All accomplishments are unavailing if a woman suffers from ill-health in a womanly way. The special weakness peculiar to the womanly organism, will rapidly wreck the general health. The sufferer will lose her natural vivacity, her wit, her good looks, and the ambition and power to display the accomplishments at her command. Any woman affected in this way should resort to Dr. Pierce's Favorite Prescription. It is a wonderful medicine for alling women. It is the invention of an eminent and skillful physician, Dr. R. V. Pierce, for thirty years chief consulting physician to the invalids. N. Y. It aims to cure but one class of diseases, and claims to be good for nothing else. Newton of Hartford, Conn. "Mr. Holden was a Vermonter by birth. ut removed to this city just prior to the opening of the civil war, and has lived here constantly since that time. That same year Mr. Holden opened the New England tea store, where tea, coffee and spices were sold exclusively. Mr. Holden roasted all of the coffee he sold himself; and soon his store gained quite a reputation. He has been retired from business

for a number of years. 'In religious belief Mr. Holden was a Congregationalist; and, shortly after com-ing here, joined the Old South church, and for many years served as one of its deacons. Ten years ago Mr. Holden and his wife celebrated their golden wedding, an occasion that was made an important event by the people of the church.

Mr. Holden's father was Forbes Holden, and his mother was a daughter of Parson Taylor, Newfane's first minister, who was a Harvard graduate, and was settled over the church on the hill in 1774. Butter Talk

The fact that the quality of Butter marketed to-day largely depends upon the grade of salt used admits of no argument.

Two qualifications in Dairy Salt are indispen-

- 1st. Absolute purity, which insures good flavor and keeping qualities.
- 2d. Quickness in dissolving, insuring a perfect distribution with a minimum amount of working.

The fact that all the prize butter made in Maine, New Hampshire, Vermont, and Connecticut last year was salted with Worcester Salt, and that 90 per cent of the creamery and dairy men in New England use nothing but Worcester, proves beyond a doubt that Worcester is the Standard of Dairy Salt, and embodies the above indispensable qualifications.
