The girls teacher, Pearl Bright, and also Marjorie Menzies, were guests of honor.

Farming has this peculiarity that it can absorb and supply much knowledge. Not one of the sciences but is related, or may be related to agriculture. Botany, rightly understood, is the art of growing better potatoes, beans and corn. Entomology is that economic science that discusses what bugs are of use to man, and what are injurious. Geology is an analysis of the earth and the rocks that underlie the soils for the purpose of making them more available for human welfare.

See It Hear It

—Then You'll Want It

You'll pass our store today or tomorrow. In the window you will see the Columbia Grafonola, a beautifully finished and scientifically designed instrument. Step inside and ask to play any record you wish on the Columbia Grafonola.

Then you will hear reproductions of exactly what the artists themselves produced on the original wax—nothing more and nothing less. The straight metal one-piece tone arm allows the music to develop fully and naturally. Then there's the only Non Set Automatic Stop. Nothing to move or set or measure. Just start the Grafonola, and it plays and stops itself.

Be sure to hear the Columbia Grafonola, hear it—then you'll surely buy it.
