DE LAVAL CREAM SEPARATORS ARE SO MUCH BETTER THAN OTHER CREAM SEPARATORS

BECAUSE--They are constructed under many all-important patents, which cannot be used by any other manufacturer and which enable De Laval machines to skim cleaner and produce a more even and more thoroughly churnable cream than is otherwise possible, at much less speed and wear, and with much greater ease of operation.

BECAUSE--The De Laval makers have ever been first and foremost in the manufacture of Cream Separators throughout the world--have ever led where others follow--their factories being among the finest machine shops in the world and their knowledge of Cream Separators far greater and more thorough than that of any comparatively inexperienced would-be competitor.

BECAUSE--The one purpose of the De Laval makers has ever been the production of the very best Cream Separator possible regardless of cost, instead of that mistaken "cheapness" which is the only basis upon which any would-be competitor can even make pretence of seeking a market.

BECAUSE--The vastly greater sale of De Laval machines--ten times all others combined--enables the De Laval makers to do these things and much more in the production of the perfect Cream Separator that no one else could attempt.

A De Laval catalogue explaining in detail the facts here set forth may be had for the asking.

Young Plants

Every farmer knows that some plants grow better than others. Soil may be the same and seed may seem the same but some plants are weak and others strong. And that's the way with children. They are like young plants. Same food, same home, same care but some grow big and strong while others stay small and weak.
