The Influential Combination of Hospitalists is Apparently Satisfied.

NO FURTHER FAILURES ARE REPORTED.

Wall Street Rights Itself After a Most Memorable Flurry—Hears Afer Still Outside of Their Holes.

NEW YORK, Nov. 13.—The stock market today, while still very active, showed less excitement in early trading and afterwards subsided into the ordinary appearance, with only the usual fluctuations. The general feeling in the street has undergone a marked change for the better, and the opinion of most habitues of the street is that the object of the influential combination of hospitalists which has forced the recent decline has been accomplished, and with the effecting of the reforms in railroad business now proposed there will come a general improvement in values. The late reaction from low prices two days ago is regarded as principally the effect of the covering of shorts, together with some buying by those who had thrown their holdings over on the first. There were no further failures or bank suspensions to disturb the even course of events, but the bears demonstrated the fact that they have not as yet gone into their holes, and are still very much alive. The natural tendency of prices to advance after the late severe drop was checked while fluctuations were on a comparatively small scale, they were in fact very material, though final changes were in most cases for fractional amounts only.

The stock market today felt the influence of the suspension of the North River bank and the disclosures in regard to the North American company, and first prices were generally fractions lower than yesterday's final figures. A flood of North American stock was dumped upon the market in the first few minutes trading and the price dropped suddenly from 16 to 2, a loss of 11% per cent from last night. Although some of the others sympathized with this weakness the market outside of North American was not specially active, and with the absence of special pressure to sell, there came a general reaction, North American stock fell to 11 1/2 and settling to about the level of 11 for the remainder of the hour to 11 o'clock. A confident feeling was shown, and the activity increased towards the end of the hour, while prices advanced more rapidly, the gains over the lowest prices of the early decline being 10%.

At noon money was at 12 per cent. Active business was sustained in the stock market after 11 o'clock, but the high prices of the first hour were not maintained, and the decline tendency developed, but only a portion of the early advance was lost. The Illinois was the most active, but St. Paul and other stocks were prominent. Later in the hour North American reacted to 9, but the general list was active and steady, and the market was better than at the opening.

After 12 o'clock stocks were quiet and firm. The bear prices were not maintained, and reached a decided weakness developed to 2, however. Sugar futures rose to the leader, dropping from 68 to 64; St. Paul to 10 1/2; Northern Pacific to 10 1/2; Atchafalpa to 10 1/2. After some hesitation the decline was resumed. Union Pacific advanced to 11 1/2, and other stocks followed. The market at 11 o'clock was active and strong at the highest figures of the hour.

HAD BECAUSE HE GOT LEFT.

A Stranger Empties Two Revolvers at a Station Agent.

NEW YORK, Nov. 13.—(Special Telegram to The Bee.)—J. P. Rapelye, assistant station agent at the New York station of the Long Island railroad, had an experience on Tuesday night which he is unlikely to forget soon. While in charge of the station at about 11:45 p. m., after the last train had gone to New York, a well dressed man entered and inquired if the last train had gone. On being told it had he became abusive, declaring the train had left about five minutes ago, and a special train run for his benefit. Rapelye tried to explain that the train had not left, but the man had left about five minutes ago, and two long revolvers from his pocket and leveled them at Rapelye's head. Thinking he was not in earnest Rapelye jokingly asked the man to come forward, but the man held the guns close to his head and fired, the bullets came through the glass window on the opposite side of the office.

There seemed to be an unaccountable desire on the part of the man to murder, and he was not molested, but other citizens insisted that such lawlessness should not be allowed to go unpunished. Cooker is now in jail in custody of the sheriff.

Improvements at Claramont.

CLARAMONT, Neb., Nov. 13.—(Special Telegram to The Bee.)—The Chicago, St. Paul, Minneapolis & Omaha railway company opened a fine new depot at this place yesterday with an ample track and stock yards, with George H. Peavey & Co. have located an elevator here and Shumway & Everett have opened a large lumber yard. The railway company has located a new engine house at this point. O'SULLIVAN'S CONFESSION.

The Oeman Tells What He Knows of the Cronin Murder. CHICAGO, Nov. 13.—What purports to be a statement from Ieman O'Sullivan who is now in Joliet prison for complicity in the Cronin murder regarding his connection with the case, told to a intimate friend, will be published here tomorrow. O'Sullivan is represented as saying he was in ignorance of the intention to kill the doctor, having been repeatedly assured by Coughlin that the purpose was to secure from Cronin documents valuable to the Irish cause and of which Cronin was treacherously in possession. But he is not to be taken at his word. O'Sullivan was in the Cronin cottage as the doctor drove up, but O'Sullivan not liking the doctor, who had money with him, he decided what to do. When Cronin got up his mind and returned Cronin was lying on the floor apparently dead. Coughlin came in and O'Sullivan threatened to shoot him. The Ieman claims to have then left the cottage. It is not stated that the confession is a written one, but it is believed that it has been several days in the possession of the Cronin family.

IOWA NEWS.

Major Anderson Will Contest.

SIENENDOAH, Ia., Nov. 13.—(Special Telegram to The Bee.)—Major A. D. Anderson, late democratic candidate for congress in this district, has written a letter to Chairman R. Roth of the Eighth district, in which he says: "It is reported that the official canvass of the boards of supervisors of the several counties in this district gives Flick a majority of about one hundred on the face of the returns. Be this majority what it may, I am in possession of information, especially from trustworthy sources that it was obtained and is the result of the most glaring and brazen fraud perpetrated in this state. My friends from the various counties feel that the election of Mr. Flick has not been procured by legal and fair means and cannot be regarded as legitimate. It is the will of the people fairly expressed and will prevail. In view of the knowledge I have of the means employed to defeat the will of a majority of the voters of this district, I feel it a duty I owe them and myself to make a contest."

Has an Amusing Effect.

DES MOINES, Ia., Nov. 13.—(Special to The Bee.)—The innovation of Governor Boies and his private secretary in substituting the latter's signature for that of the secretary of the state in the Thanksgiving proclamation has an amusing effect. It is stated that several of these worthy democratic officials, the private secretary to the governor is not recognized in law except in the provision made for his salary, and the document he has just signed has now got the significance of a letterhead of a private secretary. It is a character. This being the case, it will not be filed with its predecessors in the last quarter of the year. The department of the state is under the impression, however, that the official cognizance of it. The laugh is evidently on the occupants of the executive office of the great state of Iowa.

FIFTY MILLIONS LACKING.

Appropriations for the Current Fiscal Year Fall That Much Short.

AN IMMENSE SUM GOES FOR PENSIONS.

Report of the Secretary of the Interior—Effect of the McKinley Bill—Consultations as to the Poor Indian.

WASHINGTON BUREAU THE OMAHA BEE.

The secretary of the treasury is experiencing more or less difficulty in preparing his annual estimates. He can figure out pretty accurately what the expenditures for all the departments will be for the next fiscal year with the exception of the expenditure on account of pensions. This is one of the problems yet to be solved. The present indications are that the appropriations for the current fiscal year will fall short more than \$50,000,000, and although \$10,000,000 were paid out on account of pensions yesterday, it is hardly probable that this sum will carry the pension payments over beyond January 1. Besides this the secretary is unable to get out any very close estimates as to the probable receipts for the fiscal year. The changes in customs duties made by the McKinley bill will have a greater or less effect upon the imports. There are several million dollars worth of goods in the warehouse, and the departments will be for the next fiscal year with the exception of the expenditure on account of pensions.
