

CONVENTIONS OF THE WEEK

Some Changes Made in the Program of the National Nurserymen.

THREE BODIES THAT GATHER TODAY

Nebraska Retail Liquor Dealers, Burlington Master Mechanics and Heroines of Jericho Open Annual Conventions.

Some changes have had to be made in the arrangements for the national convention of the nurserymen's association. Those that were first made were based upon a lack of information as to the program decided upon by the national executive committee. It was supposed a preliminary meeting would be held today to temporarily organize the association. The first meeting, however, will not be before Thursday at the latest, beginning at 10 o'clock. The detail of securing a hall was left to Prof. F. W. Taylor, as no arrangements for a suitable place of meeting had been made by the executive committee other than to designate the Millard hotel. As there are just 24 members in the association, some hall large enough to accommodate so large a number as may be expected to be found. Prof. Taylor yesterday secured Creighton hall for the first meeting.

Another change is in the address of welcome. The name of President Gordon W. Wattlees of the Transmississippi Exposition was down on the program for this, but he left for Boston Friday and will hardly be back before Thursday at the latest calculation, so that he will not be here in time to take any part in the convention. Under the circumstances General Manager T. S. Clarkson will make the address of welcome. Following Mr. Clarkson's speech President Irving Rouse of the association will deliver his annual address and the reports of the other officers will be submitted.

Program is Now Planned.

According to the printed program the election of the new officers will be held at the next place of meeting to be selected and then several addresses will be given by prominent horticulturists and nurserymen, as follows: "Fruit Prospects in Montana," Prof. S. M. Emery of the Montana experimental station, Bozeman, Mont.; "Relation of Agriculture to the Exposition," Prof. F. W. Taylor of Lincoln, Neb.; "Is the Insect Agitation of the Day a Good or a Bad Thing?" Dr. J. H. Talmor, D. Hon. N. H. Albaugh, Talmor, D.; "A Little Matter of Business," Hon. C. L. Watrous, Des Moines, Ia.

It may be said all this cannot be squeezed into one day's session. The rest of the program has not been settled. The committee's explanation for this is that it had been thought best to leave the arrangement of the program to the convention as circumstances may suggest. The shortness of it is also excused on the ground that considerable time will be needed for the reports of the committee on legislation and the San Jose scale. The committee on legislation consists of C. L. Watrous of Des Moines, Ia., N. H. Albaugh of Talmor, O., Lewis Chase of Rochester, N. Y., and President Rouse.

The members of the national association are: President, Irving Rouse of Rochester, N. Y.; vice president, E. Albertson of Bridgeport, Ind.; secretary and treasurer, George C. Seager of Rochester, and executive committee, C. L. Watrous of Des Moines, R. C. Beckmann of Augusta, Ga., and F. H. Barnard of Omaha, Neb.

Members attending are: A. L. Brooke of North Topeka, Kan., Silas Wilson of Atlantic, Ia., and N. W. Hale of Knoxville, Tenn., constitute the committee on transportation, and the committee on tariff consists of W. C. Barry of Rochester, T. J. Harrison of Painesville, O., and Silas Wilson.

On Wednesday evening a meeting of the American Nurserymen's Mutual Protective association is to be held at the Millard hotel.

Delegates began to arrive at the Millard yesterday morning. Among the first were Captain Henry Augustine of Normal, Ill., Senator Henry M. Dunlap of Savor, Ill., and C. E. Greening of Greening, Mich. They went direct to the exposition and called upon Prof. Taylor at his headquarters in the Horticultural building. He at once escorted them through the buildings and over the grounds. By tonight about all the delegates will have arrived.

The convention will continue over Thursday, and may require a longer time. The length of it will depend upon the time necessary for the consideration of the San Jose scale report.

Orlando Harrison of Berlin, Md., was also one of yesterday's arrivals. He is one of a well known Maryland family of Harrison's, all engaged in the nursery business.

Two big French nurseries are represented in the association. One of these is the Chateau nursery of E. T. Dickinson in the department of the Seine and the other is the famous Andre Leroy nursery at Angers, for which Andrew L. Cause is the agent.

Liquor Dealers' Convention. Of the delegates to the state convention of the Nebraska Retail Liquor Dealers' association, to be held today, about thirty had arrived last night. Secretary William Maloney said. One of these was Executive Committee member Fred Nuchow of Hastings. Among the others were Adam Schoene and Gabriel Braun of Syracuse, Pat Stanton of Tilden, Joseph Hein of Madison and Frank Treckle of Gretna. There was also quite a good sized Boone county contingent in it. It included Nicholas Audley of Petersburg, Erastus Williams of Cedar Rapids and Tim Neville of Albion.

President John C. Tierney thinks the convention will not get right down to its business before tomorrow. It may elect the new officers today besides acting on the various reports of the association.

The convention will come together at 2 p. m. in Thurston Rides' hall.

Burlington Master Mechanics. The annual convention of the master mechanics and superintendents of the Burlington system will be held in this city this week. They will convene for three days. There will be between fifty and sixty visitors in the assemblage, and they will represent the mechanical and the operating departments of all branches of the Burlington system. General Superintendent Calvert of the B. & M. of Lincoln, Neb., is chairman of the committee on arrangements.

Superintendent Theodore H. Depuy of the motive power and machinery of Aurora, Ill., will preside at the meetings. General Manager Holledge of the B. & M. will also be in attendance.

Heroines of Jericho. The twenty-fourth annual communication of the grand court of the Missouri Jurisdiction, Heroines of Jericho, convenes at Central hall, Fourteenth and Douglas streets, this morning at 9 o'clock. The grand court of Missouri consists of eleven grand officers and representatives of eighty-two subordinate orders. This order consists of colored women of refinement and culture, standing high in the social realm of their race. Mrs. Lucy A. Delaney of St. Louis is grand president and Mrs. Mary M. Stanton is the grand secretary.

In the evening a grand reception will be given the delegates at the Young Men's Christian association, and another reception will be held tomorrow evening in Central hall.

GO IN SPITE OF RAIN

(Continued from First Page.)

up at the exposition. He was doing duty as a diver and was incapacitated for active duty by remaining under water too long while cleaning the ship's bottom and was placed on the invalid list. He wants the job of climbing the smokestacks and other high places about the exposition grounds for the purpose of doing such painting or repairing as may be required. He needs these lofty structures without the aid of scaffolding and, according to his stories, he is a veritable human fly.

BEAUTIES OF NATURE AND ART.

Evening at the Exposition Grounds. The charming beauty of the exposition grounds at night has become thoroughly impressed on the minds of the people of this vicinity and the crowds which gather at the grounds as the sun sinks behind the western hills are steadily growing larger. The striking grandeur of the scene from the colonnades and pavilions on the east end of the Main court as the massive buildings are outlined against the brilliant colors of the western heavens at sunset is a sight which cannot fail to impress the most apathetic observer and the magnificent beauty of the court as the growing darkness is dispelled by the lights of the incandescent lamps makes a scene which is sublime in every part. The true grandeur of this scene is one of those things which grows upon the observer and thus it is that the people of Omaha are coming to appreciate the magnificence of the entertainment which has thus been prepared for their enjoyment.

The number of paid admissions to the exposition on Sunday, June 6, was 2,990. The full program of the educational congress will be ready for distribution during the latter part of the week. Miss Ellenore Dutcher of this city has a column of descriptive matter of the exposition in the Boston Transcript of June 1. The Bee is asked to extend to the fire department the thanks of the city for their good work in suppressing the fire in their building on the Midway Friday.

The Pennsylvania club will meet in the Commercial club parlors at 8 o'clock Friday night and all the members of the club and their families are urged to attend.

Hon. H. M. Boyston of Nebraska City, a member of the Nebraska state commission, arrived in the city last night and will keep his headquarters at the Nebraska building for a week.

A Mr. Fairfield, a clerk in one of the concessions, was taken sick Sunday afternoon with acute gastritis and was taken to the hospital in the ambulance. He has since recovered.

One of the decorations on the exterior of the Kansas state building is of huge sunflowers. This is the work of the Agricultural building.

The assistant secretary of the Nebraska state commission is sending out invitations to many prominent people to be present and participate in the banquet to be given on Nebraska day, June 13.

A number of black bass have been added to the collection of fish now on exhibit in the Government building. They are from Manchester, Ia. A carload of fresh water fish from Quincy, Ill., is expected to arrive here today.

Up to Sunday bicycles have been allowed to enter the grounds, but yesterday the edict "that no bicycles were permitted" was sent to the effect that no bicycles were to be allowed in the grounds, but all to no avail. Messenger boys are permitted to enter their bicycles, they carry special permits from the management.

Not only visitors but a number of regularly employed people on the inside of the grounds would like to know about the matter of smoking. The exposition management has sold the concession for the exclusive sale of cigars and smoking tobacco and now signs reading "No Smoking Allowed on the grounds" have been posted through the buildings and grounds.

Jack Joyce of Montana, one of the cowboy riders in the Great Wild West show, had his right leg broken by the shaft of a wheel in the exhibition of running and jumping on the bronchos. Joyce made his run but missed the jump and fell over his horse, but turned and jumped into the saddle, not noticing at first that he had injured himself. One of the hospital surgeons called him and he was taken to the hospital. One of the bones of his leg was found to be broken just above the ankle. He is being cared for in one of the tents and his recovery is expected to be about in a few weeks.

Suggestion for Sentimental. OMAHA, June 5.—To the Editor of The Bee: For some days it has been our good fortune to listen to the concerts given by the celebrated Marine band of Washington. The music they give is given daily by this excellent organization and the applause was hearty and frequent.

For Tomorrow Night. The concert in the Auditorium tomorrow night will be devoted largely to Wagner, a number of selections from various works of the great composer constituting the orchestral portion of the program. The Exposition chorus will make its initial appearance in the evening at the concert. The soloists for this work will be Miss Anna Metcalf and Charles W. Clark. This portion of the concert will be under the direction of T. J. Kelly.

The first matinee concert by the Thomas orchestra will be given this afternoon at 3 o'clock a fine program having been arranged for the occasion by Director Dees. There will be no evening concert tonight, the Auditorium being reserved for the rehearsal of the Exposition chorus and the orchestra preparatory to the concert tomorrow night.

A rehearsal of the Exposition chorus has been called for Thursday evening at the city hall, the women to be on hand at 7:15 p. m., the whole chorus at 8 o'clock and the men at 9 o'clock. "The Rose Maiden" and "The Daughter of Jairus" will be taken up at this rehearsal.

Conductor Kelly has the passes to the exposition grounds for the members of the chorus each, but at 25 cents they could get charge at the exposition grounds should not permit the sale of intoxicating liquors on Sunday in accordance with the city ordinance.

A hearing was set for next Monday night to consider charges against Patrolman C. B. Joyce, who was arrested last night and taken to his cell. He had entered a saloon and drank liquor.

Sick benefits were granted to J. H. Kirk and M. Drummy respectively.

The following special policemen were dined: Andrew J. Lapinski, Burlington station; Fred L. Bugbee, Trocadero theater; S. S. Drummy, street; Street Railway company; A. H. Peckham, Creighton Medical college.

MIGHT DESTROY HIS SHIPS

Belief Cervera Will Not Let Them Pass to United States.

MEN CANNOT POSSIBLY ESCAPE CAPTURE

Army is Now Free to Take Up the Invasion of Cuba and Porto Rico—Ships Available in Convoy.

WASHINGTON, June 6.—By no possibility, it is conceded by members of the War board, will Admiral Cervera's fleet be able to reach the open sea, even with the remains of the Merrimac removed, a task that is not feasible in view of the heavy fire any attempt to place sufficient dynamite in the wreck to remove it, says the Washington correspondent of the Tribune. The entire Spanish squadron is said to have been caught and closed against all possibility of escape, and unless Cervera purposely destroys his ships, they are bound ultimately to fall into the hands of the United States. Cervera's position is regarded as one of almost pitiful humiliation, and his position is such that he will be forced to surrender without having a chance to open fire on a single war vessel, and that he, his officers and entire crew will be made prisoners of the United States in the event of his capture in the possession of the United States. The Spanish fleet will be prisoners, and if they attempted to escape by land they will fall into the hands of the insurgents.

Opinions differ as to the four armored cruisers and two torpedo boat destroyers becoming the property of the United States, but a general consensus of opinion exists that Cervera will never allow his vessels to be taken, and that when he finds no alternative open to avoid destruction, he will sink them as Constructor Hobson did the Merrimac. With the channel closed, the United States fleet will be unable to force a fight with ships of modern construction and over the open fields. Navy men have hoped that, when the war is ended, the Spanish fleet will be prisoners, and if they attempted to escape by land they will fall into the hands of the insurgents.

Forcing a Passage Impossible. In sinking the Merrimac the purpose of Admiral Sampson is for the first time disclosed, and it proves beyond a doubt that investigation made by him showed the utter impossibility of taking his fleet past the batteries and through the crooked channel of the Merrimac. Navy men have had no doubt that he concluded, after careful examination of the charts and the unfavorable conditions, that it was impossible to take the ships through a channel where there was not one chance in ten that they could pass. The difficulties are shown by the charts, which indicate that twenty-four or two feet less than would be necessary for the Iowa and Massachusetts.

Cervera's vessels had less by two or three feet than the heaviest of the American ships, but even his vessels must have had little water beneath their bottoms to enable them to pass. With all chances of escape against him by successfully removing the wreck and securing a channel to the sea, a feeling exists that a bold and equally daring exploit as that of Constructor Hobson will be undertaken by the admiral rather than resort to the blowing up of his own fleet.

While admitting that the destruction of the collier in the harbor places a new phase on affairs in Cuba, naval department officers are not prepared to issue orders to Admiral Sampson to detach a portion of his fleet until he has heard from a detail of the blockade boats of Havana, with other vessels to be relieved from further duty at Santiago. The army is relieved of the necessity now of waiting further on the way to provide it necessary vessels to convey the merchant ships, and a large movement is now expected to begin.

Army Free to Move. Constructor Hobson's action in obstructing the channel so that possibility of escape by the Spanish fleet is now a thing of all probabilities, the most conservative of officers agree, of another great sea fight between the American and Spanish fleets. Until last Thursday both Commodore Schley and Admiral Sampson are understood to have been of the opinion that the battleships are arranged to be sent into the harbor, but the forts and up into the harbor, but were convinced on representations made later that no battleship could get around the turn at the narrowest point of the channel, where there was barely water enough for the lighter vessels of the Spanish fleet. Recently he said that the pending case was not political in the sense of an ordinary tariff measure, and that no one party was necessarily responsible for it. Likewise, voting upon separate amendments in a general tariff measure might result in destroying the equity of an entire schedule, but such objection could not be urged in the pending case. He took issue with Mr. Dalzell in claiming the treasury condition presented a dire necessity for immediate passage of the measure, and in this connection reviewed the recent treasury statement, estimating that a total of \$190,000,000 was available, including the gold reserve, of \$30,000,000 at hand for ordinary expenditures of the government. With this condition, Mr. Bailey said there was no ground for forcing this measure through with the important provisions added by the senate. He contended the rule was unfair and pointed out that should the house pass it, it would be tantamount to an acceptance of the bill as passed by the senate, and it would involve a vote by members for provisions to which they are strongly opposed. On the other hand, if the vote should be to non-concurrence, the members would be forced to vote against provisions which as separate propositions, they would favor.

Mr. Swanson (rep., Ind.), and Mr. McMullin (dem., Tenn.), followed Mr. Bailey, citing notable instances where both sides of the house should vote directly upon amendments. The tobacco tax and the provision for retaining coinage were noted.

Mr. Dingley, concluding in support of the resolution, said it was identical with the one adopted when the tariff bill of 1897 came back from the senate and practically identical with that adopted by the democrats in 1894. He said experience had made it plain

WILL GO TO PHILIPPINES

Destination of Bryan's Regiment is Absolutely Given Out by the War Department.

ARMY OFFICERS TODAY SAID THAT NEBRASKA WAS THE ONLY STATE IN THE UNION WHERE POLITICS HAD PLAYED A PART IN RECRUITING MEN FOR THE WAR.

WASHINGTON, June 6.—(Special Telegram.)—The announcement from Omaha that the Third Nebraska regiment would go to Porto Rico is not in keeping with the understanding at the War department. It was stated this evening that the department, having accepted Bryan's regiment of free silver men, positive instructions had been given to send the regiment to the Philippine islands.

Army officers today said that Nebraska was the only state in the union where politics had played a part in recruiting men for the war.

The confirmation of L. W. Colby of Beatrice to be brigadier general was accomplished today without a hitch. Colby is in receipt of many telegrams and letters asking him to be assigned to duty either at Chikamauga or Tampa preparatory to the invasion of Cuba. Colby took the oath of office this evening.

The nomination of Miss Estelle Reel of Wyoming to be superintendent of Indian schools will, should she be confirmed, place at the head of that most important department of Indian affairs a woman who is yet on the bright side of 35. For three months Miss Reel has been conducting a personal campaign from Arlington in this city and her nomination came about through her persistence and her winning ways. She had the strongest antagonist in J. F. Taylor of Lincoln, who made a most forcible impression on Secretary Bliss and Commissioner of Indian Affairs Jones, but it now transpires that the place had been promised to the Wyoming senator and with the help of many influential men they landed the prize today. Miss Reel is state superintendent of public instruction in Wyoming and a republican.

The land office at Sidney has been allowed an additional clerk in view of the backward nature of the state. The clerk will be selected from the civil service list.

REVENUE BILL IN CONFERENCE.

House Disagrees to the Senate Amendments.

WASHINGTON, June 6.—The center of legislative interest was today in the house, owing to the return of the war revenue bill from the senate. It was generally understood that the majority members purposed to adopt a rule providing for the adoption of a resolution of general non-concurrence in the senate amendments and agreeing to the conference asked by the senate on Saturday. The democrats, desiring to amend the bill, and the republicans, notably the neighboring provinces, came prepared to accept defeat at the hands of the majority, but determined to enter their protest and put on record their position. An unusually large attendance was in evidence.

When the house met, upon motion of Mr. Lacey (rep., Ia.), the presentation of the bill providing for the exercise of authority by volunteer soldiers and sailors in the congressional elections was made a special order for tomorrow.

Consideration of a patent measure was introduced and ordered on the resolution and Mr. Dalzell, speaking in support, said it was intended to expedite the enactment of the revenue emergency measure for the relief of the treasury, upon which there was a daily demand of \$1,000,000. Replying to a question of Mr. Bartlett he said the adoption of the resolution would prevent any further action upon the senate amendments. He said it would be in the province of the house to reject finally the conference report, but he could give no assurance that an opportunity would ever be given to vote on particular amendments.

Mr. Bailey, addressing himself to the democrats, said that the pending measure was not political in the sense of an ordinary tariff measure, and that no one party was necessarily responsible for it. Likewise, voting upon separate amendments in a general tariff measure might result in destroying the equity of an entire schedule, but such objection could not be urged in the pending case. He took issue with Mr. Dalzell in claiming the treasury condition presented a dire necessity for immediate passage of the measure, and in this connection reviewed the recent treasury statement, estimating that a total of \$190,000,000 was available, including the gold reserve, of \$30,000,000 at hand for ordinary expenditures of the government. With this condition, Mr. Bailey said there was no ground for forcing this measure through with the important provisions added by the senate. He contended the rule was unfair and pointed out that should the house pass it, it would be tantamount to an acceptance of the bill as passed by the senate, and it would involve a vote by members for provisions to which they are strongly opposed. On the other hand, if the vote should be to non-concurrence, the members would be forced to vote against provisions which as separate propositions, they would favor.

Mr. Swanson (rep., Ind.), and Mr. McMullin (dem., Tenn.), followed Mr. Bailey, citing notable instances where both sides of the house should vote directly upon amendments. The tobacco tax and the provision for retaining coinage were noted.

Mr. Dingley, concluding in support of the resolution, said it was identical with the one adopted when the tariff bill of 1897 came back from the senate and practically identical with that adopted by the democrats in 1894. He said experience had made it plain

HEALTH'S OFFERING

For more than a hundred years the pure and sparkling

Londonderry Lithia Water

has been famous as a remedial agent for Rheumatism, Gout, Dyspepsia and kindred troubles. It is prescribed by leading physicians everywhere, as it possesses a peculiar power, found in no other water, to dissolve and expel Uric Acid, that poisonous product of high living. There are many waters, but only one Londonderry. (everywhere.)

that the best results were to be obtained by sending bills immediately to conference in cases where a large number of amendments developing complicated differences have been added. Referring to the incorporation of 213 amendments in the senate, Mr. Dingley said that body, with ninety members, had considered for weeks the bill and should the house with four times that number proceed with the same latitude to consider the amendments it would be winter before action could be secured. He argued that the pending measure was one of emergency and should be at once upon the statute books to relieve the ordinary revenues from extraordinary demands and to begin at the earliest moment the payment of the war debt.

The vote was taken then upon the resolution. Mr. Bailey demanded the yeas and nays. The roll call resulted yeas, 137; nays, 105.

The vote was strictly partisan. The house then voted to non-concure and agree to the conference, and the speaker named Messrs. Dingley, Lacey and Bailey as conferees.

The senate bill to revise and perfect the classification of letters patent and printed publications in the patent office was considered under suspension of the rules. It provided quite a debate, but was finally passed—154 to 68.

The most content cases of Joseph Gazin and Armand Romain against Adolph Meyer from the First Louisiana district was disposed of by the adoption of the commission resolutions called up by Mr. Olmstead (rep., Pa.), declaring that neither contestant was a citizen of Louisiana. The case was referred to the Colville Indian reservation to the Kettle River railroad was passed.

Under suspension of the rules the bill ratifying the agreement between the Dawes commission and the Seminoles was passed. A bill of 10 pages, providing a code of criminal law and procedure for Alaska, was called up, but its reading was interrupted by a motion to adjourn made by Mr. Sherman (rep., N. Y.), which prevailed, and at 3:34 o'clock p. m. the house adjourned.

WORKING ON THE WAGE SCALE

Union Pacific Train Hands Settling Their Status as Regards Pay and Rules.

Now that the wage scale of the locomotive engineers and firemen on the Union Pacific has been satisfactorily fixed after a number of conferences between representatives of the engineers and of the reorganized company, sessions are being held between representatives of the company and of the train hands.

The meetings are being held in this city as often as the conductors and brakemen who represent the train hands can get together. The meetings are said to be getting through with the discussions concerning the proper wage scale and the rules and regulations to govern the train hands in a very satisfactory manner. There is but little difference of opinion regarding the wage scale, although there has been quite a little controversy over a few of the rules for the train hands that have been proposed and do not suit the grievance committee of the train hands altogether. It will probably take three or four more meetings to complete the work of the conference. When the representatives of the employers and of the employees finally agree on a conference report on the wage scale and schedule of rules and regulations the report will be submitted to General Manager Dickinson. If he approves the report will then go to President Horace G. Burt for his inspection and action.

At the Real Estate Exchange. The Real Estate exchange meeting held at noon in the Commercial club rooms on matters of importance were considered because of the small attendance and the meeting adjourned until next Monday noon, when a special effort will be made to secure the attendance of all members, that a full vote may be had on several important questions.

TODAY'S WEATHER FORECAST

Probabilities Are That the Day Will Be Partly Cloudy, Accompanied by Variable Winds.

WASHINGTON, June 6.—Forecast for Tuesday: For Nebraska, Kansas and South Dakota—Partly cloudy; slight variable winds. For Iowa and Missouri—Fair in eastern, probably showers in western portions; variable winds. For Wyoming—Generally fair; variable winds.

DEATH RECORD.

Old Settler of Fillmore County. GENEA, Neb., June 6.—(Special.)—Yesterday one of the oldest settlers in Fillmore county, A. G. Camp, was buried. Mr. Camp was almost 84 when he died, on Saturday at 2 p. m. He had been a resident of Genoa since a year 72 and witnessed the plating of the growth of the city and had also helped materially in building it and was well known for a number of years.

For Selling Spoiled Meat. James Buckoff of Benson was arrested yesterday morning on the indictment of W. L. Foster, chief of the military police, who charges him with disposing of spoiled meat.

Buckoff drove into Omaha this morning with the carcass of a cow that had died of milk fever Saturday afternoon, and behind him followed Foster. The former drove to a butcher shop in the south part of town, and Foster went to the police station, where he lodged a complaint against Buckoff. An officer caught the letter before he had sold the meat. The carcass was in very bad condition. Buckoff will be held until the health commissioner has thoroughly investigated the case.

MARRIAGE LICENSES.

The following marriage licenses were issued yesterday by the county judge:

Table with 2 columns: Name and Address, Age. Includes entries for Louis Field, Omaha, 22; Grace Patterson, Omaha, 16; Jacob A. Hartman, Gebo, Mont., 47; Ida C. Manger, Omaha, 23; John H. Critch, South Omaha, 23; Mamie Wall, Omaha, 23; Carson Seaborn, Oregon, Mo., 30; Esther Marriner, Oregon, Mo., 23; George Rozie, Omaha, 25; Jeanie Peabody, Omaha, 21.

NAMELESS.

Not so with the Kimball piano—A great name won by years of careful construction and honest materials—so perfect that the highest honors have been given it at all the great expositions—Again it has been entered for the prize at our own great exposition—You should be sure and see the grand display in the central part of the Liberal Arts building—At our salesrooms we can show you others—made for us especially for the exposition showing—Our usual easy terms—coupled with lower prices than ever.
