

THE PULSE DROPS.

And the President is Again Regaining His Strength.

He Has a Good Night's Rest and Recovers from the Journey's Fatigue.

The Day Warm, but the Patient Passes it very Comfortably.

Encouraging Bulletins from the Cottage by the Sea.

National Associated Press.

LONG BRANCH, September 7.—The morning bulletin received an encouraging token of the president's remaining vitality.

Before that hour he had some sleep, and after was awake long enough only to take nourishment.

After each operation General Swain said that his sleep was of the right sort and added it would take a sicker man than he is to keep from enjoying a good sleep in that room.

There was an excellent atmosphere and the nicest kind of a breeze to start in on.

It leaked out before the bulletin was issued that the temperature and respiration were normal and the pulse 106.

Dr. Boynton to-day was questioned as follows by the agent of the National Associated Press:

"How is the patient now, doctor?" "Much better than last night."

"Has he made a good start here yet?" "I can hardly say that he has, but he is doing very nicely.

"Does he seem to appreciate the change?" "Oh yes. He saw Warren Young at his door to-day, and held out his hand. Warren went in and took it."

"The president seems to be getting on better, doesn't he?" "I think he is doing as well as we could expect, perhaps better, and I hope to see a marked improvement in a few days."

General Swain said this afternoon that the president had certainly held all he gained last night, and to him seemed to be better than in the morning.

LONG BRANCH, September 7.—Elberon 2 p. m.—The president was still doing well at 2 o'clock. His pulse when last taken was 104, temperature and respiration normal.

ELBERON, 2:30 p. m.—The president continues favorable. Dr. Agnew has left for Philadelphia, whence he can be summoned in three hours.

A HOT DAY.—The president's first full day at Long Branch has been marked by extreme heat and yet he has certainly made some improvement.

Three is, however, little else to indicate, through external appearances at Elberon, that the president is there.

"This hot weather," says Dr. Bliss, is no better for him than for you and me. If we come to get a good breeze to-morrow it will probably make some difference.

At a late hour this evening the agent of the National Associated Press had an interview with Dr. Reburn, substantially as follows:

"Has the president gained any ground to-day, doctor?" "Not a great deal."

"From that hour his sleep was much better. He slept longer at a time and

with greater comfort. At the usual intervals he was given liquid nourishment and occasionally nutritive enemata.

"From the first effects he has, and I think from the whole, I see no reason to think he was injured by the journey. To-night's fever is, then, not from fatigue.

"He rallied from last night's prostration better than you feared, did he not?" "Quicker, perhaps, but not better. I hope. That shows considerable vitality.

"The following dispatch was sent by Secretary Blaine at 11 p. m., to Minister Lowell, London:

"The president has not gained in the last twenty-four hours. His fever increased considerably during the afternoon, his temperature reaching 101.

Nihilists Making Things Lively Again at St. Petersburg.

Fears of an Attempt at Simultaneous Assassination of the Czar and Emperor.

Austria Getting Frightened About Her Navy and Italy's Growing Marine Power.

National Associated Press.

LONDON, September 7.—Admiral Sir E. O'Many, in a paper read before the British association, says the United States made it a point of honor to search for the missing Arctic exploring steamer Jeannette.

MADRID, September 7.—The police and detectives last night broke up a meeting of the Advanced Liberal Democratic club, made some arrests, and will probably prohibit the club from meeting.

ST. PETERSBURG, September 7.—Telegraphic cables are being made more stringent, and correspondents are closely watched.

BERLIN, September 7.—It is now settled that the meeting between the czar and Emperor William will be held on board the iron-clad gun boat Popenzeller, now lying off New Fahrwasser.

LONDON, September 7.—The Times in an editorial article this morning says: "No new wars or alliances of fresh departments in policy are to be expected from the meeting of the Emperors."

ST. PETERSBURG, September 7.—The estimates of the Austrian army and navy for 1882 contain large sums for the new iron-clads.

VENICE, September 7.—A newspaper of Galicia reports the Pan Slavian agitation carried on by Russian agents to be on the increase.

ST. PETERSBURG, September 7.—The estimates of the Austrian army and navy for 1882 contain large sums for the new iron-clads.
