While in Port Huron last Saturday the publisher of the Expositor, in company with the other newspaper men of the county, were shown through the Port Huron Construction Co's plant by F. T. Moore and Mr. Jenks. Here we saw castings in the rough put through the different finishing processes and assembled into a perfect automobile gasoline engine, tested and ready for use. This is a new industry for Port Huron and employs a large number of workmen. If more such institutions were encouraged to locate in Port Huron instead of granting so many licenses to saloons, the slogan "You'll like Port Huron" would be more appropriate.

A Hardwood Floor of any Color
You may Choose for \$2.50

Floors which are in too poor condition to be improved with varnish alone can be made to imitate a genuine hardwood floor with this new patented Graining System.

This process does not require the services of a professional wood finisher.

The Graining Tool takes the place of skill and can be successfully used by the inexperienced man or woman, thus making it possible for any one at a very slight expense to enjoy the luxury of a new hardwood floor.

This Graining Compound when protected by one or two coats of Chi-Namel produces a surface that will out-wear any ordinary varnished floor, many times over.
