WHY "No. 9" WARE HEELER & WILSON'S No. 9

SEWING MACHINES
POPULAR?
BECAUSE LADIES
BUY THEM LIKE THEM
AND TELL THEIR FRIENDS.

Many ladies have used our machines twenty to thirty years in their family work and are still using the original machine we furnished them a generation ago. Many of our machines have run more than twenty years without repairs, other than needles. With proper care they never wear out, and seldom need repair. We have built sewing machines for more than forty years and have constantly improved them. We build our machines on honor, and they are recognized everywhere as the most accurately fitted and finely finished sewing machines in the world. Our latest, the "No. 9," is the result of our long experience. In competition with the leading machines of the world, it received the Grand Prize at the Paris Exposition of 1889, as the best of other machines receiving only complimentary medals of gold, silver and bronze. The Grand Prize was what all sought for, and our machine was awarded it.

Send for our illustrated catalogue. We want dealers in all unoccupied territory.

WITHOUT THE
Non-pull-out
BOW (RING)

It is easy to steal or ring watches from the pocket. The thief gets the watch in one hand, the chain in the other and gives a short, quick jerk—the ring slips off the watch stem, and away goes the watch, leaving the victim only the chain.

This idea stopped that little game:
The bow has a groove on each end. A collar runs down inside the pendant (stem) and fits into the grooves, firmly locking the bow to the pendant, so that it cannot be pulled or twisted off.

Sold by all watch dealers, without cost, on Jas. Boss Filled and other cases containing this trade mark—
A watch case opener sent free on request.
