Map Covers Three Acres.

W. J. Spillman, of the Agricultural department, has returned to Washington from St. Louis, where he has been at work on the exhibit of the Agricultural department at the World's Fair. An immense map of the United States is now being constructed on the exposition grounds under Mr. Spillman's direction. This map will be one of the most striking features of the government exhibit. It will cover three acres, and will probably be the largest map that has ever been made. The map will show the states and territories with their boundaries, and will also show the principal cities, rivers, and mountains. The map will be made of a material that is fireproof and will be able to stand for many years. It will be a valuable aid to the people of the United States, and will also be a valuable aid to the people of other countries.

Large Audience Assembled at Fremont to Listen to President of Conference. FREMONT, Neb., Sept. 27.—(Special)—Bishop Andrews occupied the pulpit of the Methodist Episcopal church this morning. Long before the time for the service the building was crowded, every available foot of space being taken. The subject of his sermon was the doctrine of a universal and particular Providence of God. He spoke in a clear, logical and convincing manner, and his discourse was listened to with the close attention of the large audience. He said in part: "All men who believe in a God also believe in a government by God, a government whose object is the development of the human life and its training for a higher life. The scriptures say that God is in command in every event, however small. His Providence a particular and universal Providence. All are under His eye and government. His particular Providence concerns both the good and evil. The good He inspires, assists, makes victorious and rewards. He has also to do with sin, but not as with the good. Sin does not consist in any particular external act, but in the motive state of mind that stands back of it and is its underlying cause. A man's life and its training for a higher life. Large Audience Assembled at Fremont to Listen to President of Conference. FREMONT, Neb., Sept. 27.—(Special)—Bishop Andrews occupied the pulpit of the Methodist Episcopal church this morning. Long before the time for the service the building was crowded, every available foot of space being taken. The subject of his sermon was the doctrine of a universal and particular Providence of God. He spoke in a clear, logical and convincing manner, and his discourse was listened to with the close attention of the large audience. He said in part: "All men who believe in a God also believe in a government by God, a government whose object is the development of the human life and its training for a higher life. The scriptures say that God is in command in every event, however small. His Providence a particular and universal Providence. All are under His eye and government. His particular Providence concerns both the good and evil. The good He inspires, assists, makes victorious and rewards. He has also to do with sin, but not as with the good. Sin does not consist in any particular external act, but in the motive state of mind that stands back of it and is its underlying cause. A man's life and its training for a higher life.
