BETTER THAN LATH

SACKETT PLASTER BOARD

is the most satisfactory base for plastering ever invented. It's a perfect Sound Dealer, Fire Retardant, and a big Fuel Saver.

THOUSANDS OF SATISFIED USERS

who have tested it in every class of building from Cottage to Mansion, are the best proofs of the merits of this material.

SACKETT PLASTER BOARD

is constructed of alternate layers of strong wool felt and stucco rolled into sheets 32x36 inches. These sheets are nailed direct to the studding in less than one-half the time required for lathing, and form a hard, smooth surface to which the plaster adheres perfectly.

SACKETT PLASTER BOARD

will not warp or buckle and when used the wall dries quicker, is firm and hard and practically fireproof.

There's a place for Sackett Plaster Board in every building, and he is a wise man who investigates before specifying other material in his contracts.

We will show you the Board and explain its advantages if you will call or write us.
