

WORK OF THE FLAMES

A Fire in San Francisco Causes Nearly a Million Dollar Loss.

AN IOWA TOWN OBLITERATED.

Baltimore Visited by the Largest Conflagration It Has Known For Years—Canadian Paper Mill Destroyed.

San Francisco's Big Blaze.

SAN FRANCISCO, April 30.—Shortly before 4 this afternoon fire broke out in the basement of L. & E. Emanuel's furniture establishment on Market street, between Third and Fourth streets, and rapidly spread to A. L. Bancroft & Co.'s stationery and publishing establishment on the corner of Third and Fourth streets, which is five stories high, and gutted the entire contents consumed. The fire spread to adjoining smaller buildings, a number of which, with their contents, were also destroyed. The total losses are estimated at three-quarters of a million dollars. A. L. Bancroft & Co., building, \$150,000; insurance, \$70,000. Stock and plant, \$200,000; insurance, \$120,000. E. M. Emanuel, stock, \$120,000; insurance, \$20,000. Losses on the surrounding buildings and contents, \$20,000. Very little was saved. The fire was caused by the falling wall of Bancroft's building while endeavoring to escape from the building. The factory in which he was employed. A number of others are reported killed and several seriously injured.

Heavy Loss in Iowa.

CHICAGO, April 30.—The Daily News Key-stone Iowa, special says: The postoffice and other buildings were destroyed by fire last night. The fire spread rapidly and it was with great trouble that the postoffice records and mail matter was saved. Much of that destroyed was unimportant mail matter. The fire expended itself after destroying the business portion of the town.

Cedar Rapids, April 30.—A Republican school on Key-stone places the loss by the fire to-day at \$25,000 to \$40,000. All the houses in town except three were destroyed.

A Scooper at Baltimore.

BALTIMORE, April 30.—The most disastrous fire that has taken place in this city in many years broke out shortly after 7 o'clock to-night in the five-story warehouse, 519 West Baltimore street, occupied by S. W. Ploss & Co., wholesale grocers. The flames spread with remarkable rapidity, and the entire fire department was called upon. But the brick wall carried the fire to the addition, buildings, and they were badly damaged before the water could exert its influence. The total loss cannot be less than \$200,000. The insurance of about two-thirds of that amount. The origin of the fire is unknown.

A Paper Mill Burns.

LINDSAY, Ont., April 30.—The Seuzog paper mill was burned to-night. Loss, \$35,000; insurance \$30,000.

JAY GOULD'S PLAN.

Gratuitous Advice to the Workingmen of the Country.

NEW YORK, April 30.—(Special Telegram.)—The Times this morning has a three column interview with Jay Gould. While he professes to believe in labor organizations generally, he finds nothing but evil in the strike methods of the Knights of Labor, which, he says, he has found to be a stirrer of strife and breeder of discord. He speaks of the strike on the Missouri Pacific as causing only momentary annoyance and says the final result does not displease us. We have compact organizations manning our property. We are not to be intimidated by a strike. I look for little immediate good to anybody, least of all to the working people, who are directly and vitally interested, from the species of agitation that is now shown to us most conspicuously. The workingmen, so far as we see them, are in the bodies of the stamp of the Knights of Labor, are doing themselves an inestimable amount of harm. Organized labor, as we get a presentation of it, is in the wrong path. Unscrupulous and designing leaders are blinding the masses. Properly organized, the laborer must be a stronger man, more thoughtful, and a better citizen. I think the true mission of labor organizations should be to properly educate their members and weed out black sheep and provide an insurance scheme whose benefits would be worth having.

The Congressional Committee.

ST. LOUIS, April 30.—The congressional committee went into executive session, last night the greater part of the morning. Immediately after adjourning, the committee gave a list of names of the most prominent men in St. Louis to the sergeant-at-arms and requested him to see that they were present at a meeting to be held this afternoon, when the taking of testimony will begin.

Iowa's High School Contest.

DES MOINES, Ia., April 30.—The eighth annual high school contest, which was held in this city to-night. The first and second prizes for dramatic reading were awarded to Miss Rose St. John, Des Moines, and to Miss Cora Lee, Des Moines. The prize for humorous reading was given to Hattie Connor, Des Moines.

Nominations and a Veto.

WASHINGTON, April 30.—The president sent the following nominations to the senate to-day: Postmasters—At Fort Snelling, Minn., Joseph J. Curtis; at Baltimore, Md., Frank Brown, vice J. F. Vezev, resigned.

A Bloody Double Tragedy.

MATTOON, Ill., April 30.—William Gallamore yesterday inflicted fatal wounds on Mary Sargent and her son, John. Both will die. Gallamore is said to be a half-witted young man and has been annoying the girl with lover-like profligacies some time.

A Petition for the Pardon of Fife.

NEW YORK, April 30.—A petition is being circulated in this city asking the pardon of James D. Fife. The petition is said to be signed by over 900 depositors of the Marine bank and by many officers of banks in this city and throughout the country.

Two at a Jump.

WASHINGTON, April 30.—Loren Somerfield, white, and Riley J. Lee, colored, were hanged in the city jail at 11:30 this morning. The crime for which Somerfield died was the murder of his son-in-law, Gottlieb.

A Day Throttled.

Hudson, N. Y., April 30.—Giuseppa Soopa, the Italian convicted for the murder of Antonio, was hanged in his cell at 10 o'clock last night by hanging.

Cora Lee Still Living.

ST. LOUIS, April 30.—The Post-Dispatch's Springfield, Mo., special says: "The statement that Cora Lee was dead, sent from here last night, is mistaken."

Thanks for the Gift.

ROME, April 30.—The pope has sent an autograph letter to Emperor William thanking him in a very courteous manner for the recent gift of the gold cross.

The Week's Failures.

NEW YORK, April 30.—The total number of failures in the country during the last seven days was 207.

The Stock Yards Hotel.

Since the completion of the large four-story brick hotel and exchange building at South Omaha, there have been a good many inquiries as to the future management of the hotel. For some reason the stock yards company have kept it very quiet. At one time it was rumored that the Pacific Hotel company would run the hotel, but it is now claimed that the house will be leased by George Canfield.

Uncle Sam and His Servants.

The new distribution of mail in the postoffice, made necessary by the recent increase in the number of our letter carriers, was attempted last night for the first time. It worked slowly, of course, but as time advanced the mail will become more expeditiously delivered, especially themselves to the new order of things. To-day the new carriers will appear with their bags for the first time.

A Regular Jacob Law.

CITY OF MEXICO, via Galveston, April 30.—A law for the immediate execution of railway train wreckers, when apprehended in the act, was passed in the house of deputies to-day.

Hung in Private.

JACKSONVILLE, Fla., April 30.—James Walker, colored, was hanged in St. Augustine to-day for the murder of Charles Harper November last. The execution was private.

MALLABEU UNIVERSITY.

The New Methodist College Just Located at Indianapolis.

Views on the Viaduct.

The Cable Company Makes a New Proposition to the City Fathers.

Weighty Corporate Cares.

The Curbing Question—New Ordinances—Changes of Grade—Sidewalk Resolutions—Municipal Matters in General.

Petitions and Communications.

A full board was present. From the mayor, approving the bond and sureties of John G. Riley for the construction of sewers in districts 24, 25 and 27.

Same approving bond and sureties of Mount Griffin for the construction of sewers in districts 26, 29 and 28.

Same appointing paving and curbing inspectors as follows: Of paving—J. V. Callahan, H. G. Hume, Geo. L. Dennis, L. B. Wesley, Jacob Scholte; of curbing and guttering—B. Kemmeling, D. Kenyon, C. H. Haman, of sewers—D. Sullivan, L. Polansky, M. Weisberger. General inspector of streets—G. Malley.

Paving, guttering and curbing. From board of public works giving estimate of James Fox for grading Harney street from Fifteenth to Twentieth streets, and from Twentieth to west line of McCallish addition for \$1,477.37. Approved and ordered paid.

From John Hall, calling attention to a defective sidewalk on Williams street between Sixth and Seventh streets, Streets and alleys.

By Bally—Giving permission to the owners of lots 3 and 4 in block 8, to erect a coal yard and office in said property.

Same—Instructing the gas company to erect street lamps on Nineteenth street and on between Sherman and Adams and Clark streets. Gas and electric lights.

Same—That three members of the city council be appointed and instructed to appraise all public property in the city at least once a year or oftener if ordered by the council. Adopted.

Same—That the committee on streets be instructed to raise the cross walks on the south side of California street, across Fifteenth and Fourteenth streets, and a new crosswalk on Eleventh across Chicago street. Streets and alleys.

By Lowery—Changing date of committee meetings to Friday to Saturday evenings. Adopted.

REPORTS OF COMMITTEES. Police—Recommending passage of the ordinance amending sec. 1, chap. 2 of the general city ordinance. Adopted.

OBEDIENCES. Providing change of grade of Twenty-fourth street from south curb of Harney to north curb line of St. Mary's avenue and a part of Howard street. Passed.

Establishing the grade of Twenty-fourth avenue from St. Mary's avenue to Howard street. Passed.

Amending section 3 of chapter 2 of the city ordinance, and providing for the punishment of parties guilty of abusing dumb animals. Passed.

THE VIADUCT QUESTION. Was introduced and the council went into a committee of the whole to consider the matter, with Alderman Lee in the chair.

Mr. Hascall, representing the Cable Car company, presented the following proposition: To the Honorable Mayor and the City Council of the City of Omaha:

It is hereby proposed by the Cable Tramway company of Omaha to give to the city of Omaha the sum of \$20,000 to provide room for the Eleventh street viaduct, proposed to be built for the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and vehicles which will pass and re-pass on the viaduct, and to be so constructed as to accommodate the passage of the cars of said company over said proposed viaduct, provision to be made for the passage of said cars over the same so as not to interfere with the water and
