GET BETTER SIRE EMBLEMS

Oldham County, Kentucky, Live Stock Owners Given 46 Certificates in One Day.

In one day recently the United States Department of Agriculture issued 46 emblems of recognition to live stock owners in Oldham county, Ky., who are now using purebred sires exclusively for all classes of live stock kept.

This county has eradicated scrub sires from about half of the territory in the county, according to a report received from Wayland Rhoads, extension specialist of the Kentucky Agricultural college.

Wayne county, Ky., likewise is active in replacing scrub sires with good purebreds. The department recently issued "better-sires" emblems to 44 Wayne county stock owners. Bull sales are being held by local breeders in both counties to bring about a wider distribution of good purebred bulls.

INITIAL SEASON OF CLOVER

It May Be Pastured From Middle to Close, but Not Too Close—Cure Hay in Shock.

The growth produced the first season by sweet clover is similar in quality to alfalfa. It may be pastured from the middle of the season to the close, but should not be pastured so close as to injure the plants. The growth the second season is much coarser and if used for hay should be cut before it reaches a height of 30 inches. A high stubble should be left as the second growth starts from buds on the cut-over stems. If cut too close to the ground, no second growth will be produced. The hay should be cured in the windrow or shock to prevent the loss of leaves and too rapid curing.

SHEEP DESTROY MANY WEEDS

Animals Devour Noxious Plants in Pastures, Grain Fields and Clear Fence Rows.

Sheep eat more weeds than any other class of live stock, except goats. Sheep will eat ninety per cent of all troublesome weeds. They will destroy weeds in pastures, in grain fields and corn fields after harvesting, and clear the fence rows. However, sheep are not such scavengers that they can thrive on refuse and weeds alone. In order to get sheep to eat leaves of shrubs, the tenderer grasses must be scarce. Goats are better adapted to clearing brush land than are sheep. Some farmers consider sheep necessary just as a means of controlling weeds.

PUT TREES ON WASTE SPOTS

Conditions Demand That All Land Should Produce Something—Trees Are Favored.

Modern conditions demand that all the wastes and leaks be eliminated and this means that all the land should produce something. It is not always possible to make every portion of the farm area yield annual crops but in such cases one may wisely and profitably try trees. If one-twentieth of each farm tract were set aside for forestry, in time there would be timber to spare.

A great many cliffs and hillsides along our many rivers and streams are fit for little else, and hill land that is very stony may be planted to post-timber trees with much profit. Black locust and catalpa are the most profitable for posts, the locust being given the preference on account of its manner of growth being smoother and the quality of timber the very best.

CARING FOR TOMATO PLANTS

Four or Five-Foot Stake Should Be Driven Alongside Each Vine When Soil is Soft.

Secure a four or five foot stake for each tomato plant and be ready so the stakes can be driven down by each plant when the ground is soft. If the tomatoes are to be trellised similar to grapes, secure posts and two wires for each row.

Later Garden Planting. Later garden vegetables require less work and less anxiety, as a rule, than early vegetables. The soil should be neither too hard to prepare nor should it be so slow to germinate and start growing the plants as early plantings.

PROCEEDINGS OF THE COMMISSION

(Official)
Owosso, Mich., June 3, 1922.
Special session, July 1, 1922.
Owosso, Mich., July 1, 1922.
Special meeting of the Commission, Mayor Wright presiding.
Members present—Rosevear, Stebbins and Wright.
All members waived formal notice of special meeting.
The minutes of the regular meeting of June 16 were read and approved.

PETITIONS

The following petition was presented and read to the Commission, and referred to the Commissioner of Public Improvements:

Petition No. 12.
Owosso, Mich., June 27, 1922.
To the Commission of the City of Owosso, Gentlemen:
We, the undersigned, residents of Ridge St. between Watson Street and Michigan Avenue, hereby petition for the closing of said street between the streets named during the season of 1922. We hereby severally agree to reimburse the City of Owosso for the expense of closing at the close of the season, and in default of payment that the amount may be placed as a special assessment upon our property located in said closing district.
Signed, Gus Zimmerman and 18 others.

MARY BARTLETT DIES SUNDAY

Funeral Held at the Home Tuesday Morning by H. A. Waite

The death of Mrs. Mary Bartlett who died Sunday afternoon at her home 529 East Main street was a decided shock to her many friends. It was known that she had been in poor health for some time but during the last two or three days her condition had been considerably improved.

Mary Beattie Bartlett was born in Cayuga county, New York, May 16, 1834, and removed to Michigan with her parents some years later. She was married to James L. Bartlett, September 25, 1849, at Bennington. Mr. Bartlett preceded her in death 32 years ago. To this union seven children were born, one daughter dying at birth, and another daughter (Mrs. Harry Goss, dying in 1906. The surviving children are Samuel, of Maple River; George, of Owosso; Duane of Portland, Oregon; Mrs. Nettie Seeds, and Miss Nellie Bartlett, who resided with their mother. One brother, Davis C. Beattie of this city also is left.

The funeral was held at the home at 10:00 o'clock Tuesday morning, Rev. H. A. Waite officiating.

GROCERY

Easily clearing now \$400.00 per month, very easy to run, located in the very best part of the city on busy street. No competition within half mile, daily sales over \$300.00. Total operating expense less than 5 per cent, due to low rent, no credit or delivery. Modern up-to-date fixtures and large, clean fast moving stock. Total will run about \$5,000.00 cash. Can lease store or buy building at low price. For full particulars, address owner, Post Office Box 140, Saginaw, Michigan. No dealers or agents need answer.

NOTICE

National Detective Agency, Hall block, room 9, phone 430. If in trouble, try us. N. W. Bradd, manager. Let us collect your overdue accounts. No collections, no charges. R. 9, Hall block, phone 430.

SOY BEANS FIT IN ROTATION

Take Place of Oats and Are More Profitable as Cash Crop—Of Benefit to Soil.

Soy beans fit perfectly in rotation in the place of oats, making a four year rotation corn, soy beans, wheat, clover, they being more profitable than oats as a cash crop, and leaving the soil in much better shape, both as to mechanical condition and fertility, as little or no preparation for wheat is needed on land from which a crop of well cultivated soys has been mowed.
