

OPPORTUNITY AT YOUR DOOR!

GIVE HEED TO ITS KNOCKING

The opportunities today in connection with the mid-Texas oil fields were never better. There are unquestionably better opportunities to make money in the Ranger, Comanche, Stephens, Brown, Callahan, Young, Archer and Wichita County oil fields than was ever known before; that is—right now for those who get in on the ground floor. **HERE IS YOUR OPPORTUNITY.** You can now secure stock in the Mid-Texas Petroleum Company, whose holdings you will observe from this map represent over 7,000 acres scattered over a distance of 100 miles from one end of the proven field to the other. Many of our leases are adjacent to wells of immense production, and all geological indications are that we have but to sink wells on these holdings to reap fabulous returns on the investment.

WE NOW HAVE

Two Producing Wells

We now have two producing wells in the Burk Burnett Field, from the proceeds of which we are paying 10% annual dividends, the first quarter payable October 1st. So you see it is no experiment—no wildcat operations with their attending chance to lose. In fact, it is just a matter of how much you will make, for out of the proceeds of this allotment of \$250,000 stock it is our plan to drill not less than five wells.

It is the fixed policy of this company to drill wells only in proven territory, thereby emulating the example of the big companies. This policy is made possible by our extensive and widely distributed leases. It is not necessary to wildcat when we have a great number of leases practically surrounded by producing wells—in many instances gushers within a few hundred yards of us. In short we have the holdings that will make this company and its stockholders rich when our properties are developed. We will continue to secure such proven leases as will make the company money. This will be done for two important reasons—one a determination on the part of honest officers to give the stockholders a square deal—the other because your gains and ours are mutual.

The Company

This is an oil-producing company, organized for the purpose of developing proven leases in the greatest oil field that has yet been opened up in the United States. Your money is safe as an investment, for our producing wells assure that we can pay a reasonable dividend regularly; and the personnel of this company's officers assures honest and efficient management. Our financial rating can be easily ascertained in Bradstreet's or Dun's, and the following references speak for the character and qualifications of the men back of it.

THE FIRST NATIONAL BANK
of Fort Worth, Texas.
Capital and Surplus, \$1,500,000.00.

Fort Worth, Texas, June 10th, 1919.

TO WHOM IT MAY CONCERN:

The bearer of this letter, Mr. M. Logan, is general manager of the Mid-Texas Petroleum Company, who have opened an account with us and are one of the organizers operating in the Ranger field, and have connected with them as officers and trustees of their company men well known to us and who bear a good reputation in their section of the country.

The company was organized in the spring of 1919 with a capital stock of \$1,000,000, with par value \$1.00. We are advised by them that their leases cover nine or ten of the counties where there is drilling and in some of the counties where there is a great deal of oil being found. While we are not closely acquainted in detail with the properties they appear to hold, yet we believe that their values could be substantiated through sources in the section of the country where these properties are. From what we know of the company we think well of it and the people composing it.

Yours very truly,

W. P. ANDREWS, Cashier.

FORT WORTH NATIONAL BANK.

Capital, \$600,000. Surplus and Profits, \$1,200,000.

Fort Worth, Texas, March 17th, 1919.

TO WHOM IT MAY CONCERN:

This will introduce to you Mr. John W. Woods, formerly of Rotan, Texas, now of Abilene, Texas, whom I have well and favorably known for the past five or six years.

Mr. Woods is an experienced attorney and careful in looking after the interest of his clients.

Yours very truly,

ELMO SLEDD, Vice-President.

FIRST NATIONAL BANK.

Capital, Surplus and Undivided Profits, \$54,000.00.

Roby, Texas, April 15th, 1919.

TO WHOM IT MAY CONCERN:

I take pleasure in stating that I have known W. R. Timmons for a number of years. He is one of our consistent customers, and we unhesitatingly state that his business with this bank has been both profitable and satisfactory to us.

He is a successful, enterprising business man, and a young man of unimpeachable integrity and honor.

Mr. Timmons has identified himself with the Mid-Texas Petroleum Company, of Fort Worth, Texas, as its secretary and treasurer, and his connection with any business is a guarantee that everyone will get a square deal. This company is fortunate in securing his services as its secretary and treasurer.

Mr. Timmons is entitled to the fullest confidence of the public, and we have every reason to believe that any statements that he may make will be made in good faith and can be relied upon. This confidence is based on our personal experience.

Yours very truly,

L. FORD, Cashier.

THE BECKHAM NATIONAL BANK.

Graham, Texas.

March 31, 1919.

TO WHOM IT MAY CONCERN:

We have known Mr. R. G. Hallam for the past fifteen years and have always found him to be truthful and worthy of confidence. He is a man of good business ability and his integrity has never been questioned. Since the opening of the oil fields in this section of the country he has been more or less identified with its development and has been wonderfully successful so far. Any favor shown him will be appreciated.

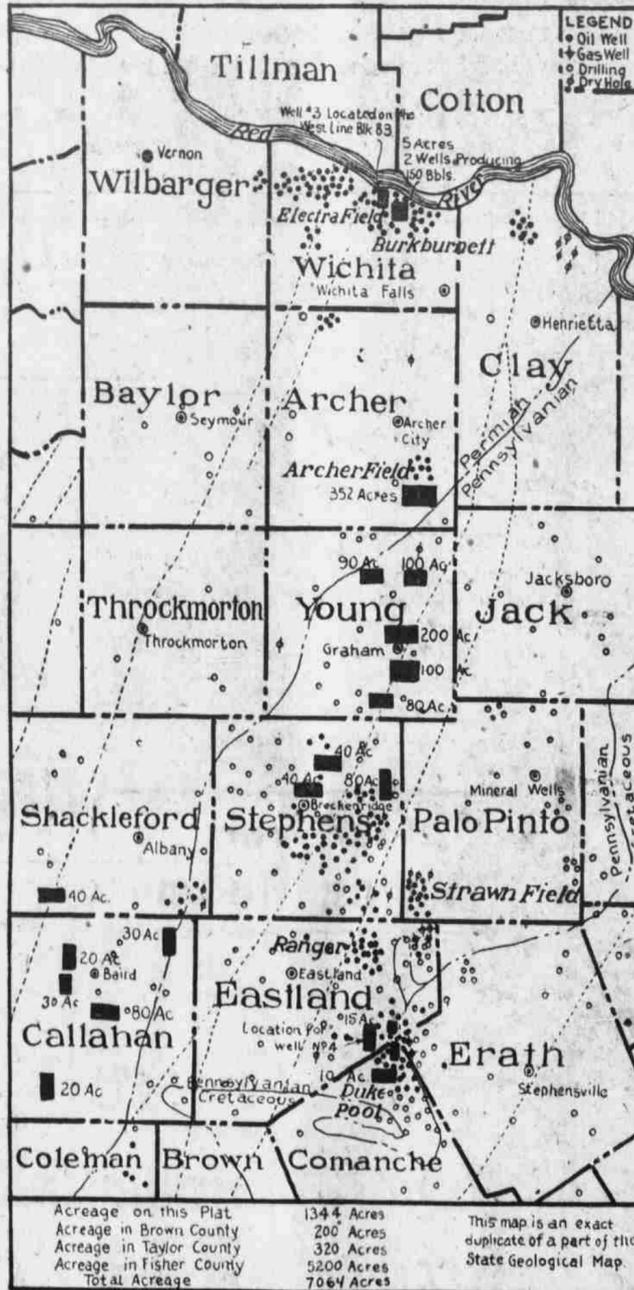

In connection with this, we will say that we are very well acquainted with the oil development now going on in Archer, Young and Stephens counties, and the value of the leases therein. We know the value of the leases and the distance of the same from drilling wells which belong to the Mid-Texas Petroleum Company, situated in the above named counties, and consider some of these leases within the radius of the proven oil fields and very valuable.

Yours very truly,

RELHL

R. E. LYNCH, President.

Petroleum Bldg. Fort Worth Texas

THINK THIS OVER The Profits

Did you know that the oil business is the one sure way to make a million dollars and make it quick? A producing oil well, such as we have in the great Mid-Texas oil fields, will sell for \$2,000 a barrel for settled production. If you owned a well that made 1,000 barrels daily, it would sell for \$2,000,000. The wells now producing will doubtless make oil as long as your children live. Wells in Pennsylvania have produced oil steadily for forty years.

A 100-barrel well is a good well; a 500-barrel well is a fortune, and the stupendous production coming from a 5,000-barrel gusher, such as we have in this new Texas field, runs into enormous figures.

A 5,000-barrel well means gross receipts of \$11,250 per day, or over \$4,000,000 annually.

Each 1,000-barrel well that we get will mean \$2,250 daily, or over \$810,000 annually.

Now take into consideration our drilling campaign of five wells which we have planned for this year, and you can see the real opportunities of this company.

Were You Ever In An Oil Field?

If you have never been in an oil field you cannot realize, no pen nor spoken narrative can adequately describe, the marvelous wealth that comes gushing from its subterranean source, nor its wonderful influence upon those touched by its magic.

It has been aptly said that "Truth is stranger than fiction." This is proven time and again by the recent life history of men who in many cases were unsuccessful farmers, believing a few years back that their land was hardly worth the taxes, just eking out an existence, when suddenly strangers came into their midst and started drilling operations on this land, and shortly oil was struck, making millionaires of many who seldom had a dollar to spare.

We have not come to drill wells on your land, but to give you an opportunity to invest in an oil producing company that owns thousands of acres of leases upon which there is unquestionably oil enough to make all rich who get in on the ground floor.

This company was organized by and is managed by successful business men. It requires money to carry on the development campaign planned. You come in on same basis as the organizers of the company. Your money will be judiciously handled, and we will make you big money.

CAPITAL STOCK, \$1,000,000.00
Par Value \$1.00 Per Share

All stock is common, fully paid and nonassessable. Each share entitles the holder thereof to a pro rata interest in all the present and future holdings of the company.
