SOME RAYS OF HOPE

(Continued from First Page.) civil settlement will be drawn up so as to be eventually independent of military enforcement, it is realized that the initial work must be effected with the co-operation of the troops. Sir Alfred Milner appears to believe that civil reorganization and military pacification can proceed simultaneously and that a possible centered rising will not seriously retard the progress of reorganization once it is begun. The colonial office is said to be of the opinion, however, that the maintenance of good sized garrisons at such centers as Lusitania, Kromstad, and Burg and Pretoria will be necessary for a long time after the crown-colony system gets in working order. For this reason and others put forward by Sir Alfred Milner, the idea of granting an autonomous form of government has been abandoned. It is believed, though it cannot be verified, that a portion of the Transvaal will be partitioned off to Natal. The whole arrangement may be roughly described as coinciding with the views advanced by the progressives as opposed to those held by the Bureau of the States in this direction have been taken during the last few days. Mr. Chamberlain sent for J. P. Fitzpatrick, author of "The Transvaal from Within," who is well known in connection with South African affairs, and spent a whole day in consultation with him. Mr. Fitzpatrick will sail for Capetown on June 18 to join the advisory committee which Sir Alfred Milner is forming.

SOUTH OMAHA NEWS.

Street rumor has it that a proposition is soon to be made to the city authorities for the trading of Highland park for Syndicate park. In the early days of South Omaha the town of land in the northern portion of the town was being sold for \$100,000 and south and 328 feet wide for park purposes. The agreement was that the ground so dedicated was to be used for park purposes only. In the event that any other use was made of it the land would revert back to the city. Now the South Omaha Land company owns the syndicate park, which consists of eighty acres, all enclosed by a high board fence. This park is held at \$25,000 by the owners at present, although a few years ago Ed Johnston tried to have the city buy this same property for \$50,000.

It is believed that the deal going through it is understood that the park will be sold for \$25,000 and Highland park will cut it up into forty forty-foot lots. It is estimated that these lots will bring a total of \$700,000 a half and this will be a return for \$200,000. A great many people have purchased homes in the Highland park district with the understanding that the park was to be returned to Highland park. There is no lake at Highland park, while at Syndicate park natural springs keep Clear Lake full all the time. Those who profess to be conversant with the affair assert that it will take a vote of the people to make the trade.

Demand for Paving Repairs.

Property owners are complaining about the condition of the pavement on Twenty-third street. For about eight blocks, starting at F street, the roadway is full of holes some fully eight inches in depth and three feet across. Liverty dealers say that more broken aprons on buses have been called to their attention within the last month than at any time since the street was paved. Some weeks ago the council advertised for bids for keeping the street in repair for a term of years, but bidders were scarce on account of the possibility of a long delay in securing compensation for the work performed. It is now suggested to the council that the letting of bids for the repairs be deferred until after the annual levy.

Members of the streets and blocks committee and the city engineer are at the office of the city engineer at the city engineer's office.

Iron Foundry Wanted.

Location of the Commercial club is some action on the proposition to build a foundry at Twenty-third and P streets and the railroad tracks. A foundry employing a couple of dozen men will be started here as soon as a suitable site is secured. The site proposed has trackage and is considered to be in every way fitted for the purpose. Action on this matter, Mr. Watkins says, has been delayed on account of the Union Pacific vacating proposition. Since it has been announced that this railroad has abandoned its idea of making any changes in its tracks here members of the club are anxious to start building the ground for industrial purposes, especially as the land is of no benefit to the city. By turning it to some use it is asserted that the city at large will be benefited.
