

Cut the Cost of Fuel

The New Perfection Oil Cook Stove is a real money-saver. It uses fuel only when you want a fire for cooking. The moment the match is applied, you can have intense heat for fast cooking and boiling, or a low flame for simmering.

Not a drop of oil is wasted, for the long blue chimney provides the necessary draft for perfect and complete combustion, and at the same time drives all the heat directly against the cooking utensil.

3,000,000 users of New Perfection Oil Cook Stoves are independent of coal, wood and ashes. They come in 1, 2, 3 and 4-burner sizes.

For your further convenience—the New Perfection Water Heater furnishes hot running water at a very moderate cost. Ask your dealer.
