WANTS IT ALL

Head of Cleaners Would Make Himself Monarch.

Grant Slocum, the daddy of the Cleaners, who is said to indirectly get from \$20,000 to \$30,000 a year for presiding over the destinies of the farmers of Michigan and who throws in for extra measure a lot of weeping and wailing over the servile and downtrodden condition of his wards, has broken out again about sugar beets. The Caro Advertiser has this to say about Slocum's latest:

"Over his personal signature in the October Gleaner Grant Slocum denounces the manufacturers of sugar, charges them with paying the farmer an unprofitable price for beets, charges the manufacturers with compelling farmers to rob their soil in the interest of the manufacturers and offers to lead a movement to demand a higher price for beets or refuse to raise that crop in 1912.

He then offers to furnish \$250,000 toward the capitalization of a co-operative sugar company, declaring he can get 5,000 farmers to take \$100 in stock; and another 5,000 to take \$50 the \$1,000,000 thus raised would build and equip a factory to "break the chains of the sugar trust."

Such a statement of conditions will be news to hundreds of farmers in Tuscola county who have paid mortgages, built houses, barns, silos, drained and otherwise improved their farms from the beet crop.

Some of them remember that less than ten years ago stock in the Caro sugar factory went begging in the market at ten to fifteen cents on the dollar for common, and that it is only since the organization of the Michigan Sugar Co., that the business has been profitable. Unfortunately it requires more than securing subscriptions to the capital stock, and building and equipping a factory to pay dividends, as stockholders in the Gleaner Co-operative Union can testify.

Every farmer knows that the management of a farm has more to do with the quality of the soil, and that a good farmer will make a living on poor land where a poor manager will be unable to stay on a good farm. Even so in the manufacturing business or general trade.

Co-operative business enterprises are ideal in theory, but successful ones are without exception either newly organized or are to be found only in some distant state or foreign country.

Woman's Voice.

"When the day of woman's rights has fully come," said a man with the voice of a demon, "she may insist upon singing blues and baritone and leave the organ and contralto parts of music to be executed by the masculine portion of the community."

"Why?" he was asked.

"Well, this is the inference I draw from a little incident that happened at a woman's suffrage meeting I recently attended: The meeting was opened by a worthy woman, who started to read some resolutions, but as the noise from the street almost drowned her strong voice she requested that the windows at the rear of the room be closed. Instead of carrying out her wish I volunteered to read the resolution for her.

"No," she replied, "I have got as strong a voice as you have! Excuse me," she added, "if I speak roughly, but the assumption of man that he has a voice that can reach further than a woman's is—well, it is one of the assumptions, that's all."

Grandfather at Thirty-five.

V. H. Bryson of Spencer, it is believed, holds the record as the youngest grandfather in the state, his age being only thirty-five years. He was married when fourteen years of age, his wife being only thirteen. His oldest son was married at the age of seventeen and at the age of eighteen presented to the elder Bryson a grandson.—Watkins Chronicle.

"Yiddish."

"Yiddish," properly speaking, is not a language. It is a mixture of poor German, worse Hebrew and in Russia has some Russian words added. It has, however, a considerable literature, including a large number of newspapers and other periodicals, and is used colloquially by Russian, Polish and Hungarian Jews. In the United States it is spoken by more or less recent immigrants only, their children absolutely refusing to use it, and their attempts to make them do so is the chief cause of the disagreement between them which the parents so bitterly complain of.—American Israelite.

A Soldier's Reply.

A soldier of Marshal Saxe's army, being discovered in a theft, was condemned to be hanged. What he had stolen might be worth 5 shillings. The marshal, meeting him as he was being led to execution, said to him, "What a miserable fool you were to risk your life for 5 shillings!" "General," replied the soldier, "I have risked it every day for my pay, fivepence." This reprieve saved his life.

The Best He Could Do.

"Now, gentlemen," said the stage manager at rehearsal, "I want you all to wear your heavy overcoats in this scene, as it is supposed to be an extremely chilly night."

"I have no overcoat, sir," replied one of the actors. "Then a bright thought struck him. 'But I could put on my heavy underwear.'—Boston Transcript.

How Could He Forget?

THE "BUSINESS END"

OF A STOVE IS THE FIREPOT

THE "ART GARLAND" FIREPOT "DOES THE BUSINESS."

IT'S THE easiest thing in the world to make a firepot WRONG—so easy that you'll find most all of them wrong—wrong construction—wrong principle.

For 70 years there has been no improvement on the actual "BUSINESS END" of a stove until this two-piece revolving firepot was placed in

"GARLANDS"

LOOK AT IT!

NOTICE IT'S MADE IN TWO PIECES---

That's to allow the air to pass into the fire instead of all coming in at the bottom.

HOT FIRE WHERE YOU WANT IT---

At the outside edge instead of the middle, where you get little radiation from it.

THE LOWER PIECE REVOLVES---

Just put the crank on, give it a turn, and the firepot is as clean as a whistle.

NO POKING—NO FUSSING—NO MUSS—NO DUST—WILL SAVE YOU A TON OF COAL EVERY YEAR YOU USE IT.
