BUMPER CROP IN NORTHWEST EXPECTED

O-W. R. & N. Officials Look For Increased Grain Next Season.
Following a survey of the crop situation in the grain belt east of the Cascade Mountains tributary to its lines, the O-W. R. & N. Traffic Department finds need for advising farmers as to how to proceed with planting. The unfavorable season, so far, for Fall sown grain gives point to the suggestions.
Traffic Manager Miller and "Farmer" Smith have gone over the situation carefully and they believe that in view of the high price for cereals of all kinds and the probability of heavy demand the coming season, wheatgrowers will get best results if they follow the course outlined.
"There are two situations confronting the farmer," says Mr. Miller. "One is the possible necessity for reseeding in the Spring and the other is the advisability for Spring seeding of land that otherwise would be in Summer fallow. All indications point to the fact that the year 1915 will see a demand for all forms of cereals in excess of the supply, and therefore it is probable we will have the largest acreage of Fall and Spring sown grain in the history of the Northwest.
"Farmers who have retained enough seed for either reseeding in Spring or Spring seeding in Summer fallow are fortunate considering the present price of wheat.
"The exceptionally high price for wheat will mean correspondingly high prices for all classes of feed, and farmers should grow as much corn as possible, as with proper selected seed and careful tillage of the ground corn will produce more stock feed than any other plant, and it has been demonstrated that with acclimated seed, corn can be grown successfully in all parts of the Pacific Northwest."
Ships Cattle to Portland.
