Order of Publication.  
In the Circuit Court for the County of Shiawassee, in Chancery.  
OSCAR LA CLEAR  
vs.  
MAY L. LOOP  
JAMES N. MORRIDE  
WILLIS C. FOX  
WILLIAM J. BRASE  
Suit pending in the Circuit Court for the County of Shiawassee in chancery at the City of Corunna on the 20th day of March, A. D. 1907.  
In this case it appearing from affidavit on file, that the defendant, May L. Loop is not a resident of this state but resides at Cupertville, in the State of Washington, on motion of Kilpatrick & Pierpont, complainant's solicitors, it is ordered that the said defendant, May L. Loop, cause her appearance to be entered herein, within four months from the date of this order, and in case of her appearance that she cause her answer to the complainant's bill of complaint to be filed, and a copy thereof to be served on complainant's solicitors, within fifteen days after service on her of a copy of said bill, and notice of this order; and that in default thereof, said bill be taken as confessed by the said non-resident defendant.  
And it is further ordered, that within twenty days the said complainant cause a notice of this order to be published in the Owosso Times, a newspaper printed, published and circulating in said county, and that such publication be continued therein at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served on said non-resident defendant at least twenty days before the time above prescribed for her appearance.  
SELDEN S. MINER,  
Circuit Judge.

KILPATRICK & PIERPONT,  
Complainant's Solicitors.

## You Can Easily Operate This Typewriter Yourself

Don't worry you correspond.  
Don't write him anything by hand that takes him time to make out—that makes him in doubt—that he can't easily read.  
And don't fill out legal papers or card memos—or make out accounts or other things in your own handwriting.  
It looks bad, reflects on your standing, makes people think you can't afford a stenographer, and is sometimes ambiguous.  
You can write out your letters—make out an abstract—fill in and instructive policy—order your card memos—make out your accounts, or a hotel memo—do any kind of writing you need on any kind, size or thickness of paper, and space any way you want.

## The OLIVER Typewriter The Standard Visible Writer.

You can write any of these things yourself if you do not happen to have a stenographer.  
For you can easily learn, with a little practice, to write just as rapidly, and as perfectly, as an expert operator on the OLIVER. Because the OLIVER is the simplified type writer. And you can see every word you write. About 80 per cent more durable than any other typewriter, because it has about 80 per cent less wearing points than most other typewriters.  
80 per cent easier to write with than these other complicated, intricate machines that require "fingering"—technical knowledge—long practice and special skill to operate.  
These machines which cannot be adjusted to any special space—width which it is impossible to write contracts, insurance policies, or odd-sized documents except you buy expensive special attachments requiring experts to operate.  
You can adjust the OLIVER to any reasonable size and thickness of paper, right out to the very edge, without the aid of any expensive attachment or special skill, and your work will be neat, appealing, legible and clear.  
For the OLIVER is the typewriter for the doctor, the lawyer, the insurance agent, the merchant, the hotel proprietor—or any man who does his own writing.  
Write us now for our booklet on the simplified features of the OLIVER.  
The OLIVER Typewriter Co.,  
Wabash Ave. and Monroe St.,  
CHICAGO, ILL.

## KEEPING TAB ON THE WORLD

Limited Home Rule Scheme For Ireland Up—Boy Heir to Spanish Throne Born—Santo Domingo to Be America's Ward. Germany Refuses to Discuss Limitation of Armament.

## LEGAL-CRIMINAL

### Miner Haywood to the Bar.

In the Ada county courthouse at Boise City, Ida., May 9 William D. Haywood, secretary and treasurer of the Western Federation of Miners, was placed on trial as one of the three federation men charged with having conspired to cause the murder of the late ex-Governor Frank Steunenberg of Idaho Dec. 30, 1905. Judge Wood presiding, noted counsel contending on both sides and the entire country alive to the critical nature of the legal contest thus definitely begun after numerous preliminary motions and delays. Representatives of the press were on hand from every part of the nation, and the city was filling up with people attracted out of curiosity to the scene of the trial. In anticipation of possible trouble the authorities had surrounded all those connected with the trial with special guards, while the militia and two troops of regulars were held in readiness for the least sign of a disturbance. This was probably due to the numerous threats received by Governor Gooding from sympathizers with the accused. Special quarters had been taken for the jury, so as to keep it under constant guard, and a special order was issued by the mayor against street speaking during the progress of the trial.

Judge Wood on the previous day had denied the petition of counsel for the defense for a bill of particulars concerning the evidence to be advanced by the state in support of its charge of conspiracy. Lawyers Darrow, Richardson and Wilson, associated in the defense with Murphy, the official counsel of the Federation of Miners, argued for the petition on the ground that the defendant had a right to know before the trial what the nature of the evidence against him was, so that he might have an opportunity to prepare the evidence in rebuttal. The petition was opposed for the state by United States Senator Borah and Lawyers Fawley and Van Dusen. Commenting on the judge's decision after the first session of the court, Haywood said: "What does it matter? I am only a circumstance in the case anyhow. The cause at stake in this trial goes beyond me or a hundred like me; it is the fight of the laboring man against oppression." It was expected that the choosing of a jury would occupy many days, as it would be difficult to find men whom one side or the other could not successfully challenge on the score of having formed an opinion about the case.

### Black Handers Found Guilty.

Eleven of the thirteen men accused of being leaders of the Black Hand conspiracy in the Pennsylvania hard coal region for the purpose of extorting money from numerous persons by threats of violence were found guilty at Wilkesbarre. This is regarded as being only the beginning of a systematic campaign of the authorities for the extermination of this secret Italian order.

### Ohio in Line For Taft.

Recent developments at Cincinnati make probable the unanimous endorsement of Secretary Taft for president by the Republican party of Ohio. This was apparent from a statement issued by George B. Cox, the Hamilton county Republican leader, advising all Republicans to support Taft for president. Foraker re-election to the senate and Governor Harris to succeed himself. Commenting on this statement, Senator Foraker said that if the advice of Cox should meet with the approval of the Ohio Republicans, no one would support Secretary Taft for the presidency more cordially than he would. This was looked upon as Foraker's withdrawal from the presidential race and means that Burton is eliminated from the senatorial contest. Editor Taft, as the spokesman of Secretary Taft, said that Cox was evidently imbued with the ambition to add another name to the roll of presidents from Ohio and that this plan was satisfactory to his side. On the same day

## POLITICAL

### Chairman Brown of the state committee came out squarely for Taft, and it was regarded as certain that the committee would follow the advice of Cox.

### To Break Wisconsin Deadlock.

The first important change in the senatorial contest before the Wisconsin legislature occurred when former Speaker Lenroot, known as La Follette's real preference, although the senator openly endorsed Stephenson, withdrew from the contest, thus making an election possible at the next joint session.

### Baltimore's Democratic Mayor.

In the Baltimore city elections J. Barry Mahool, Democrat, was elected mayor over Timanus, the Republican candidate. Mahool's majority is about 2,500.

### Hughes Captures Organization.

Notwithstanding the rebuke administered to Governor Hughes by a coalition of Republicans and Democrats in the New York state senate the governor was able to regain complete control of his party in that body last week when the public utilities bill was introduced in exactly the shape that he wanted it. The agreement was reached in a conference of Republican senators, and it included the understanding that all of the measures desired by Governor Hughes, including the recount bill, ballot reform and investigation of state departments, shall be passed.

### New German Tariff Plan.

The new tariff agreement between the United States and Germany, which was drawn up by Secretary Root and Ambassador von Sternburg, to go into effect July 1, 1907, has been made public. It gives Germany the reductions of duty authorized on all the articles mentioned in the third section of the Dingley act. This amounts simply to the addition of champagnes and sparkling wines to the reduced rates list.

### Denying Third Term Rumors.

President Roosevelt has been kept pretty busy denying the various statements made by his friends looking toward his acceptance of a third nomination. To one Massachusetts caller who told the president that New England would insist upon his renomination the president replied: "Nonsense! If I were to accept a renomination after what I have said on the subject, I would be historically disgraced."

### Roosevelt Explains Further.

The committee of the New York Federated union returned from its call upon President Roosevelt with a formal letter from him repeating what he had written to the attorney general on March 25, 1906. In that letter the president said that they must see that exact justice was done the accused men, referring to Messrs. Moyer, Haywood and Pettibone. He said he would call upon the district attorney of Idaho for any information of unfairness in the conduct of the case, and on the other hand, he wanted to know whether there was any sign of miscarriage of justice in their favor, referring to the intemperate violence of the socialist and labor agitators. The president also says that if at any time any one can submit to him evidence showing miscarriage of justice he will bring such evidence to the attention of the attorney general and have him take action thereon.

## SCIENTIFIC

### Gyroscope Monorail Discovery.

Before a brilliant assemblage of scientists in London last week under the auspices of the Royal Society Louis Brennan, C. B., the well known inventor of the Brennan torpedo, gave a demonstration with a miniature railway car or locomotive running on a single rail with apparently nothing to balance it, it being the first practical application of the well known principle of the gyroscope to railway locomotion. It was a demonstration which foreshadowed another industrial revolution, according to those who saw it.

The car, propelled by a petrol electric generating set, ran about the hall, turned sharp corners at high speed, crossed a single strand wire cable in lieu of a bridge and climbed heavy inclines, all with perfect stability. Sometimes it was loaded and sometimes empty, but there was no attempt to balance the load, for the vehicle did that instantly and automatically. If the load was piled on one side that side rose in proportion to the burden and the empty side was depressed, maintaining its stability whether standing still or in motion.

This result was brought about by an automatic stability mechanism of extreme simplicity carried by the vehicle itself, consisting of two fly wheels rotated directly by electric motors in opposite directions at high velocity and mounted so that their gyroscopic action and stored up energy can be utilized. These fly wheels are so mounted on fine bearings and placed in exhausted cases, reducing air and journal friction to a minimum, that very little power is required to keep them in motion. If the current is cut off, they will run at velocity sufficient to impart stability to the vehicle for several hours and will not come to rest for two or three days. The mechanism occupies small space and is 5 per cent of the total load. The wheels are placed in a single row beneath the center of the car and are so made as to permit of horizontal and vertical curves in the track having less radius than the length of the vehicle itself, thus the car can run over crooked rails or uneven ground without danger of derailment. The motive power may be either steam, petrol, oil, gas or electricity. The vehicle will have the advantage of being always ready for use, the gyro wheels being kept in motion by a current from a small accumulator while the engine is at rest. Economy also results from making

### the vehicles wider in proportion to their length than the ordinary railway car, and the full sized cars will be twelve feet wide, but may be two or three times as wide. The rail is of curved top and only requires to be the same weight as the rails on an ordinary line, while the sleepers need be only one-half the usual length, and bridges are of the simplest possible construction. Expenditure of fuel will be considerably smaller, owing to the absence of flanged friction on curves and to the absence of lateral oscillation or jolting, and the speed can be two or three times that of the present system. The Indian government has now voted \$25,000 for the construction of a full sized vehicle, and the British war department will construct the necessary rail upon government land at Chatham, near the inventor's home, for future experiments.

### Hopeless Consumptives Killed.

Dr. S. A. Knopf, the famous New York tuberculosis specialist, who was decorated by Emperor William of Germany for his work in fighting the white plague and who received a prize of \$5,000 for the best treatise upon that disease, startled the national tuberculosis congress at Washington by advising that hopeless sufferers from tuberculosis be killed quickly and painlessly by heavy doses of morphine. He said it was his practice to do that, and he regarded it as a sacred duty that the end might come quickly and painlessly.

The committee on medication had made a report condemning the use of morphine and its compounds in these cases, and a bitter debate was in progress when Dr. Knopf spoke. Drs. Flick and Landis had approved the report, but favored using creosote in advanced cases. Knopf was opposed to the use of creosote, but said he did use heroin and cocaine, both of which contain morphine or cocaine.

One of the plans endorsed by the congress is to organize classes of consumptives among workmen and school children for home treatment instead of in hospitals and sanitariums. Dr. Fulton said the secret of the success of the home treatment was that not only the patient, but the entire family, learned the road to health, while the man who returns from a sanitarium usually cannot change his family's mode of life. Dr. Lowman urged the seclusion of consumptive school children in special classes, which so far as possible may be taught in the open air.

## COMMERCIAL

### Two Cent Fare Retaliation.

The first statement from the Pennsylvania lines west of Pittsburgh concerning the effect of the new two cent fare law on their business has just been issued on behalf of the Cleveland and Marietta, which is entirely in the state of Ohio. It shows that during 1906 the passengers carried increased 13 1/2 per cent and that the number of miles traveled increased 715,530, but that in spite of this the passenger earnings decreased \$4,399, or about 3 per cent. The report hints that before long the passenger service will have to be curtailed if the two cent rate remains.

### Ryan Finances Exposition.

The directors of the Jamestown exposition announced that all arrangements had been completed for the issuance of \$400,000 worth of bonds, it being generally understood that Thomas F. Ryan had agreed to lend the money. It is the intention of the directors to make the exposition buildings and grounds a permanent institution of some kind.

### More Harriman, Stock Issued.

Wall street was surprised to learn that the directors of the Union Pacific and Southern Pacific roads had authorized new issues of \$75,000,000 bonds for the former and \$26,000,000 of preferred stock for the latter. The bonds carry the right of conversion to common stock any time within three to five years and are to bear 4 per cent interest. The directors also ordered that dividends be paid quarterly hereafter. Mr. Harriman said the net earnings for the last fiscal year were \$44,057,000 on the Southern Pacific and \$32,465,000 on the Union Pacific.

### Drug Trust Enjoined.

The ninety-two drug firms comprising the so called trust were permanently enjoined from doing business by the federal circuit court at Indianapolis on complaint of the United States government.

### HE WON HIS CASE.

#### An Incident That Illustrates the Shrewdness of Ben Butler.

A number of years ago General Benjamin F. Butler was a guest of friends in Brooklyn. During his visit he noted the rule of the street railway companies compelling conductors to register fares as soon as passengers entered the cars and before the fares were actually collected. Two or three years afterward he represented the plaintiff in a damage suit for \$15,000 in which a Brooklyn street railway company was the defendant. The principal witness for the company was the conductor of the car on which the accident occurred, and his testimony was so strong as to make things look bad for Butler's client. But Butler recalled the unusual rule he had remarked years before, and on cross examination he said: "Your company requires you to ring up fares as soon as passengers enter the car, doesn't it?" "Yes." "Suppose a passenger boards your car and then finds he is on the wrong line. Do you state that fact to your superiors, and do they make allowance on your returns for that fare?" "No. I lose the nickel." "Do you mean to say the company won't take your word for 5 cents?" "No, they won't." "Yet," said the shrewd veteran, turning to the jury, "the company asks you to take this conductor's word for \$15,000."

Butler's client received a verdict—Brooklyn Eagle.

## HOW TO REPEL A DOG.

### Letter Carrier Had a Remedy For Vicious Curs.

"No one comes in contact with all sorts of dogs more than the letter carrier," said the man in gray as the interviewer trudged along beside him. "Take it outside the business districts and every other family has a dog. Many of them I pay no attention to, but about one out of five aches to get his teeth into my legs at first sight. It is a part of my duty to teach such curs a lifelong lesson." "Do you kick them?" was asked. "That would be foolish. I carry here in my side pocket about a quarter of a pound of dry fine cut tobacco. You see it is almost as fine as snuff. The dog that means to bite you won't come charging down with a roar. He sneaks up behind and gives a jump in. I am ready for it. Without seeming to be watching, I know where he is, and at the right moment he gets the tobacco dust in his eyes. Then there is a circus. That dog goes through such a performance as you never witnessed, and his owner, man or woman, indulges in all sorts of threats. I deliver the mail and say nothing and go on. The dog's eyes are sore for a fortnight, and if he afterward meets me on the street he will drop his tail and make a bolt for home. It's a lesson he never forgets, and I believe it also increases his owner's respect for Uncle Sam's uniform."—Chicago News.

## HE WON HIS CASE.

### How to Keep the Kitchen Cool and Comfortable in Mid-Summer.

Many a housewife is wondering how she will pass through the coming summer months with the stove she well knows will make the kitchen unbearably hot—to say nothing of the dirt, dust and ashes that will add to the discomfort.

There is a way out of it all—a way that not only lessens the work and keeps the kitchen cool, but that also reduces fuel expenses. This convenience, comfort and economy is all effected by the New Perfection Wick Blue Flame Oil Cook-Stove, an oil stove so superior to other makes that it is fast replacing the coal and wood range, the old fashioned oil stove, and in many cases the gas stove.

Anyone who has had to wait ten or fifteen minutes for the fire to get started will appreciate the New Perfection, which gives a strong working flame at moment of lighting. "Blue Flame" means the hottest and cleanest flame produced by any stove. The flame is always under immediate control and can be raised or lowered instantly. The convenience of this will be understood when it is considered that while the flame of one burner is boiling the kettle or roasting a large joint, that of another can be reduced to simmering point—in this way enabling the housewife to cook a variety of dishes at one time.

Then the comfort of it. While the flame of the New Perfection is intensely hot, yet the heat is not thrown off into the kitchen because it is concentrated by blue-enamelled chimneys.

On washing and ironing days the comfort and convenience of the New Perfection will be greatly appreciated. It gives best results in the least time, and does away with all coal and wood carrying and the many other disagreeable jobs that have to be done with other stoves. The New Perfection is made in three sizes, with one, two and three burners, and is warranted to give full satisfaction.

Another home comfort is the Rayo Lamp, which produces a light of unusual brightness, yet soft and mellow—a light that will not hurt the eyes. The Rayo Lamp can be used in any room, whether it be library, diningroom, parlor or bedroom. It is highly ornamental, being made of brass throughout and beautifully nickelled. Every lamp is warranted and makes a valuable and handsome addition to any home.

The New Perfection Wick Blue Flame Oil Cook-Stove and the Rayo Lamp are two real essentials to home comfort. Their easy operation, absolute safety and handsome appearance commend them wherever stoves and lamps are used.

### With one exception the candidates on the republican state ticket at the spring election received over 100,000 majority. Judge Carpenter led with a plurality of 112,000. The three constitutional amendments were adopted, the one relating to the teaching of mechanical trades in the state prisons by a vote of 167,163 to 84,831.

## A STEADY DRAIN

### Sick Kidneys Weaken the Whole Body—Make You Ill, Languid and Depressed.

Sick kidneys weaken the body through the continual drainage of life-giving albumen from the blood into the urine, and the substitution of poisonous uric acid that goes broadcast through the system, sowing the seeds of disease. Loss of albumen causes weakness, languor, depression. Uric poisoning causes rheumatic pain, nervousness, nausea, cricks in the back, gravel, and kidney stones. The proper treatment is a kidney treatment, and the best remedy is Doan's Kidney Pills. Great Owosso cures prove it.

Mrs. James Helt, living at 1111 Mary St., Owosso, Mich., says: "We have used Doan's Kidney Pills in our family for over ten years and they have always given entire satisfaction. While living in Huntington, W. Va., my husband suffered an attack of Typhoid Fever, and when he recovered, found that his kidneys had been affected as the result. He suffered terribly with his back, the pains at times extending to his shoulder blades and the back of his head. The secretions from the kidneys were mucous, too frequent, highly colored, and contained sediment. After moving here, he procured Doan's Kidney Pills and they were the first remedy that ever gave him any benefit. Mr. Helt feels that he could not get along without Doan's Kidney Pills. I have used them myself for backache and the results have been very satisfactory. We are both strong advocates of Doan's Kidney Pills."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, Sole Agents for the United States.

Remember the name—Doan's—and take no other.
