#### ROUSING REPUBLICANS.

The Meeting Held Saturday Evening and Addressed by John N. Baldwin, Esq.

The Republicans seem to be unfortunate in their selection of nights on which to hold political meetings. Saturday night was another unfortunate one, rain and mud making it more desirable to stay by the home fireside than to wade out in the storm to hear one of our own townsmen speak. Yet there was a good-sized gathering, despite these adverse circumstances, an indication not only that the Republicans are getting pretty well aroused, but also that John N. Baldwin, the speaker of the evening, is not that sort of a prophet who has no honor in his own country. Those who gathered there expected to have enough of an oratorical treat to repay them amply. They were not disappointed.

Mr. Baldwin entered into the discussion of the issues of the day with his usual enthusiasm, and clear, logical thinking. He pictured the history of the two parties during the past score of years, and comparing one with the other, drew some very forcible conclusions to the effect that the good and faithful servant should not now be thrown aside to make room for one who had proved so unworthy of the having.

He leaned to the protective theory, and discussed some features of the revenue and tariff, showing that he was by no means a superficial student of these intricate matters.

In regard to the temperance question he urged the Republicans to stand firm to principle, and not be afraid to express their honest convictions. He predicted a glorious Republican victory this fall, and throughout his address his views were heartily endorsed by the applause of his hearers.

To strengthen and build up the system a trial will convince you that Brown's Iron Bitters is the best medicine made.

#### PERSONALS.

Col. Root of Keokuk, the United States Marshal of this district, arrived at the Ogden yesterday, and was there taken quite ill with what threatens to be a run of fever.

E. R. Cadwell, of Dunlap, tested the depth of Council Bluffs mud yesterday.

Jacob Neumeyer, is back from his visit to his home across the waters. He was glad to see the Father Land again, but still lost none of his love for America.

George T. Phelps is confined to his bed, and is under Dr. Paulson's care. He is suffering from fever contracted while on a recent visit to Arizona.

E. E. Harkness has just returned from the east, where he has been making extensive purchases of new goods for the dry goods establishment of Harkness Bros., of which he is the senior partner.

I. N. Empire, the druggist, is enjoying a visit from his father, B. W. Empire, whose home is in Kansas.

Mr. F. B. Eastland, of the Neola postoffice, and junior member of the firm of Remington & Eastland, news dealers, was in the Bluffs Saturday evening and took in the 'Mas-cotte'.

Mr. and Mrs. I. B. Ferguson, of Mississippi, were at the Ogden yesterday.

J. W. Strocker and wife, of Logan, were in the city over Sunday.

W. N. Pitman, of Kansas City, took a Sunday dinner at the Pacific yesterday.

L. Davison, of Des Moines, was at the Pacific yesterday.

F. H. Warren, of New York, was among yesterday's arrivals at the Pacific.

C. H. Egermann, of St. Louis, is at the Pacific.

Horace Everett and his son Ned leave today on an eastern trip, which will occupy several weeks. They go by way of Montreal and through Canada to New England, and after visiting Boston and New York will probably visit another son, Tarrey, who is attending school at Concord, and which school there are also some Omaha boys attending.

#### Horsford's Acid Phosphate.

Tonic for Overworked Men. Dr. J. C. Winsor, Philadelphia, Pa., says: "I have used it as a general tonic, and in particular in the debility and dyspepsia of overworked men, with satisfactory results."

#### A MAIL CARRIER'S ADVENTURE.

The Novel Weapon [With Which He Killed a Formidable Grizzly.

San Francisco Cell. The fourteen feet long snowshoes of "Snowshoe Thompson" will be sent to the Louisville Exhibition by H. McKusick, superintendent of the railway mail service on the Pacific coast. The shoes are those used by Thompson, who was a mail carrier on various Sierra Nevada routes for many years, and who died only a few years ago. If a history of a few of the startling adventures encountered by Thompson could be sent along with the shoes, they would indeed be an interesting exhibit. One morning when Thompson was resting in a hut near Yank's Station something knocked at the door, and on going to open it, Thompson saw a big grizzly. Thompson jumped back and the bear waddled in and gave evidence of his satisfaction at the prospect of a mail carrier for a winter's feast. He couldn't get out of the door, so Thompson jumped up, caught hold of a crossbeam, and drew himself up. The bear camped underneath and grunted indignantly, as though saying: "Well, old fellow, you've got to drop down sooner or later; here goes to see which one of us can out last the other."

Thompson sat it out all day and the following night. There was no use in trying for help, as none would be within hailing until spring. He could not jump down and fight the bear with his pocket knife, his only weapon, and all together the case looked pretty desperate for the old mail carrier. His snowshoes were leaning from one end of the cabin to the wall at the other end, and Thompson finally opened his knife and lashed it with his scarf, torn in strips, on one end of one shoe, making a formidable lance of it. While the bear camped under him he could not use his lance, the cabin not being long enough. Thompson sat it out the animal outside the door by tossing one of his stockings out, which the bear lunged out to investigate. That got him far enough to be prodded and Thompson prepared. When the grizzly had sniffed the bait it turned round, facing the door, and found itself within a

foot of Thompson's lance point. The old mail carrier only had a foot to draw back his lance, but he used it to good advantage, for carefully drawing it back he gave it a sudden lunge forward, the knife entering the bear's brain through one of its eyes. When the exhausted mail carrier reached Yank's and told his story it was doubted, although Thompson had a remarkable reputation for truth telling among those hardy liars of the mountains. "There, if you don't believe me boys," Thompson said, "the United States mail men wait until my character is vindicated. I'll not leave this place until some of ye doubting lubbers has gone back and brought me a steak from that 'thar bar.' It was done. Yank himself and some of the men about the station went back on snowshoes, and Thompson had his dinner off a steak of the bear he had killed with his snowshoe lance.

#### WARNING!

It is not to be wondered at that most Americans are Dyspeptics. Swallowing ice cold drinks on a hot summer day does the mischief. Why then not add 10 drops of **ANGOSTURA BITTERS**, the world renowned medicinal flavor, and thus avoid all danger of cold in the stomach.

#### WRECKED IN THE BALTIC.

Graphic Account of a Scene of Deadly Peril.

Mr. George A. Price, of the firm of Balch, Price & Co., of Brooklyn, has sent home the following account of a shipwreck in the Baltic sea, writing from Loderkerping, Sweden, Aug. 17: "We sailed for Goleburg on Tuesday at 12 m. on the small iron steamer Wadstena, Capt. Ericsson. Our course lay through Lake Malaren for two or three hours, then out through a short canal into an estuary of the Baltic sea, and thence along the rugged coast with its thousands of islands, large and small, jagged edges of rock just level with the surface of the water and white caps showing where others were, and our course marked in the most primitive way by what looked like inverted broomsticks. The pilot steered directly for these, and would leave them to the right or left by from three to twenty feet. The steamer ran by time—three, five, or ten minutes, at full speed, to go from one of these stakes to another, and had run eleven and three quarter minutes when two tremendous bumps and a crash of glass and crockery made us aware of the fact that we were on a sunken rock—time, 8:45 p. m. It had been raining, but had stopped. The wind rather fresh, but a light-house in sight except the one some ten or twelve miles behind us. In an instant all was confusion. There were about eighty persons on board. There were two miserable boats capable of holding a dozen persons. These were launched as quickly as they could be freed from the mass of freight that had been piled up about them. They were manned by the captain, purser, two men, two boys, the engineer, and myself. Into the boats we put all the women and children we could, and started them for a rock which showed above the water some 250 yards to the left and rear of us. I went on the bridge and watched them with great anxiety, as the water was gaining fast and the steamer was surely sinking.

I went to the captain and asked him what I should do to help. He said: "Go to the bridge and wait for me. When I want you I will call or come for you." We shook hands and I went up, and fortunately found a life-preserver (there were not half a dozen on board.) With this I stood there in the darkness alone, waiting for the boats to come back. Again and again they came and went, but the captain had sent no word, and I went down. The water was then nearly to the lower deck, and only three passengers beside myself were left on board. The captain called to me, and I asked him if I could take my rug. He said yes, and I threw them in the boat, and we were soon on the rock. As I neared it I called out "Harry" twice before I got a response, and yet he did not seem to hear me. He had taken a little child ashore on the fourth or fifth trip of the boat.

I found a Mr. and Mrs. J. B. Cooper, of Dobb's Ferry, N. Y., who with ourselves were the only English or American passengers. Very fortunately for me, I had changed a light suit which I had worn during the day for a heavy one, and when the steamer struck I slipped on my overcoat and felt as warm and comfortable as could be expected under the circumstances. We wrapped our rugs about the Coopers, who were invalids, and I went to work helping to haul up such stuff as the sailors were bringing ashore from the wreck. She had rolled well over on her side, and it was tedious work getting off the baggage and some provisions and water. Finally we had all the baggage and two large sails, with which the sailors rigged up a small shelter, which also served the purpose of a signal.

About 1 o'clock it rained, and, as the shelter could only cover a dozen of the party, the rest had to remain outside in the wet. We did the best we could for all hands, but got no rest, so we waited for dawn and daylight. We named our resting-place Salvation rock. It was about 350 or 400 feet long and 200 feet wide. There was not a tree or bush on it. But there were beautiful daisies, bluebells, and a sort of violet. Here we waited. We could expect no help from the mainland before 4 or 5 o'clock p. m., but at 12 m. we sighted a steamer coming toward us. At 1:30 p. m. she anchored off our rock. She proved to be the Swedish gunboat Skald, Capt. Anton Bakstrom. Although on special duty in regard to some sanitary law, he said he could not leave so many people on a rock in the Baltic, with a chance of their being obliged to pass another night exposed as they were, and he offered to take us on board and land us at Mem, about twenty miles to the westward, and at the entrance to the Gota canal proper. We gladly accepted his offer."

Nervousness, Nervous Debility, Neuralgia, Neuritis, Migraine, Dizziness, Headache, and all diseases of the Nerve Generative Organs, are all permanently and radically cured by Allen's Brain Food, the great botanical remedy. \$1 pkg., 6 for \$5.—At druggists.

#### People Who Doctor Themselves.

Philadelphia Telegraph. "The extensive use of patent medicines and the enormous quantity of drugs sold without prescriptions indicate how widespread is the habit of self-doctoring," said a New York physician to a reporter. "To those who know how carefully and ignorantly these drugs are used, the thought of the harm they do is absolutely appalling. There is no telling how long a prescription once given will be used, or with what foolish risk it will be applied in a case where it will not only do good, but is certain to work harm."

"Do you think this habit of self-doctoring decreases the practice of physicians?" "By no means. The effect is rather to increase our work. People who think to

do without the services of a physician will not only do themselves harm by the delay, but also with the medicines, which they do not know how to use. It is like a man trying to mend a leak in a water-tight pipe by soldering it with a poker. He generally makes the hole bigger. It is, of course, the most difficult part of the physician's duty to diagnose the disease, to tell what is the real trouble with the patient. It is not uncommon for even educated physicians to make mistakes in this respect. The science of medicine has progressed so far that every part of the human body has been pretty thoroughly studied, and the treatment of the ailments of each part is a specialty. It is impossible for one physician to know all these diseases as well as the specialists, and it is a common practice among honest physicians to refer patients to those who have made a special study of the diseases which afflict them. It is not uncommon for a man to go from one physician to another in the vain effort to discover his ailment. Sometimes a patient will be treated by successive physicians for the wrong ailment, because some of the symptoms of different diseases are similar. How unlikely is it, therefore, that persons who have not studied medicine can find out what ails them!"

"Which do you think do the most self-doctoring, women or men?"

"Women, decidedly, especially mothers and old women. The reckless temerity of some women in this respect is wonderful. They rush in where angels fear to tread. Hastily judging from a few symptoms that a case resembles one which the family doctor has treated, they will hunt up an old prescription and administer the dose to some contending husband or helpless child. I could tell you some amusing stories of the mistakes that are made in this way, as well as some instances where more serious consequences resulted. Take, for illustration, a headache. It may come from a dozen different causes—from hunger, from indigestion, from overexcitement of the brain, from eating too much, from inhaling foul air. The remedy for a headache varies with its causes. Yet you will find women who have a universal panacea for headache, regardless of the cause. Beware of such women."

"With what medicines is the most harm done?"

"Opium and aperients. The heedlessness with which morphine in various forms is now administered in families is alarming. The doctor comes to attend a patient who is in pain. He prescribes morphia, and directs its use, and the patient is relieved. This is enough to start the average matron on a course of self destruction with morphia. The next patient may be of a different temperament, or sex, or age, requiring either a different kind or quantity of the opiate, but the old prescription will be used, or, worse than all, will be revived from memory. Some drug stores watch carefully, and refuse to dispense such drugs without a prescription in every case; but there are many too eager to make money and to care much whether the patient is being treated by a doctor. The same is true of the use of bromide, of chloroform, and of ether. The bottle that is left partly filled in a family after one patient has been treated is pretty sure to be used for another without the doctor's knowledge. Aaforparagoric and laudanum, the amount of stupefaction that is practiced upon children by their use is so common as almost to come by unnoted attention. Perhaps the child is naturally peevish, or is cutting teeth, or has some infantile ailment; out comes the paragoric or soothing syrup bottle, and before long the small dose ceases to have effect. Then large doses are given, until the unfortunate youngster's system is saturated with the drug and totally deranged. Sometimes the lazy and dishonest nurse, to relieve herself from trouble, administers the anodyne on her own responsibility, and the hapless child shows a dullness and stupidity for which nobody can account."

#### ARMY OF THE POTOMAC.

ON THE CHICKAHOMINY.

Under the date of May 8, 1863, Col. F. S. Tibbets, of Dover, N. H., sends us the following: "While on duty in the army of the Potomac in the swamp of the Chickahominy I contracted a complication of diseases that culminated in spinal trouble, paralysis on one side, and severe disease of the kidneys and bladder, and great urinal weakness. For a long time I was under the treatment of the best physicians, and tried many of the so-called remedies, but received no permanent benefit. When I was in the drug business in Boston I heard favorable accounts of the efficacy of Hunt's Remedy for diseases of the kidneys and urinary organs, and having decided to give it a trial, I purchased from at Wingate's drug store, Dover, N. H., and have received great benefit from using it. The severe pains in my back are removed, and I am able to sleep soundly and obtain rest at night—which for so long a time I could not do, and the weakness in the urinary organs has been relieved, and I greatly regret that I did not test the merits of Hunt's Remedy when I was first taken sick, as an accident it would have saved me from several years of suffering; and I am more strongly convinced of the after hearing of the most remarkable cure effected by Hunt's Remedy in a case of Bright's Disease here in our midst in Dover, after the patient had been pronounced incurable by celebrated physicians."

Mr. Tibbets is a retired druggist, formerly located in Boston, and is a thoroughly reliable citizen.—Cov. Ed.

#### U. S. POSTAL SERVICE.

H. S. Whitney, assistant postmaster, Putnam, Conn., writes May 8, 1885: "I have used Hunt's Remedy with the best results. I have suffered untold agony for eighteen months with kidney and liver complaint; my water was very bad, at times I actually passed blood. This was followed by general prostration. My business requiring me to be on my feet most of the time made my case worse. I was advised to use Hunt's Remedy by a friend who had been cured by it, and can truly say that it has benefited me more than all the medicines I have used. I consider it the best medicine for kidney and liver troubles, and cheerfully recommend it to all."

### SHORT LINE.

## 50 Years.

I have known and watched the use of Swift's Specific for over fifty years, and have never known of a failure to cure Blood Poison when properly taken. I used it on my servants from 1850 to 1865, as did also a number of my neighbors, and in every case that came within my knowledge it effected a cure. In all my life I have never known a remedy that would so fully accomplish what it intended to do.

H. L. DENNARD, Perry, Ga.

I have known and used Swift's Specific for more than twenty years, and have seen more wonderful results from its use than from any remedy in or out of the Pharmacopoeia. It is a certain and safe antidote to all sorts of blood poisons.

J. DICKSON SMITH, M. D., Atlanta, Ga.

#### The Great Drug House of Chicago.

We do not hesitate to say that for a year past we have sold more of Swift's Specific (S. S. S.) than other Blood Purifiers combined, and with most astonishing results. One gentleman who used half a dozen bottles says it has done more for him than any treatment which cost him \$1,000. Another who has used it for a serious affection reports a permanent cure from its use.

VAN SHACK, STEVENSON & CO. \$1,000 REWARD.

Will be paid to any Chemist who will find, on analysis of 100 bottles of S. S. S., one particle of Mercury, Iodide Potassium, or any mineral substance.

THE SWIFT SPECIFIC CO. Drawer 3, Atlanta, Ga.

Write for the little book, which will be mailed free.

Price: Small size, \$1.00 per bottle. Large size (holding double quantity), \$1.75 a bottle. All druggists sell it.
