

PLAN FOR THE CONVENTION

Teachers' Congress for the Exposition
Outlined in Detail.

COMMITTEES TO HANDLE PRELIMINARIES
General Committee Decides on the
Division of Labor and Names the
Jobs Which Will Look
After Affairs.

The preliminary plans for the educational congress to be held in Omaha next June in connection with the Transmississippi Exposition were perfected at a meeting of the general committee which was held at the office of Superintendent Pease in the city hall last night. The general outline of the working organization was agreed on and the committees which will have active participation of the work were selected and approved. There were present Superintendent Pease, Victor Rosewater, Secretary of the Commercial club, Superintendent A. A. Munro of South Omaha, State Superintendent Jackson, J. M. Gillan and Superintendent J. C. Hisey of Council Bluffs. The general outline of the proposed organization was submitted by Superintendent Pease in behalf of the general committee which was appointed at the previous meeting to consider the subject. It provided that the enterprise should be divided into five distinct departments, each of which should be in charge of a committee of three members and to be known as the committees respectively on finance, transportation, entertainment, program and publicity. The chairman of these committees are to constitute the executive committee which will have general charge of the operations of all committees, approve all plans which involve the expenditure of money and decide on all general plans of procedure. The recommendation was discussed at some length and finally adopted. The committees were the following: Finance—W. R. Jackson, Isaac Carpenter and J. H. Dumont. Transportation—J. E. Utt, W. N. Hebecek and J. E. Baum. Program—C. G. Pease, George E. MacLean of Lincoln and J. C. Hisey of Council Bluffs. Entertainment—J. M. Gillan, C. H. Grant and A. A. Munro. Publicity—Victor Rosewater, Miss Anna Pease and R. C. Jordan.

It was also understood that the committees should be authorized to appoint subcommittees as might be necessary to carry on different lines of work with the approval of the executive committee. It was decided that the congress should occupy three days, but the date was left open to be fixed by the executive committee. At the first meeting of the executive committee next Tuesday the finance committee will be expected to submit a detailed statement of the prospective expenses and possible resources of the convention and the other committees to outline their work.

AMUSEMENTS.

Yesterday afternoon the Orchestral society gave its fourth concert at Boyd's theater under the direction of Franz Adelmann. The audience was larger than heretofore. Mr. Adelmann has improved in his conducting and controls his men, as a general thing, successfully. His interpretations are somewhat superficial whenever he ventures outside the realm of popular music, and he misses many important points of expression. In his conducting he was frequently too slow, but he obtained a fine effect in the Toreador episode, where the violins have a rapid upward scale, by accompanying the orchestra on the tree in the ensemble. The work of the strings was very good in the "Ruy Blas" overture, but the brass seemed at times to think they were the only peaches on the tree.

The sonata in G minor by Grieg, reviewed at length in last Tuesday's Bee, was on the program yesterday. Its greatness is more apparent as the performance progresses. It is hoped that he will play it once more, at his next concert, when he will have the assistance of Mme. Muentzinger. Yesterday, that part of the program which was composed by the composer to the piano was quite lost, even the notes not being audible at times.

The playing of the members of the orchestra is worthy of commendation. The musical people of Omaha will hardly find a more satisfactory way of spending an afternoon than by hearing these concerts. May the patronage of the orchestra be increased.

The next concert is announced for Friday afternoon at 3 o'clock, January 28, and Mme. Muentzinger will be the soloist.

Walker Whitehead's engagement, which begins tomorrow at Boyd's, will include four evening performances of a matinee on Wednesday, "Hamlet"; will be presented Sunday and Wednesday nights, "Richard III," Monday, "Othello" Tuesday, and "The Merchant of Venice" at the matinee.

On Monday afternoon, at 4 o'clock, Walker Whitehead will deliver a free lecture on "The Merchant of Venice" at Creighton hall.

The engagement of "A Boy Wanted" at Boyd's will terminate with a matinee and evening performance at Boyd's.

By reason of an error in the theater program, the prize described by John W. West was bestowed upon Walter L. Mack, in the notice of "A Boy Wanted," which appeared in these columns yesterday.

The Woodward company plays two performances of "Jim, the Westerner" today. Tomorrow the second week of the season begins with a matinee and evening performance of "The Silver King." The specialties this week will include the Morris trained poodles, the Van Aukens and Stanley and Jackson.

SELL LIQUOR WITHOUT LICENSE.
Steps Taken to Prosecute
Bloemer and Others.

Complaint was sworn out in the police court yesterday, charging Fritz Bloemer, 1601 Leavenworth street, with selling liquor without a license. Bloemer was arrested at 5:30 and released on his own recognizance. A protest had been filed against Bloemer's application before the license board, which was overruled by that board. A test case will be made of this and if conviction follows in the district court Bloemer will be barred from securing a license in the year 1920.

Protests were filed before the license board yesterday afternoon by E. Rosewater against the issuance of licenses to twenty-five candidates.

DEMAND IS FOR LEAN HOGS

Change in Requirements of the Packing
Business Noted.

MISTAKES FARMERS MAKE IN FEEDING
Superintendent Kenyon Gives Some
Information for the Benefit of
Swine Raisers of Iowa and
Nebraska.

W. J. C. Kenyon, manager of the Union Stock Yards company, has inaugurated a demand for lean hogs. The stock raisers of the west are being asked to supply the market with hogs that are wanted and no trouble is experienced by the packers in obtaining anything and everything that is required to fill the demand of beef eaters. What one section does not produce some other does, so that the packer can obtain heavy corn fed hogs or what are known on the market as "fatty" hogs from the feeders of Nebraska, Iowa and Missouri, while from the western states come western grassers during the late summer and fall and still further along in the season bay or alfalfa fed westerns, and the supply can be supplemented by the thin carcasses from Texas or Indian Territory.

With hogs the situation is somewhat different and the growers of swine either do not appreciate fully the situation, or else are not prepared to meet the demand which they already have. During the last few years there has been a decided change in the character of the demand for hogs that would have filled all requirements in the past are no longer the best sellers. There was a time when thick and heavy pork hogs seemed to have the lead in the market, but the public appetite has apparently changed.

LEAN HOGS IN DEMAND.
Thin and rather lean hogs and small and light hams are given the preference now and the demand for the meat of the hog is further increased by the growth of the export trade which calls for that thing only.

A hog bodied, slim hog, weighing 200 or 250 pounds, is the hog that is wanted to produce that kind of meat, and for that reason has come to be known very generally as the lean hog. The English, who are the best customers of the hog, do not want any other and the same demand is constantly growing. At the same time the various substitutes for lard, such as cotton seed oil, have diminished the demand for the over-grown lard hog.

At the present time the bacon hog is produced only to a very limited extent outside of those states which have a large hog industry, Missouri and Arkansas, but the farmers of Nebraska and Iowa, located in the heart of the corn belt, grow almost exclusively heavy, tacking or lard hogs.

The reason for this condition of affairs is very plain. In the states where corn is not overly plentiful the hogs do not mature so rapidly and do not reach the market weight, while in the states where corn is both plentiful and cheap the farmers feed all that they can eat and the result is large and fat hogs. It is the fact that the hogs are fed unlimited food supply but all the advantage in this arrangement, but a more careful examination of the results may prove otherwise.

WHERE THE FARMER LOSES.
In the first place the demand for bacon hogs, as noted, is greater than for heavy hogs and consequently the light hogs bring the most money. The heavy hogs, of the grades amounting to 10 to 20 cents per hundred pounds, according to the state of the market. The Nebraska farmer, when he grows a heavy hog, is not able to sell well for bacon hogs, say 250 pounds each, reasons that by keeping them a little longer he will add a hundred pounds to their weight, and as the market price is a large hog he will get a larger price. He has gained a hundred pounds in weight which is sufficient to make a difference of \$10.00 in the price. By doing that, however, he runs greater risks of loss from disease, as the larger and fatter the hogs become the more susceptible they are to disease. The loss from that one disease in the corn belt runs into the millions of dollars every year. The heavy hog is also a difficult animal to ship to market, as he is very heavy, clumsy and the losses in transit and at the loading and unloading points are also heavy. In handling them after their arrival at the market many of them are killed and the loss is sold at a lower price as carcases. All this tells heavily against the profits of the heavy hog grower.

On the other hand the bacon hog is of a harder breed, less likely to be attacked by disease, and sufficiently strong to stand the trip to market, which is a long one. When he reaches the market he is much better seller. It is a noteworthy fact that buyers almost always pick out the light loads of hogs before they pick out the heavy ones. Any are left it is almost always the big and heavy.

Mr. Kenyon believes that if the farmers of the corn belt in the west would carefully study what would come to the conclusion that they are making a mistake in not breeding some bacon hogs in place of all lard hogs.

The leading Malt Extract.
Malt-Nutria is the only really great extract of malt offered on the market. It is a so-called extract which really nothing better than strong black beer with a large percentage of alcohol and a very small percentage of malt. Such extracts should not be given or recommended to convalescents or strength-seeking people, since their merits are on the level and not in the bottle.

WELLS'S SKATING.
Prof. Al. Wells, the celebrated skater, appeared before a large assemblage at the exposition lagoon Thursday evening. He opened the performance on his ordinary skates, but then he put on his fancy tricks and contortion acts. He next appeared upon high still skates, maneuvering on them in a daring way. His feat in this act would be impossible to an ordinary skater on plain skates. When he waltzed and did the grotesque contortion acts, he was so agile on the stills it made the boys shout with delight. He then appeared on his wheels which were twenty inches in diameter and attached to each foot. One of the movements he performed on these wheels was going between four standards about a foot apart, each surmounted by a small flag, without knocking them down. He then, in the morning, afternoon and evening, at which time, when not otherwise engaged, he will give his attention to the women and children and new beginners.

Has a Suit in New York.
It is possible that Henry W. Yates, president of the Nebraska National bank, may soon go to New York to file in the suit of the bank against one Dwy in the state of New York, which is pending in the supreme court of the Empire state. The bank is suing the defendant for \$100,000. The suit arose out of the acceptance of a note. The case has been in the courts for two years and a decision is expected in the present session of the supreme court.

Decorate Each Other's Faces.
Larry Ryan and Charles McDougall, a couple of farm hands, who took in the whirl of the town last night, got into a dispute over a small amount of money, near Tenth and Howard streets, and eventually came to blows. McDougall wears a fantastically decorated eye as a result of the encounter and Ryan's face showed to little less advantage. As both men had been drinking, Judge Gordon assessed each \$5 and costs, which they will board out with the city.

Boston Green in Bad Shape.

SOUTH OMAHA NEWS.

and he is fast approaching the period of dissolution. Wednesday he fell out of the wagon which was used by the street gang for driving away and he was badly hurt. As a result of this his health has given up and he is now in the county hospital, but the officials refused. In order to secure medical treatment for the man, Captain Haze has filed a complaint against him charging vagrancy and Hosen examination.

MISS Maud Thiem on January 13 has been brought to Omaha from San Diego, Cal., where they are well known. Van Norman paid attention to Miss Thiem until his father, who is a wealthy physician of San Diego, objected and threatened to disinherit him. The young man later came here to study medicine. During the holidays Miss Thiem came east to visit relatives and the wedding followed. The couple are spending their honeymoon in Minneapolis, Minn.

Van Norman-Thiem.
CLEVELAND, O., Jan. 14.—The romantic marriage in this city of Vernon Van Norman to Miss Maud Thiem on January 13 has been brought to light. The home of both is at San Diego, Cal., where they are well known. Van Norman paid attention to Miss Thiem until his father, who is a wealthy physician of San Diego, objected and threatened to disinherit him. The young man later came here to study medicine. During the holidays Miss Thiem came east to visit relatives and the wedding followed. The couple are spending their honeymoon in Minneapolis, Minn.

Second Ward Improvement Club.
An improvement club has been organized in the second ward with J. M. Taylor as president and George J. Lovell as secretary. These officers are only temporary, as it is the intention to perfect the organization at a meeting to be held at Frank's hall next Wednesday evening. About twenty-five property holders signed the membership roll and the intention is to induce every property owner irrespective of politics to become a member. The second warders say they want better police protection, more fire hydrants, more streets and alleys graded and street car service.

Thurber Arranging for Convention.
W. R. Thurber of Oak will arrive today and will make some definite arrangements for the convention of Nebraska shippers which he has called to meet here on January 27. The local live stock exchange will offer the facilities of the members' hall and it is more than likely that the meeting will be held there. General Manager Kenyon of the stock yards company proposed that Mr. Thurber and the shippers every court yard and the rates charged will be fully explained to those interested.

Chance for a Box Party.
Mayor Enor is having some correspondence with a St. Louis manufacturer who is thinking of locating a box factory here. It is claimed that South Omaha is an ideal location for a box factory, as the city has a large packing, hogging and wholesale liquor dealers. The mayor expects his correspondent to be here on Tuesday next to look over the local conditions and determine whether the factory will be located here.

Quarantine Season Opens.
The federal quarantine season against splenic fever opens today and closes November 15. Cattle from inside the quarantine lines cannot be shipped except for immediate slaughter. The order, which goes into effect today, will not have any bearing on this matter, as for a long time cattle from infected districts are received here at this time of the year.

St. Martin's Night School.
Rev. Irving Johnson, pastor of St. Martin's Episcopal church, is still conducting his night school, which he established some time ago at St. Clement's mission in the Third ward. About one dozen boys attend the school, which meets every Monday and Wednesday evenings of each week.

A. O. W. Party.
South Omaha lodge No. 66 and Nebraska lodge No. 27, Ancient Order of United Workmen, will give an entertainment and illustrated lecture at Workmen hall this evening. An address will be delivered by Deputy Grand Master Workman O. J. Vanduyke.

Meale City Gossip.
The Odd Fellows installed officers last night. P. Perry, Twenty-sixth and L streets, is laid up with a broken ankle. The youngest son of Joe Mallender of Satory Mills park is seriously ill. Mrs. Charles Waterbury of Corley, Ia., is here, visiting Mrs. O. B. Hill. W. S. Derbyshire, one of Uncle Sam's mail carriers here, is on the sick list. Dr. J. A. Kelly is hustling for reappointment as health officer of the city. Mrs. Halpin of the Stock Yards company and Miss Della Devine were married last Wednesday.

Losses Forty Cents.
Laura Moore, a young colored woman, was arrested last night charged with the larceny of 40 cents from the person of Jesse F. Agnew. Agnew lives at 312 Fifth avenue. Council Bluffs, and made a pleasure trip to Omaha yesterday supplied with re-

Cudaby Company Goes into Montana.
A statement of its financial condition was filed by the Cudaby Packing company of Chicago with the county clerk and recorder in Anaconda, Mont., says the Standard. It shows that the company's assets are \$5,426,061.99, of which \$3,334,557.99 is real estate, \$1,347,425 in money loaned and \$74,069.74 in cash on hand. The liabilities are placed at \$1,335,961.99, the indebtedness being unsecured. A notice appointing an agent for Montana was also filed.

WHAT WOMEN NOW NEED

More Red Corpuscles in Their Blood--
Paine's Celery Compound.

Miss Frances E. Willard, who has been attending the world's convention of the W. C. T. U., says that better health for women is today a more urgent matter than woman's suffrage.

She says: "What women at present most need is a better supply of red corpuscles." From every section of the country, from Maine to California, come well-attested reports of women, bloodless, dyspeptic, nervous, seriously run down, and in many cases as weak as to be bed-ridden, who have been enabled to resume their places in the family circle and in social life—healthy, ready in action, and full of life.

The extraordinary virtue of Paine's Celery Compound to increase the proportion of red corpuscles in the blood is the source of its great power over all blood diseases, rheumatism, neuritis, kidney disease, such as aches, loss of flesh and general run-down condition.

These are the prices by which Paine's Celery Compound is able to build up health in the run-down body is not hard to understand when one observes how surely it disposes the basis of life to act regularly, how it increases the capacity to take and assimilate food, and regulates the nerves all over the body.

Miss Frances E. Willard, who has been attending the world's convention of the W. C. T. U., says that better health for women is today a more urgent matter than woman's suffrage.

She says: "What women at present most need is a better supply of red corpuscles." From every section of the country, from Maine to California, come well-attested reports of women, bloodless, dyspeptic, nervous, seriously run down, and in many cases as weak as to be bed-ridden, who have been enabled to resume their places in the family circle and in social life—healthy, ready in action, and full of life.

The extraordinary virtue of Paine's Celery Compound to increase the proportion of red corpuscles
