his mother, Mrs. F. R. Child, who had been with him for the week previous.

Rev. J. W. Clark, son-in-law of John C. Peck of this place, is now a professor in Union University at Richmond, Va. Mr. and Mrs. Clark are pleasantly situated there and their friends in Vermont will be pleased to know they like the work and the place very much.

The following was taken from the last Wednesday's issue of the St. Johnsbury Republican—Lyle Tillotson, son of Mr. and Mrs. W. M. Tillotson of Railroad street, fell from the swing foot bridge near O. V. Hooker & Son's plant Monday noon when returning home from school. The little boy was playing with some companions when he was accidentally shoved from the bridge. He fell a distance of nearly 20 feet. Fortunately the ice was covered with soft snow and the lad escaped with only an injured arm.

Mr. and Mrs. R. L. Barrows have purchased of George A. Morse the new house which was completed last week on Olive street and took possession last Thursday. The carpenter work on the house was not commenced until about Nov. 1, and an eight-room structure, thoroughly built and well finished has been completed since that date, and only three men have been at work on the job for the past six weeks. E. E. Siloway had charge of the work until the frame was up and enclosed, since which time the work has been superintended by A. E. Grant, assisted by Rev. George Tabor and Everett Allen. The plumbing was done by B. E. Eaton. This is the third residence built by Mr. Morse on that street within the past six years.

The Vermont Association of Los Angeles held its annual meeting in Grant Hall Jan. 22. A large number attended. There were lots of tourists present. A fine musical program was given consisting of flute solos by Henry George, vocal solos by Mrs. George and Mrs. Atkins and readings by Miss Nicholson. The following officers were elected for 1915:—Pres., Mrs. Henry George; Vice Pres., Henry P. Jones; Sec'y, Mrs. C. H. Powers; Treas., Henry S. George.

Morrisville Man Secretary

At the annual meeting of the Vermont and New Hampshire retail marble men, held at Rutland last week, Fred M. Ober of Morrisville was elected secretary of the association, which is known as the Retail Marble and Granite Dealers' Association of Vermont and New Hampshire. This was the second meeting of the organization, which is affiliated with the national association. Since the initial meeting last year, some half-dozen members have been admitted.

Lamoille Commandery

Lamoille Commandery, Knights Templar, held a special convocation last Wednesday. In the afternoon the Red Cross degree was conferred upon E. E. Schutt. Supper was then taken at the Randall, and in the evening, at 7:30, the Knights Templar degree was conferred upon Mr. Schutt, after which occurred the annual inspection of the Commandery, several Grand Commandery officials being present—among them, R. E. O. W. Datey, White River Junction, Grand Commander; R. E. Geo. F. Root of Newport, Grand Inspector; H. I. Stannard of Malta Commandery, Newport, and G. I. Whitney of Holy Cross Commandery, Bellows Falls.

The occasion was a very interesting one, and the twenty-five Knights present were highly complimented by the officials upon their military discipline. At midnight an oyster supper at Sullivan's concluded this interesting occasion.

The Commandery is prospering under the leadership of Eminent Commander L. M. Munson, who is untiring in his efforts in behalf of that body. He has an excellent corps of assistant officers, and their work shows good results for Vermont's "Baby Commandery."

DO YOU WORK?

Is there any certainty that you will always have work and be able to work? Should idle days or sickness come who will pay the butcher and grocer?

The prudent man builds not only for today, but for tomorrow. The workman who has a SAVINGS ACCOUNT can skip a day or two without worry. The workman who has NOTHING saved is but one pay day ahead of want.

START AN ACCOUNT TODAY. ONE DOLLAR WILL DO. THE UNION SAVINGS BANK AND TRUST COMPANY OF MORRISVILLE VT. adv.

BANISH SCROFULA

Hood's Sarsaparilla Cleanses the Blood, Skin Troubles Vanish.

Scrofula eruptions on the face and body are both annoying and disfiguring. The complexion would be perfect if they were not present! This disease shows itself in other ways, as bunches in the neck, inflamed eyelids, sore ears, wasting of the muscles, a form of dyspepsia, and general debility.

Ask your druggist for Hood's Sarsaparilla. This great medicine completely eradicates scrofula. It purifies and enriches the blood, removes humors, and builds up the whole system.

Scrofula is either inherited or acquired. Better be sure you are quite free from it. Get Hood's Sarsaparilla and begin taking it today.

MAPLEVALE SUGAR PLANT

A Morrisville Industry Doing a Good Business

There are, probably, many people right here in Morrisville who do not know that there is such an establishment as this, here. This building is 46 by 25, with an annex 38 by 48 feet, two floors with attic and basement. It is equipped with steam jacketed kettles, two steam boilers, electric power, electric elevator and other necessary machinery for doing the business and requires quite a gang of help in the season for making boxes, labeling cans, melting and cooking the syrups into small cakes ready for glass jars and cans.

This plant is known as the Maplevale plant and the sugar and syrup all bear a label, Maplevale Brand. Orders for the new goods are already beginning to come in from all over the country; in fact, H. Waite & Son ship maple sugar and syrup to nearly every State in the Union. During May, 1914, they shipped one car each day for seven consecutive days, besides dozens of small orders. An order recently received was for a half ton, put up in two ounce cakes and this is only one of the many ways in which the product is put up here.

To run a plant of this kind requires a good many carloads of syrup and they are already advertising asking farmers to contract for their coming crop. This season they will specialize on soft grain maple sugar, put up in small glass jars and friction top tins. This makes a delicious luxury, nice for sandwiches, griddlecakes and can be eaten from the jars or can with a spoon and will take the place of butter.

Waite & Son boast a little as to having more than twenty-five years to their credit in the maple sugar and syrup business, and all their maple products are put up pure and guaranteed to be free from any and all kinds of adulterations. It is well understood that Lamoille County is one of the best maple sugar producing localities in Vermont.

Cutting Up Texas

A joint resolution has been introduced in the Texas Legislature to divide Texas into two commonwealths. If the resolution passes and the proposition receives the majority of the votes of the people, the new State to be created out of the western half of the State will be called Jefferson. One million people live in the territory embraced in the proposed new State and they are in revolt against what they call the dominance of the liquor interests, which they allege, control the political affairs of Texas. Under the act which admitted Texas to the Union, the State can be divided without action on the part of Congress. Texas has an area of 265,896 square miles. It is larger than Germany or the Central Atlantic States. It is larger than France, which has only 207,000 square miles. It would make four or five States larger than New York. All the people of the United States could be accommodated in Texas without being more crowded than are the people of New England now. Texas now has a population of more than four millions, while its area is 7.2 of the territory of the United States. Compared with this is Germany, which is smaller than Texas, and yet has a population of 64,000,000.

Back to the Old Farms

During the year just closed about 20,000,000 acres of government-owned lands were cut up and distributed in homesteads. This means about 125,000 new quarter-section farms 160 acres each, brought under cultivation. The time is not far away, however, when the handing out of new farms as free gifts must cease. In fact, the supply during the last year was nothing like up to the demand. There has already been a considerable turning back of the farming industries to the opportunities held out in the East Coast States.

Notwithstanding the floods of literature that have been poured out about the abandoned farms of New England and the South Atlantic States, there is no such thing as an abandoned farm anywhere on the map in the sense of being thrown away for any who choose to pick it up. There is a price upon every so-called abandoned farm and, though the asking price is often far below the actual value, it does explain why land hunters go the Dakotas and even up into Canada, where virgin land may yet be had for the asking.

THRILLING CLIMAX TO STORY

Startling Results Are Seen in Novelist's Dictation to His New and Inexperienced Stenographer.

The short-story writer dictates the seventeenth chapter of his novel, "Loony With Love," to a new stenographer and this is the result:

Sylvia rushed into the arms of Armand, A-r-m-a-n-d, comma, the wild cry of a primitive woman issuing from her warm, comma, red lips, period.

New paragraph. Clinging to his stout, comma, manly shoulder dash—in an ecstasy of relief dash—she sobbed out her pitiful story period. New Sentence, quotes, "Armand!" exclamation point!" she cried in a convulsive sob, comma, quotes again. "I ruined three men and a rouse with an acute accent over the e. In giving one of them his conge, always underline foreign words, Miss Smithers, so the typesetter will put them in Italics I spoke to him to you and all that you had meant to me period. He said you were a capital H, and G, Human Gorrilla and I had best be on my guard semi-colon; but now I know the true man behind your mask, comma, Armand, and don't forget to capitalize it."—New Haven Register.

The Humble Toiler

"You must put your shoulder to the wheel in this campaign," said the alert manager.

"I understand that," said the obscure but willing worker. "But you want to let me know when you're going to change your mind about going ahead. The last time I put my shoulder to the wheel, the band wagon suddenly backed up and ran over me."

Those Fish Fancies

"Do you mean to support your friend in his story about catching fish with his bare hands?"

"No," replied Mr. Whopkins. "He exaggerates. It's true he took a fish out of the water with his bare hands. But I had to jump overboard and swim like the deuce in order to catch the fish and hold it for him."

RETRENCHMENT NECESSARY.

The Dentist—What you really need, madam, is some bridge work. Mrs. Swiftly—Can't afford it, doctor—too much bridge play.

Union Card Required. Mistress—Mary, I'll make the pudding myself today. Cook—If ye do, mum, I'll have to quit. Mistress—Why so, Mary? Cook—The rules of our union don't allow us to work in a place where nonunion labor is employed on any part of the work, mum.

RUSKIN ON PAINTING.

Painting, with all its technicalities, difficulties and peculiar ends, is nothing but a noble and expressive language, invaluable as the vehicle of thought, but by itself nothing.

If it is the love of that which your work represents—if, being a landscape painter, it is the love of hills and trees that move you—if, being a figure painter, it is love of human beauty and human soul that moves you—if, being a dower or animal painter, it is love and wonder and delight in petal and in limb that moves you, then the spirit is upon you, and the earth is yours and the fullness thereof.

Man Who Can Do Things Is in Demand

By ORISON SWETT MARDEN.

(Copyright, McClure Newspaper Syndicate.)

When Mayor Mitchel of New York was discussing Colonel Goethals, who has won world-wide renown for his masterly construction of the Panama canal, for the head of the police department, he said he wanted the biggest man in America for the job.

The man who is in most demand everywhere today is the man who can do things, the man with a vigorous initiative and the quality of fine leadership, the man who can create something, the man with resourcefulness, the man of productive power.

There are plenty of men who can do routine work, who can follow prescribed lines, carry out in detail a program which others make, but the man of original force, of constructive energy, who can get out of the beaten track and blaze away for others is as rare as he is valuable.

There is always a big premium on the man of original ideas, progressive methods, the man of productive force, the thinker. There is an advertisement up at the door of every house of human endeavor for such a man. Great business concerns are scouring the country for men of this stamp; large combinations are looking for them as leaders. Merchants need them, insurance companies are looking for them; they are wanted everywhere in the business world, in all walks of life.

The world wants leaders, men with great executive ability, men with stamina, men who have an abundance of iron in their blood and lime in their backbone. It needs aggressive men, men whose blood is full of positive force, men of grit and stamina—these are the men who make things move.

The man who is wanted everywhere today is a born winner, the man who is victory organized, the man who has the habit of victory. These natural winners have great self-confidence as well as determination. They have colossal self-faith in their ability to overcome obstacles.

These great positive, forceful characters are optimistic. Their ability is not weakened by doubts and fears and hesitations; they do not worry; they are not able to do the things they undertake. These are the sort of men that accomplish the great things of the world, the giants that turn neither to the right nor to the left, who do not go over, around or under obstacles, but through them, and are always equal to the occasion.

If you are ambitious to be something more than an average individual, if you expect to step out of the crowd and stand for something in particular, you must not do things as everybody else does them; you must inject superiority into everything you do; you must be original, inventive, resourceful.

If you expect to become an important figure in the world of commerce, a captain of industry, instead of a common soldier in the field of labor, you must put your shoulder to the wheel. Some of the best people ever known—good companions, splendid friends and extremely agreeable—have never accomplished anything worthy of their ability, simply because they had no stamina, or grit. They were tame, commonplace; they lacked the fire, force, the originality and the push that accomplish things.

People whose blood is full of positive force are the leaders, the aggressive men who get to the front. They do not lag and loiter behind, waiting to be attacked. They take the initiative and push ahead, regardless of obstacles. They go through life taking it for granted that they shall control their surroundings; they are convinced that there is but one power in the universe, and that they are a part of that power. They act as if they had their trolley pole upon the great trolley wire of infinite power, and that they are equal to any task, no matter how great.

Eagle Taken by Fishermen.

While herring fishing about fifteen miles from Filey, Yorkshire, England, a few days ago, the crew of one of the boats observed a large bird approaching, which, after hovering a short time, alighted upon the masthead. One of the lads on board, immediately commenced climbing the mast, thinking to secure a prize, but on the lad approaching it took wing. He had not descended far, however, before the bird returned to its previous position, apparently much exhausted. The lad again sprang up the mast, and on reaching the top attempted to grasp the bird, but his majesty was not to be taken without a struggle, for he stuck his talons deep into the boy's hand, making the blood flow most freely. The boy, clinging tightly to the mast with his legs, threw out the other hand, seized the bird by the throat, and succeeded, after a little flapping of the wing and attempting to bite, in strangling him. He then tied him round his neck, and came down, a bloody victor, to the deck. The bird was an eagle of a darkish brown color, speckled with white, of beautiful plumage, but excessively lean, about two feet long, measuring from tip to tip of wing a little more than five feet.

Before giving any one a piece of your mind figure out whether you will have enough left to keep you going.

For Your Baby. The Signature of

Charles H. Fitcher

is the only guarantee that you have the
