

NEW DAIRY RECORD

The Guernsey cow "May Rilma 22761," owned and bred by Capt. E. B. Cassatt, at his famous Chesterbrook Farm, Berwyn, Pa., has just completed her official year's work.

The making of large records and the possibilities of the dairy cow to yield maximum results at the pail is a matter of more than passing interest to her owners. The producer wishes to know the cost of production and if his margin of profit is being increased under better methods. The consumer also, regardless of all breed questions, hopes it may mean to him better and cheaper milk, for he it is who in the end pays the bill. Whether it is a Guernsey, Holstein or a Jersey that holds the pennant for production simply shows which breed is making the most progress along scientific lines and showing results. The name of the cow, the breed she represents and her wonderful record, should be known by all as a matter of dairy history.

May Rilma produced in 365 days from May 1, 1913 to May 1, 1914, 19673 pounds milk and 1073.41 pounds butterfat; nearly 10 tons of milk and the equivalent of 1260 pounds of butter.

Her work has been carefully supervised under the Advanced Register regulations of The American Guernsey Cattle Club, whose headquarters are at Peterborough, N. H. Pennsylvania Experiment Station officials have conducted the regular tests throughout the year; seven outside institutions from as many noted dairy states, and a member of the Dairy Division of the United States Department of Agriculture, have sent representatives to conduct tests for the club and

study the work of this wonderful cow. No record has been more carefully watched.

Albert Van Tuinen, who as dairyman, has had immediate care of May Rilma, has shown great skill in handling and feeding to obtain results.

Chesterbrook Farm milk r. tails for 12 cents per quart, and this cow shows a gross earning capacity of nearly \$1200 for one year, an income equal to that of many men.

PUGET SOUND HERD SALES

Made during the last few months consisting of five young bulls and six females, three young cows and three heifers.

Wm. Rudolf of Yamhill, Oregon, purchased a yearling bull "Sir Inyo Johanna," his sire is a full brother to the world's record milk cow, "Margie Newman." His dam is a 13.3 daughter of the great imported bull Kael Bos whose dam and granddam holds the two largest records made in Holland.

C. E. Lewis, of Seattle, a bull one year old which is sired by Quirinus Cornucopia whose dam has a record of 30.7 pounds butter in seven days. The dam of this young bull is a heifer with a record made at the age of two years of 15.7 pounds butter in seven days. She is also a sister to Hazelwood Aaggie De Kol who has a record of over 34 pounds butter in seven days.

Hugh Nisbit of Chimacum, Wash., purchased the fine young cow Cascade Violet Cornucopia 2nd. She is soon due to freshen and has every indication of making a good record.

J. D. Gay, of Port Townsend, Wash., bought the young bull calf from a good producing daughter of Karel Bos sired by Violet Blossom

Gentlemen:

We have made a thorough test of your Molasses Feed and find that it is all that is claimed of it. Since we commenced feeding it we have had a marked increase in our Milk Production and find that the stock are doing well on it.

We are enclosing herewith our order No. 76 for 20 tons of your Molasses Feed and trust you can make shipment at an early date. Kindly acknowledge receipt of the enclosed order.

Yours very truly,

(Signed) ATTALIA DAIRY PRODUCTS CO.
By C. K. Bowen,
Ass't Treasurer.

An unsolicited testimonial.

How to Produce Clean Milk Profitably

With our high-priced farm labor, high-priced land and high-priced feed, it becomes necessary to bring the EFFICIENCY of farm labor up to the highest point possible.

Also it is difficult to make any money in the dairy business unless you get the largest amount of CLEAN milk at the least cost to you. CLEAN MILK brings the high price.

You can neither secure the highest efficiency out of your farm help nor the CLEAN, wholesome milk that brings the good prices unless you install a good milker like

THE B-L-K MILKER

Haven't you had a sufficient amount of trouble with men milkers quitting at the wrong time or complaining about this thing and the other, to be willing to be shown what this mechanical milker will do?

We recommend the B-L-K MILKER as the one you want and the one that will make money for you and with less trouble if you milk twenty-five or more cows.

Sir Fayne whose 15 nearest dams have records averaging over 25 pounds butter in seven days.

John C. Burnam, of Snohomish, Wash., got the large well built young cow "Aaggie Cornucopia Marie De Kol." She has an official record made at three years of age of over 18 pounds butter in seven days. She is a granddaughter of Aaggie Cornucopia Johanna Lad who has almost 100 A. R. O. daughters.

George Ford, of Elma, Wash., got a young bull 10 months old. An extra fine individual and his breeding is hard to beat.

Herman H. Kuenzi, of Silverton, Oregon, has made two different purchases during the last five years returned again and selected three young heifers to add to his already fine herd of Holsteins.

H. L. Hansen, of Port Townsend, Wash., who has a small herd of Holsteins purchased the fine young cow "Ononis Lady May." She has a good A. R. O. record.

Wm. Cook, of Ludlow, Wash., purchased a fine well bred bull "Sir Inyo Korndyke." He is sired by a full brother of the world's record milk cow, "Margie Newman." His dam is a prize winning young cow with a two year old record of 19.04 pounds butter in seven days.

THE BEAN CROP

A subscriber in Jefferson, Oregon, writes and desires to know what an average crop of beans per acre should be.

The last statistics show that in the United States in 1911 there were 784,

500 acres of beans grown, producing a crop of 11,145,000 bushels. This would be an average of about 14½ bushels to the acre.

WARNING

Homesteads in Western Canada
160 Acres of Excellent Agricultural Land
Free on Payment of \$10 Entrance Fee

The Canadian government has an authorized agent, Jas. N. Grieve, located cor. 1st and Post Sts., Spokane, Wash., for the purpose of giving information free regarding the districts in the Provinces of Manitoba, Saskatchewan, Alberta and British Columbia, and localities where homesteads are to be had. There is no necessity to pay anything more than \$10 entrance fee when you appear at the land agency of the government in Western Canada to make entry.

Warning is hereby given that none other than Mr. Grieve or those authorized by him is permitted to grant certificates for reduced rates on the railways.

Information is absolutely free. Beware of those who ask money for this information.
