# WITHOUT THE Non-pull-out BOW (RING)

It is easy to steal or ring watches from the pocket. The thief gets the watch in one hand, the chain in the other and gives a short, quick jerk—the ring slips off the watch stem, and away goes the watch, leaving the victim only the chain.

This idea stopped that little game!

The bow has a groove on each end. A coil runs down inside the pendant (stem) and fits into the groove, firmly locking the bow to the pendant, so that it cannot be pulled or twisted off.

Sold by all watch dealers, without cost, on Jas. Boss Filled and other cases containing this trade mark—A watch case opener sent free on request.
