## VISITORS TO OMAHA

And the public generally desiring to examine the workings of our institution will be welcome

### JOS. GARNEAU Cracker Company, - - - Twelfth and Jackson streets.

**Advertising Cheats!!!**  
 "It has become so common to write the beginning of an article, in an elegant, interesting manner,  
 "The man in it is some advertisement that we avoid all such.  
 "And simply call attention to the merits of Hop Bitters in as plain, honest terms as possible.  
 "To induce people  
 "To give them a trial, which so proves their value that they will never use anything else."  
 "The REMEDY so favorably noticed in all papers,  
 "Religious and secular, is  
 "Having a large sale, and is supplanting all other medicines."  
 "There is no denying the virtues of the Hop plant, and the proprietors of Hop Bitters have shown great shrewdness  
 "And ability  
 "In compounding a medicine whose virtues are so palpable to every one's observation."  
 "Did She die?  
 "No!  
 "She lingered and suffered along, pining away all the time for years."  
 "The doctors doing her no good."  
 "And at last was cured by this Hop Bitters the papers say so much about."  
 "Indeed! Indeed!"  
 "How thankful we should be for that medicine."  
 "A Daughter's Misery.  
 "Eleven years our daughter suffered on a bed of misery,  
 "From a complication of kidney, liver, rheumatic trouble and Nervous debility,  
 "Under the care of the best physicians,  
 "Who gave her disease various names,  
 "But no relief,  
 "And now she is restored to us in good health by as simply a remedy as Hop Bitters, that we had shunned for years before using it."--THE PARENTS.  
 "Father is Getting Well.  
 "My daughter says:  
 "How much better father is since he used Ho Bitters.  
 "He is getting well after his long suffering from disease declared incurable."  
 "And we are so glad that he used your Bitters."  
 "A LADY OF UTAH, N. Y.

**WHAT BECOMES OF THE RAGS.**  
 An Industry in Which Millions of Capital are Invested.  
 Milwaukee Evening Wisconsin.  
 William Franzen, one of the oldest and most experienced rag and paper stock dealers in the west, was asked about his business and the possibility of its being a medium of bringing Asiatic diseases into the country. He said: Large quantities of rags from Egypt and Turkey pass through Milwaukee on their way to the paper mills at Neenah and Menasha. I mean actually large quantities—not relatively large—for the greater proportion of the receipts of foreign rags in this country are consumed in the east. I don't think, however, there is any danger of disease originating in Milwaukee by reason of the rag trade. The foreign rags are not picked over here. Labor at the points of shipment is so much cheaper than here that it pays to do all the necessary sorting before the rags are baled and sent off. In support of my belief that no danger of the spread of contagion in Milwaukee by the sales of foreign rags which pass through here is to be apprehended, I can say that I have been in the rag business for 20 years—12 of them in this city—and have never had a sick day. I have employed from 12 to 60 hands in sorting rags during all that time, and have never known sickness to break out among them from the handling of rags. I don't think there is any danger to be apprehended from the rags at the paper mills either, for the strong bleaching materials used would be likely to act as a disinfectant.  
 Mr. Franzen went on to give some facts to prove that the rag business is one of the staple industries of the country. "The business in rags and paper done in Milwaukee alone amounts," he said, "to \$750,000 annually, and furnishes employment to upward of 500 persons. Careful estimates of the present annual consumption of rag stock in the United States place the amount at 3,000,000 bales, valued at \$30,000,000. The arrivals of foreign rag stock at New York City are estimated at 600,000 bales annually, and those of domestic rag stock at 1,800,000 bales. Twenty-five thousand bales of rags were shipped out of Milwaukee during the year 1882. Most of the domestic paper stock received here comes from Iowa, Minnesota, Wisconsin, Nebraska, Dakota and Michigan. Missouri and Illinois also contribute large amounts. A considerable quantity of foreign rags also pass through this city during the course of a year. Those come from all parts of Europe, England, France, Germany and Turkey contributing most freely. Egyptian rags, as I have said, often pass through this city. The destination of the rags which are shipped from Milwaukee is dependent upon their quality. All the wooden rags and the better grades of cotton rags go to the east, mostly to supply the fine paper mills and shoddy mills of Massachusetts, New Hampshire, Rhode Island, and Pennsylvania. The cheaper grades of stock are used in the west in the manufacture of print and wrapping papers. The foreign rags received in Milwaukee, which are inferior in quality to those made in this country, are used by paper mills at various points in this state. The domestic rags, as I have said, reach this market assorted and ready for the mills. The domestic rags, on the contrary, invariably require to be assorted here.  
 "It would astonish the uninitiated to see the number of distinct grades into which

rag are discriminated. Here is a list of the most of the inferior grades of rags of paper stock recognized in Milwaukee. Whites—Nos. 1 and 2, thirds and blues, print, manila rope, mixed bagging, wrapping stock, seamed cloth, wool seams, new clips, soft wools, print papers, manila papers, common papers, tea paper, white shavings, mixed shavings, No. 1 book, No. 2 book, strawboard clippings, skirted delaines. It must not be supposed that the differentiation ends here. Soft wools, for instance, are made in Milwaukee into one grade. In Cincinnati, Philadelphia, and other cities east of Milwaukee there are a number of establishments which buy up suitable western stock and assort it for the woolen manufacturers. In these establishments what are known in Milwaukee by the name of soft wools are sorted into 15 different grades. All the woolen rags shipped from here go to eastern manufacturers, by whom they are converted into shoddy. The better grades of cotton rags go to the east, where they are made into writing paper. Print rags and bagging are used in the manufacture of print paper, which is carried on in the west. Manila rope is principally used in Ohio, where it enters into the manufacture of paper flour bags. Wrapping stock, which is the mere refuse of the rag bin—the cheapest grade of rags made—is used principally in the manufacture of roofing felt. The western mills where this is made are mostly in Ohio, but there is one in this state at Beloit. All grades of woolen rags go, as heretofore stated, to the shoddy and manufacturers. The remaining grades of stock mentioned in the above list are converted into wrapping papers in the west, principally in Wisconsin. The Wisconsin mills which make wrapping paper are at Sparta, Menasha, Appleton, and Beloit.  
 Do not go to the country without a bottle of Angostura Bitters to flavor your Soda and Lemonade, and keep your digestive organs in order. Be sure it is the genuine Angostura of world-wide fame and manufactured only by Dr. J. G. B. SIEGERT & SONS.  
**JOHNY ROACH' GAME.**  
 Why He Loaned Tilden His Yacht.  
 New York Special to the Chicago Daily News.  
 John Roach's yacht, the Yosemite, has been hired by Mr. Tilden for a month. That is one side of the story. The other side of it is that Mr. Roach has loaned her to the sage of Graystone for a thirty-days' trial, and that thereafter if Tilden wants the boat he is to buy her. Well, she won't be bought. That is a dead sure thing. It doesn't count anything against the vessel, which is a very good one. The fact simply is that Mr. Roach has been making himself solid with Samuel by placing the Yosemite at his disposal for as long a time as he wants to use her. There is no doubt about Mr. John Roach, gentle reader. He is up to snuff. And what ever else he isn't up to isn't very high. Doesn't he know pretty well that Samuel J. Tilden is keeping his far-off eye on the presidency? Doesn't he fully comprehend that the afore said Samuel is pretty affixed likely to get the nomination? And isn't he pretty well aware that whoever catches the democratic nomination next year is going to make a lovely run for the white house? And is not John Roach building cruisers? And doesn't he know the value of being solid with possible presidents? O, no; I rather think not. Well, it seems that Mr. Tilden's doctor has urged him to take sea air for his health. It doesn't come in the kind of bottles which the great defrauded has been accustomed to consult for his health heretofore, and it is not labeled

"Henry mugh." That is why the man who has been president if his foot isn't flipped looks unhappy when he is riding it. He usually goes aboard the Yosemite about 11 o'clock in the morning with several guests and a couple of valets. He walks well enough, and when he puts his hands in his pockets nobody would notice anything to distinguish him from other well-preserved old men. But if he reaches out to take hold of anything the palsy becomes evident. It is a pretty bad case, so far as his hands are concerned, but it is not in his throat any more. Still, anybody who says Mr. Tilden's voice is restored talks hoah. He speaks clearly in a rather mild conversational tone. But he could no more make a speech that would be distinctly heard across a theater than he could knock out J. L. Sullivan. When I make these statements you may be sure I know what I am saying. The points were recently given me by somebody who knows all there is to know about Mr. Tilden's physical condition. In the Yosemite he has a very fast and a very pretty yacht. It is the craft that Mr. Roach wants to match against Mr. Jay Gould's Atlanta. That is to say, it is the craft which Mr. Roach professes he wants to match against the Atlanta. There is no doubt that such a race would be interesting. But it would not necessarily fairly test the qualities of both vessels. In a rough sea the Atlanta is the best and speediest ship. In perfectly smooth water the Yosemite would probably win. One thing is pretty certain, there will be no race until Mr. Tilden has finished with the Yosemite. You won't catch Samivel raking his precious life with all steam up, and with, as Mr. Hay would observe, "a nigger squat on the safety-valve."

**Henry's Carbolic Salve.**  
 The best salve used in the world for Cuts, Bruises, Piles, Sores, Ulcers, Salt Rheum, Tetter, Chapped Hands, Chills, Corns, Itch, all kinds of Skin Eruptions, scalds and pimples. The Salve is guaranteed to give perfect satisfaction in every case. Be sure and get HENRY'S CARBOLIC SALVE, as all others are but imitations and counterfeits. Price 25 cents.

**Help! For Heaven's Sake!**  
 Thayer County Herald.  
 At their June meeting the board of regents of the state university added a medical department to that institution and the first annual announcement is before us. So far, so good! But what we want to call attention to is a little private circular issued by a crank named Latta who seems to temporarily occupy the position of dean. Below we publish the circular in full, and comment is unnecessary. Any man connected with a state institution who would send out such a document, should be immediately hoisted overboard.  
 Lincoln, Neb., August 26th, 1883.  
 Dear Doctor:  
 I send this day our announcement; please examine it, and if it is a possible thing, send us one or two students for the winter term. We have had a struggle with allopathy, and all that is wanting is for you now to send us the students to make us triumphantly victorious. We are doing this work without money and without price. Will you also do what you can for the good of the cause. Induce some young man to come it costs comparatively nothing, and will be worth hundreds of dollars to him, even if he never practices, it would be worth thousands to a lawyer, and only cost him his board.  
 Remember everything depends on our making a good showing this season. If we have comparatively no students this

**THE MORAL OF IT.**  
 We may moralize as much as we please about pain; but the fact is, that we don't like it while it lasts, and that we want to get rid of it as soon as we can. Whether caused by rheumatism, gout, disordered liver, weak nerves, irregular kidneys, bad blood, or anything else that is just the reverse of what it should be, the sooner it is out of the system the happier we are. Whether pain is the result of imprudence or of accident, or is sent as a punishment for our sins, may be a nice question for the philosophers to argue; but people who are suffering want first to be rid of the pain, after which those who are fond of argument may argue the matter to their hearts' content.  
 Above all theory, argument, and philosophy, comes the delightful fact that BROWN'S IRON BITTERS drives pain away. Sufferers run no risk in trying this medicine, the only compound containing iron which carries no mischief with it. Those who have used it will tell you so; and you can try for yourself by buying a bottle of the nearest druggist. 7

season, the institution will certainly die of inanition, if indeed it is not still burned, or worse an abortion.  
 We have done our part, we have won the first victory of the kind on record. Now, for Heaven's sake, send us some students. The life of our institution depends on it, and believe me, fraternally yours,  
 W. S. LATTA.

**Horsford's Acid Phosphate.**  
 Tonic for Overworked Men.  
 Dr. J. C. Wilson Philadelphia, Pa., says: "I have used it as a general tonic, and in particular in the debility and dyspepsia of overworked men, with satisfactory results."

**A Big Vineyard for San Diego.**  
 San Diego Union August 29.  
 For some months it has been currently stated that Frank Kimball had generously offered a gift deed to any person who would accept 1000 acres of fruit lands with the proviso that one-half, or 500 acres thereof, should be immediately put under cultivation by the planting of grape vines, etc. Yesterday Mr. Kimball informed us that Arpad Haraszthy had accepted his proposition with the above conditions, and the almost world-wide reputation of Mr. Haraszthy as a wine manufacturer is a sufficient guaranty that in three to five years we shall have in San Diego county perhaps the largest winery on the Pacific coast, and that means the largest in the world. The land given by Mr. Kimball is in one body, and is located on the Encinitas ranch, two and one-half miles from the Encinitas station, on the line of the California Southern Railroad.

Disease, Propensity and Passion, brings mankind numberless ailments, foremost among them are Nervousness, Nervous Debility, and unnatural weakness of Generative Organs; Allen's Brain Food successfully overcomes these troubles and restores the sufferer to his former vigor. \$1.—At druggists.

Near Ottawa the other day a baby fell from the window of a train going at full speed. The little one was found uninjured, sitting by the side of the track and trying to make a meal of its great toe.

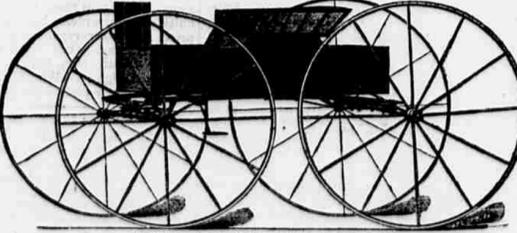

**Anheuser-Busch BREWING ASSOCIATION**  
 CELEBRATED  
 Keg and Bottled Beer  
 This Excellent Beer speaks for itself.
