TORURING ECZEMA

Editor Iowa Plain Dealer. Cured of Insufferable Itching and Pain by the Cuticura Remedies.

No Less Than Five Physicians Consulted. Their Combined Wisdom Followed Without Benefit.

I am sixty-six years old. In August, 1890, was troubled with the peculiar skin disease to which people of my age are subject, known among medical men as eczema. Its first appearance was near the ankles. It rapidly extended over the lower extremities until my legs were nearly one raw sore. From legs the trouble extended across the hips, shoulders and the entire length of the arms, the legs and arms greatly swollen with an itching, burning and smarting sensation. Although the best medical advice attainable was employed, no less than five physicians of the place being consulted and the prescribed treatment followed, it was not until I began the use of CUTICURA, following the simple and plain instructions given with the Remedies, and in four weeks found myself well with skin soft and natural in color, the itching and pain entirely relieved. THE NICKEL DEPOSIT STAMP, A NEW SYSTEM OF BANKING FOR LITTLE FOLKS.

Hundreds of boys and girls of Council Bluffs have spent many pleasant and profitable hours collecting postage stamps and pasting them on the sheets prepared for the purpose of accumulating the collections, but an opportunity will be given them hereafter to spend their small earnings and time a good deal more profitably and make collections of much more handsome stamps than those that carry our letters over the world.

The new collection will afford as much amusement as the old popular fad and the reward will be a great time and a greater one. The State Savings Bank people of this city are the gentlemen who have made it possible for the little folks to open bank accounts while collecting sheets full of handsome stamps, each stamp representing a nickel. But the nickel is not lost when it is placed in the form of a stamp in the collection, but on the contrary is simply put to work earning other nickels which are given in the form of stamps. Read this carefully and you will know how it is done.

The State Savings Bank, located at 418 Broadway, has left little blank books, cards and the stamps at a number of places in various parts of the city, and when the stamps are pasted in the books they represent 5 cents each. When you wish to open a nickel deposit account you go to any one of the stores named below and buy one or many stamps as you have nickels to spare, and are given a deposit stamp book. Each page of this book is divided into twenty spaces, each the size of the 5c stamp, and you paste the gummed stamps in these spaces. When all the squares on the leaf are filled the page represents \$1.00. In the back of the book are attached a number of little slips for you to write your name on. You take the book to the bank and then tear out the leaf with the signature slip attached and file it away and give you a deposit card showing that you have deposited \$1.00. You then begin to fill another page with the stamps and when it is full it is taken to the bank in the same way and your card represents \$2.00. These cards are handsome and durable, printed in silver bronze. Just as soon as your card represents \$5.00 the bank issues you a regular deposit bank book. If you need your money you can draw it out at any time, either while you are filling the cards or after you get into a regular deposit book, but it draws 5 per cent interest, and the longer you let it stay the faster it grows. If you should happen to lose your deposit book you would not lose a single nickel you have deposited, but you must be careful not to lose it, for it will make extra work for the bank.

The following are the names of the merchants where you can buy stamps whenever you have a nickel to spare: L. C. Brinkett, Druggist, Hardware, James D. Stuart, Doll G. Morgan, O. H. Brown and E. C. Brown, South Main, F. W. Houghton, E. M. Hubbard, grocery, East Broadway, R. Johnson, grocery, High avenue and 8th street, and E. E. Adams. All of these men are agents for the bank and they have joined in this great enterprise without pay in order to help the boys and girls of Council Bluffs and vicinity to begin to save their nickels and pennies. Every nickel you get hold of instead of dropping it in your toy banks or spending it for candy or chewing gum, take it to one of these places and buy one of these handsome stamps and you will see how soon your nickels will grow into dollars and your dollars into larger sums.

Grown people as well as children will find it pleasant and profitable to furnish their spare nickels where they won't get away. The savings bank represents the surest way of saving small sums, and one nickel deposited each day will represent a fortune at the end of twenty years. It has been well said that the true secret of elevating the people is to make them the agents in bettering their own condition. That the condition of the people is very materially improved by habits of industry and economy needs no proof. Children can be taught habits of economy as readily as they can be taught their arithmetic, and this new stamp deposit system has received the commendation of the highest education in the land. In many eastern cities it forms a part of the pupil's education. By teaching a boy to lay by money for future contingencies you train his mind to reflect habits that will command credit and credit is capital.

Council Bluffs is the first city in the west to get this splendid new banking system, and the boys and girls of the city, as well as the merchants, will take great pride in keeping it in the land.

A bargain if taken at once, inside property, nearly new eight room house, good barn, for \$1,000 on monthly payments or otherwise. C. L. Waller, 103 Pearl st.

Found of tea and fine Jap. Paper, 735 Lund Bros.

Mandel & Klein sell furniture, carpets, cooking and heating stoves at cost to quit business.

Viewing the City. About fifty delegates to the Transmississippi congress, which has just finished its session at Omaha, spent yesterday forenoon looking over the Bluffs by invitation of the Council Bluffs and Omaha Bridge company.

When they arrived on this side of the river they were met by a number of prominent citizens who joined them on their excursion. They were taken all over the city as far as the water line went, and among the places visited was Farmington park. Park Commissioner Garrison, acting through the park and had the delegates climbing over the hills and down the valleys in a way that surprised them. They were highly pleased with the looks of Council Bluffs, and especially with the park.

The United States fish commissioner will distribute at various points in the Mississippi valley fish for propagation indigenous to that section.
