SCHOOL AND COLLEGE WORK

Growing Prominence of Omaha as an Educational Center.

FREE SCHOLARSHIPS IN MUSIC

Adjusting High School Course to Needs of Pupils—Novel Experiment with Backward Children.

Omaha may well be proud of its prominence as an educational center. In fact, no city west of Chicago is so well known as a prominent school and college town. Prominent educators who, during the summer vacation, have spent a day or two here, predict wonderful things for Omaha along these lines.

It's a good sign—for that city that gives place to school and college must grow along every other wholesome line. Omaha's public school system is counted among the best in the country, and as a tribute to its excellence witness the fact that Superintendent Davidson has just been called to Washington, D. C., to the superintendency of its public schools.

There are many church and private schools in Omaha—each important—each successful. Omaha's universities are known throughout the middle west for their thoroughness. Most important in an advertising way are the business colleges—for from them go into the world the young men and women who help steer the great wheel of business.

No city west of Chicago offers the young man or woman such opportunity for a business education as Omaha—nor such excellent chance of employment when the business course is completed.

Prominent among business educational institutions is Boyles college, which in the short space of twelve years has rapidly arisen to national importance. It's a young school comparatively. In twelve years it has made a name for itself that appeals to nearly every boy or girl throughout the middle west who realizes that to enter the business world he or she must have a business education. Just as Harvard, Yale and Princeton are prominent among the great national educational institutions, so has Boyles college become prominent among business colleges. It's a business university in the fullest sense of the word and it is generally referred to as "the largest business college in all the United States west of Chicago."

Boyles college has had more influence in making Omaha known as a business educational center than any other school. First because it has specialized—has centered all its fire on the objective point—a practical business education. Its faculty members are instructors especially educated for the branches they individually teach—just as the greatest schools of the world.

The future of Omaha as a college center is bright as well as for those who make it their business to investigate all it has to offer. The old saying that a city or town may be judged by the number and quality of its schools may well be applied to Omaha. Omaha helped to make Boyles college, but Boyles college is up and doing every day to make a bigger and better Omaha.

"We'll spare no effort, no time nor expense to better our college course if possible—to improve and strengthen our faculty—or to make our college building more complete if it can be done," said Mr. Boyles recently. That's the true Omaha spirit—and one may not wonder at the success of such a school.

The fall term of Boyles college begins September 4. Mr. Boyles reports an extra large registration this year—many from greater distances than have ever attended this progressive and truly up-to-date school. It is safe to say that this fall term will see the largest attendance ever enrolled at Boyles college and to those who know, this means a great deal.

OPPORTUNITY TO STUDY MUSIC.

Free and Partial Scholarships at Chicago Musical College.

In this community, as in all others, there are doubtless many young music students who, through lack of sufficient funds, find it impossible to go on with their musical training as they have hoped and dreamed of doing. They may be possessed of unusual talent, which they are unable to cultivate because of financial hindrance. It is a well known fact that many of the greatest figures in musical history have relied upon free and partial scholarships for their higher training. It is a potent fact that worthy students find it harder to earn a musical education than to become proficient in the arts of technical sciences.

The Chicago Musical College was a pioneer in the matter of offering free and partial scholarships and since the early 60's, when but one free scholarship was offered, to the present year, when fifty free and 100 partial scholarships are available. Dr. Ziegfeld's long famous institution

has led in this commendable effort to afford training for young people who have talent. The Chicago Musical College is now comfortably located in its new accessory building on Michigan avenue, Chicago, in the heart of the city's institutions of culture and refinement, close to the home of the Chicago Grand Opera company, the Auditorium theater. The forty-sixth year, commencing next September, will find this institution in its advanced, edged position of leadership among schools of musical training and the scholarship idea will be continued upon a more extensive basis than ever. The board of directors have set aside fifty free scholarships, each of which entitles the holder to one year's instruction free of charge, and 100 partial scholarships which are liberal reductions from the regular schedule of tuition.

Free scholarships are issued in piano, violin, violoncello, vocal, orchestral instruments, theory of music, composition, elocution departments and again this season scholarships will be offered in the school of acting and school of opera. Application must be made on the regular college blank before September 1, 1911, and must be accompanied by a letter of recommendation from a responsible person, stating that the applicant is deserving in every way and unable to pay the tuition. There is no charge to the applicant for examinations of anything connected with the distribution of these scholarships.

Free and partial scholarships are issued only at the opening of each new year. Applications should be mailed to the secretary, Chicago Musical College, building, 424 South Michigan avenue, Chicago, Ill.

CHANGE IN HIGH SCHOOL COURSE

Chicago Authorities Offer Two-Year Technical Training.

The school management committee of the Chicago Board of Education has approved a completed plan for a rearrangement of commercial and technical education, reports the Chicago Tribune.

It is claimed that when it is in full operation, probably within one year, it will be unnecessary for a single boy or girl to be sent to the long established schools of the east save for the highest branches of study. Ninety per cent, it is said, can get more than they want for ordinary needs without leaving the city limits, or even the division of the city in which they live.

The main points of the plan are, in brief: One and two-year courses in these departments in every general high school in the city.

Removal of these elementary courses from the present technical schools, the Lane, Crane and Lake schools.

Retention of the present third, fourth and fifth year courses at these schools.

Addition of a sixth year course.

The advantages anticipated are the offering of experimental study in technical subjects to every high school pupil, allowing them to decide whether they wish to continue the courses, and affording opportunity to every child to take a certain amount of work in whatever course is wished.

The arrangement is the outcome of a request from the Schurz and Bowen schools for \$30,000 each for installing a third and fourth grade in technical work. It was recognized that the giving of these facilities to every high school would entail a cost that was quite prohibitive. As a result Mrs. Young was asked to collaborate with a special committee, made up of former Aldermen Frank I. Bennett, Adolph Gartz and George H. Swift in solving the problem.

This plan is the result.

"People who enter the high school," says the report, "should have an opportunity of choosing, in accordance with their aptitudes and capacities, among different departments of study, but a boy or girl who had just graduated from the elementary schools should not be asked at once to make a final decision as to his or her entire high school education. A pupil may begin by choosing the commercial course and later find that the technical course is better suited to him, or he may begin a technical course and after the first year or two decide to change to an academic course."

"For these reasons pupils who have selected a general course should have an opportunity of taking a certain amount of technical or commercial work, and vice versa. In this way all high school pupils will have an opportunity of finding out which course is best suited to them and an opportunity of associating with pupils whose choice of studies may ultimately lie in a different direction."

Midland College, Atchison, Kansas.

The college year at Midland college, Atchison, Kan. opens Wednesday morning September 6, in the new Griffith memorial hall, which was dedicated during last commencement at Midland in connection with the dedication of the new Carnegie library building. With these new buildings and additional new equipment this institution will be able to give the very best service to its patrons. The Midland faculty has been entirely filled also during the summer by the trustees, three new men coming to the institution,

one, Prof. Bruno Melnickie, from Minnesota, to take the chair of Greek and Latin, another, Prof. W. C. Heffner, Ph. D. from Pennsylvania, to take the chair of history and economics, and a third, Prof. Hayward G. King, A. M., from Ohio Wesleyan university, to become principal of the Midland academy. There will also be a new preceptor at the young ladies' building, Oak hall, in the person of Mrs. Jessie J. Lewis. The outlook for Midland college is very bright.

UNIQUE EXPERIMENT.

Teaching Small Class of Backward Children in Summer School.

Under the direction of three New York City school teachers a unique experiment is being made at the summer school of the University of Pennsylvania. The teachers are conducting a class of fifteen backward children under the auspices of the department of psychology. These children, by proper training, they hope to bring back to the normal within two months. The experiment is being made as an object lesson to the public schools of the country. Nothing is being done for the children that could not be carried on under any public school system. The class is in session from 9 to 5 o'clock every day, and the pupils are taught the regular school subjects. In addition they are instructed in gymnastics, swimming, personal hygiene and painting in water colors. The girls are taught sewing and domestic science, including the setting of tables for meals. An hour of every day is spent in resting. The children lie out on the university campus on steamer chairs. When the class opened the blood of each child was tested. The university serves them with lunches and the diet of each child is arranged according to the condition of its blood. The university also supervises the preparation of the morning and evening meals in the homes of the children.

Educational Notes.

Mrs. Annie J. Cannon has been selected to succeed Mrs. William Fleming as the head of the research bureau of Harvard university. Three years ago while assisting Mrs. Fleming Mrs. Cannon discovered three new stars.

At the German universities last year there were enrolled 34,778 men and 2,352 women. This was 12.35 per cent greater than the previous year, but the rate of increase is declining. In numbers the largest universities stand in unchanged order—Berlin, Munich and Leipzig.

Miss Ghodeson Khamoun is said to be the first Persian woman to come to this country to be educated. Until she left her native home a few weeks ago to attend the annual meeting of the Persian-American Educational society no man had ever seen her face. Miss Khamoun will enter the University of Chicago in the fall.

Marquette University summer school closed a very successful season on August 5. Sixty-five certificates were issued for the completion of an advanced full course. In addition there were many who took partial courses.

The school has had a comparative growth since it was started. Many of the students have been working for degree work and have shown remarkable enthusiasm. One distinctive feature of the Marquette university summer school is that there has been no extraneous distractions—no auto rides, no picnics, and, as a consequence, there has been an intellectual atmosphere in the classes, with the result that remarkably good and effective work has been accomplished.

Medical Features Worthy of Mention.

To that gifted composer, Victor Herbert, belongs the honor of composing the first great American opera, "Natoma," and it is with a great deal of pleasure that one listens to the rendition of the famous Digger Dance from this work when it is played by Victor Herbert's orchestra under his own personal direction. This odd Digger Dance, like other characteristic numbers in the opera, is based on Indian melodies which Victor Herbert has been collecting for years. Its melody is most entrancing and its performance by Victor Herbert's orchestra can be depended upon to be a perfect interpretation of the work. This is one of the numbers by this organization in the September list of new Victor records. The other record contains two exquisite MacDowell pieces, "Woodland Sketches," which are favorites on Mr. Herbert's programs and are delightfully rendered.

Among the Royal Seal numbers in the September list is a Sonnetaria air by Tetrasini, "Oh, Recall Not One Earthly Sorrow," which is well worth hearing—she has the voice, style and technical skill to make such music as this captivating. Riccardo Martin's rendition of the "Love or Fancy" number from "Madame Butterfly" is particularly noteworthy, and John McCormack's beautiful voice and clear enunciation are shown at their best in the favorite Blumenthal "Evening Song." Nicola Zola sings a melodious serenade, "This Day is Breaking," and demonstrates by his graceful rendition that he is as much at home in lighter songs as in operatic selections. Any Victor dealer will gladly play any record for you.

The Booklovers' Contest is on!

BELLEVUE COLLEGE

Thirtieth Year Opens September 12th, 1911.

BELLEVUE COLLEGE,
BELLEVUE NORMAL SCHOOL,
BELLEVUE MUSICAL CONSERVATORY,
BELLEVUE ACADEMY,
Constituting

OMAHA'S HISTORIC COLLEGE.
