MERZ DAIRY SUPPLY COMPANY, SEATTLE.

This investment gives assurance of big profits and entails no risk. With the investment of a few hundred dollars you get a splendid income for life by purchasing treasury stock in the

CROWN POINT MINING COMPANY

while it can be bought at 40c per share. This company's remarkable copper property has been estimated by disinterested mining experts to be worth Fifty Million Dollars, and all mining men of vast experience admit they never before have seen a copper property its equal. Capitalization only 1,000,000 shares.

This company also owns the famous Molybdenite Mine—conceded by all users of Molybdenite to be the purest ore of the kind obtainable, and nowhere else in the world has it been mined in such large quantities. Both mines situated in Chelan county, Washington.

Why, then, does this company sell stock, and so cheap? A small block will be sold to keep the development work going until the railroad now being built is finished, when we shall ship our ore and pay regular dividends. As a substantial investment it cannot be duplicated.

Do not underestimate the importance of this, but write or call at once for prospectus and further information.

O. R. DAHL, Secretary,

P. O. Box. 187.

Office, 528 N. Y. Block, Seattle, Wash.
