

MOULT FARMING DOESN'T PAY

Result of the Inquiry Made by the Labor Commissioner.

POLITICS FIGURE IN THE STATISTICS

Information Intended to Edify the Public Theoretically with Popercattle Dogma and Free Silver Fallacies.

LINCOLN, July 8.—(Special.)—The deputy labor commissioner recently sent out blank forms to farmers in all counties of the state, asking for information relating to farm labor, value of land, profit in farming and suggestions as to what legislation would be beneficial to the farmer.

While the department of the labor bureau is claimed to be strictly non-partisan, evidence has been obtained to show that this "bureau of statistical information" is being utilized as a political scheme to prove that the farmers of Nebraska are clamoring for free coinage.

It is thought that the populist farmers of that county do not get the best of the deal, but by saying that farming does not pay, and that there is no alternative to it, but their answer on display.

A conservative estimate of the crowd that will be here is 5,000. The famous York Military Concert band will render a fine program of high-class band concert music.

Hot Summer Following the Wet Spring Makes Crops Grow. The thermometer today registered 110 degrees in the shade.

The thermometer today registered 110 degrees in the shade. A hot wind has been blowing all day. While it has not as yet injured the crops, grave fears are entertained that unless it rains in a day or so the corn will suffer.

Some Operators Confess the Situation is More Serious Than They Had Anticipated It Would Be—Contract Men Quit.

PITTSBURGH, Pa., July 8.—The close of the third day of the miners' strike finds the diggers gaining strength rapidly in the Pittsburgh district, elating the officials and men correspondingly.

Nineteen thousand men are idle; an almost total suspension of work in the mines along the Monongahela river; suspension practically total on the Wheeling division of the Baltimore & Ohio railroad, only about fifty men working there.

The situation as to the supply of coal cannot be called serious as yet, because there is a surplus of coal in the mines. The situation as to the supply of coal cannot be called serious as yet, because there is a surplus of coal in the mines.
