OPTOMETRISTS
97 Main Street Brattleboro, Vt.

God never would send you the darkness
If He thought you could bear the light.
That you would not cling to His guiding
hand
If the way was always bright
And you would not care to walk by faith
Could you always walk by sight.
So He sends you the blinding darkness
And the furnace of sevenfold heat;
'Tis the only way, believe me,
To keep you close to His feet.
For it is always so easy to wander
When our lives are glad and sweet.
Then nestle your hand in your Father's
And sing, if you can, as you go.
Your song may cheer someone behind you
Whose courage is ebbing low.
And, well, if your lips do quiver,
God loves you better so.

While coasting near his home in Spring-

of E. A. Herrick, ran against a post and

life.

The expense of the Congregational

George L. Munn of Springfield, Mass.,
gave an instructive lecture entitled
"When houses are kept," under the
auspices of the Civic Improvement
league. Mr. Munn portrayed realistic

convenient the arrangement of a house

The annual banquet of class No. 7,
of the Baptist Bible school is always look-
ed forward to by the members with great
interest, and this year no exception
to the rule that enthusiasm and good
fellowship are always found there.

The tables were actually weighted with
good things furnished by the ladies.
Hospitality committees, with whom ar-
rangements were made this year instead
of a caterer. Chicken-pie, quiche, ome-
lette, cakes and coffee, in profusion,
made the problem a serious one when
the class with guests filled into the dining
room.

Stern resolution was in the faces of all,
however, and the determination to con-
quer or die in the attempt was evidenced
by all. But while the battle was being
fought, there were still words to con-
quer when they arose from the tables
and adjourned to the pleasant parlor for
their feast of reason and bowl of soul.

It was apparent from the responses
made by one after another that fun and
games were not so much on their minds
this year as right down hard work.

The greetings from the Bible class of
the Congregational Brotherhood were
brought by Arthur Clark, who delighted
all by his clear statement as to their
aims.

words made a deep impression and can hardly
fail to bring things to pass.

Other speakers during the evening
were Messrs. Maynard, Knight, Morse,
Wilson, Gehring, Duggett, Coburn, Perry
and the long-time teacher of the class,
Mr. Hawley.

A new color contest is to run to Easter
time, captained by Holland White for the
Reds and George Whitney for the Blues.

held; special emphasis for a few weeks is

and many other live topics were discussed
with future action in mind.

president; Roy Gracey, vice president;
Milton Powers, secretary; Clarence Mer-
rell, treasurer, and L. W. Hawley, teacher.

Streeter's Vaudeville and Motion Pictures.
Streeter's refined vaudeville and high-
class motion pictures are slated for a
return date at the Auditorium, Feb. 2
and 4 with daily matinees. Evening per-
formances will begin at 8:15. There are
many surprises in store that will be an-
nounced later.

Mr. Streeter really needs no in-
troduction to Brattleboro audiences hav-
ing appeared here last November with
an excellent program. The vaudeville popu-
lar most generally. With the return of
the Streeter attraction no pains or
expense will be spared in making the bill
highly attractive to young and old. The
motion pictures will be of the select
class dealing with educational, travel
and plenty of comedy.

The Streeter vaudeville troupe mem-
bers will likewise be clean and free from
any possible suggestions, making all in
all a good clean show perfectly safe
for the most critical minds. The public
are most cordially invited to watch for
our coming announcements which will
show us to be a well equipped attrac-
tion and it is believed that the quality
of this show will pack the house
every night.

Good Health Resolutions.
Resolution number one: I will try to
become more intelligent concerning my
body, says Doctor Jean Williams in
Woman's Home Companion for January.
looking with great respect upon my
physical resources and trying to realize
more fully that upon them the force and
success of my life largely depend.

Resolution number two: I will arrange,
if possible, to supply sufficient pure air
for every breath I take, thus better to
combat every source of disease that
might attack me to improve my chance
for long life and to increase my effi-
ciency.

Resolution number three: I will be
kind to my digestive organs, avoiding
all excess and not asking them to strug-
gle with food for which they have not
readily shown a capacity.

Resolution number four: I will treat
my brain and nervous system with great-
est consideration, and lift-six hours of
each week shall be devoted to sleep.

Resolution number five: I will try to
do in eight hours as much hard work as
I should do in one day.

Resolution number six: I will devote
at least two of the twenty-four hours to
such exercises as I find most beneficial.

Resolution number seven: I will give
my moral support to every effort, public
or private, in behalf of the betterment
of health conditions, so becoming a small
factor in the great movement for moral
and physical uplift.

dairymaid?—Because she took a little

Why are boys and their friends?—Be-
cause when they bore you you can shut
them up without giving offense.

FORESTRY IN VERMONT.
At the session of the Vermont Legisla-
ture of 1908 laws were passed creating a
State Forestry Department. As it was a
piece of legislation having the hearty ap-
proval of the people of the state, the de-
partment came into being strong and full
pledged in its every essential detail. The
state authorities looked about for a de-
partment head and found him in Professor
Austin F. Hayes, of Connecticut, who
knew how to scale a log, to measure a
pile of wood and thin out a young growth
of trees.

Once installed as State Forester, Pro-
fessor Hayes, well backed by the state
authorities, began the work of providing
the means for forest tree planting, for
demonstration work in the care and cutting
of woodlands and in all else pertaining
to the subject. To increase the efficiency
of the department the state early in 1909
bought a tract of forest land in the town
of Plainfield, near Montpelier, and placed
this in the care of the State Forestry
Department. Scarcely had work begun in
Plainfield tract when the state received a
gift of an estate in the town of Sharon
for forestry work and experimentation for
demonstration in apple orchards and for
experimental vegetable growing; this last under the direction
of the Department of Horticulture of the
State Agricultural College.

The gift was absolutely without condi-
tion, requirement or exaction, and was
promptly accepted by the state and was
supplied by the state for the forestry de-
partment. The opening of spring of 1910 saw
the plans for its workings set in operation,
and already these have attained to the
best possible growth.

The donor of the estate was Charles
Downer, a native son of Sharon
