They, Like Plants, Dwindle and Die When Deprived of the Light of the Sun. A home without windows was built for the blind in a certain English community. Scientific heating and ventilation were provided. But architects and trustees reasoned that light was not necessary in a house of sightless people.

When they discovered that human beings like plants, dwindle and die when deprived of the light of the sun. And they had to remodel their building and let in the sun's rays to keep their blind alive.

Since the invention of the electric light we have all treated sunlight with amazing indifference. In summer, especially, we spend much time, thought, energy and money protecting ourselves from the sun.

And in so doing we often are acting not rationally more wisely than the committee that built a house without light for the blind. In summer, for instance, we try to escape the sun, when we actually need its services in the cause of good health.

So take your work and play out of doors when possible. Don't fear sunstroke. Don't be afraid of sweat and tan.—Toloso News-Be.

A real Guarantee

To be more than a mere "scrap of paper," a guarantee must be absolute—and backed by a concern able and willing to make it good.

The General's guarantee is not only absolute; it is backed by a business operating the world's largest roofing mills, and making one-third of all the roll roofing made in America. That's the guarantee behind

Certain-teed Roofing

The guarantee is for 5, 10 or 15 years, according to ply (1, 2 or 3). There is no evasion about it—no attempt to substitute a high-sounding something "just as good." There is no substitute for a real guarantee. You get an absolute guarantee on CERTAIN-TEED because the General knows that no better roofing can be made. Its raw materials and method of manufacture are both certified by the General's board of graduate chemists, and he knows he's taking no chance in guaranteeing them to you. That's what "CERTAIN-TEED" means—certified and guaranteed. Experience has proven that the guarantee is conservative, and that CERTAIN-TEED will outlast the period of guarantee.

The roofing felt, as it comes bone dry from the rollers, is given a thorough saturation of a special blend of soft asphalt, the formula of the General's board of expert chemists. It is then given a harder coating of another blend of asphalt. This keeps the inner saturation soft, and prevents the drying-out process so destructive to ordinary roofing. Roofing is impervious to the elements only so long as the asphalt saturation lasts. CERTAIN-TEED retains its soft saturation, and is in good condition for years after the harder, drier kinds have become useless.

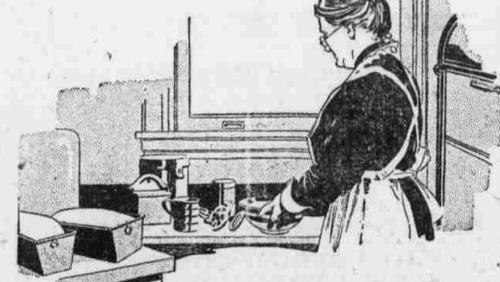

CERTAIN-TEED is made in rolls; also in slate-covered shingles. There is a type of CERTAIN-TEED for every kind of building, with flat or pitched roofs, from the largest sky-scraper to the smallest residence or out-building.

CERTAIN-TEED is sold by responsible dealers all over the world, at reasonable prices. Investigate it before you decide on any type of roof.
