He reports business in all lines of trade as exceedingly dull in his native state. "Oregon is the place for me" said Mr. Buren this morning. Politics in Missouri are growing very warm. That state, which is Democratic, is conceded to Bryan by a handsome majority as the sentiment of the people is strongly in favor of the white metal. Colorado, a silver state, will naturally go for Bryan. Mr. Buren also stated that a great many people approached him for information concerning Oregon and the "Far West." Many families are anxious to remove to Oregon but are not able to dispose of their property only at a great sacrifice.

Of Interest to Bicycle Riders.

There can be no question that one of the most important parts of a bicycle, is the tire. It has to bear the brunt of the work, is constantly coming in contact with destroying elements, and generally receives the least care from the rider. The importance of the work it has to do was early recognized by makers of bicycles, however, and they have given much attention to this important adjunct, of the wheel.

There are today, perhaps, thirty different styles of bicycle tires on the market, all of which vary in detail. As to their various merits, theories are of little value; actual experience is the only way to determine this question. Unless an article gives satisfaction, demand for it soon ceases. After a test of over six years, during which time double-tube and single-tube tires have been marketed, at least three-fourths of all the riders in this country today demand and ride double-tube tires.

The leading firm in the United States, and in fact in the entire world, in the manufacture of double-tube tires, is Morgan & Wright, Chicago. Their history is interesting. The first pneumatic tire—the rags-and-glue kind—was giving trouble, and

Agents for World-Beater Soap.

Morgan & Wright stepped in to fill a great public want. They furnished a tire that could be easily taken from the rim to be repaired. That was the principle requirement, in those days, besides the usual requirements of speed, durability and comfort. That was several years ago. Single-tube tires had been pushed in Europe, and were failing, and the same effort was being started in this country. The Morgan & Wright double-tube tire quickly proved its superiority—with the result stated above. The quick-repair inner tube, which is this year a standard feature of all of this firm's tires, has made the position of double-tube tires practically invincible, by making it quick and easy for the riders to secure, at the roadside, a permanent repair—a thing admittedly impossible in the majority of single-tube accidents.

No Funds.

NEW YORK, Aug. 31.—It was reported today that the Union Trust company, not having received any funds for the purpose of paying interest on the Union Pacific land grant, sinking fund 8 per cent bonds, due tomorrow, amounting to \$320,000 and would not be paid. No Union Pacific receivers are in town. The story was current that the difficulty arose partly from the fact that warrants for the transfer of lands on which the payment depended have not been signed for a long time.

Turks Still Rioting.

CONSTANTINOPLE, Aug. 31.—Rioting was renewed in the Galata quarter of this city Saturday. A sharp fusillade took place between the troops and the Armenian rioters. It lasted only a few minutes, however, and a stampede of the revolutionists followed.

Just before the departure of the leaders of the invasion of the Ottoman bank on Sir Edgar Vincent's yacht, after they had negotiated with the Turkish officials and surrendered upon condition that they should be allowed to leave the country, they announced to the dragomans of the different embassies that they intended to continue the agitation until the rights of the Armenians should be recognized by the representatives of the foreign powers.

The ambassadors of the foreign powers held a conference and sent a strong joint appeal asking the sultan to suppress the disorders without delay. No reply has been received from the sublime porte as yet. It will be remembered that several days before the raid upon the Ottoman bank threatening letters of a similar character were received by the representatives of the powers, but the foreign diplomats stationed in Constantinople paid no attention to these warnings.

Already several claims for damages to property have been received at the British embassy, the property destroyed being owned by British subjects.

As an indication of the number of persons who perished in the recent riots, it is stated that 700 dead bodies were buried in the Chiklio cemetery alone.

The British charge d'affaires, Michael Herbert, has made special representations to Tewrik Pasha, Turkish minister of foreign affairs concerning the case of two Americans who were brutally killed in front of the guardhouses and before the eyes of the members of the British embassy.

Almost Distracted?

Did you ever suffer from real nervousness? When every nerve seemed to quiver with a peculiar, creepy feeling, first in one place, and then another and all seemed finally to concentrate in a writhing jumble in the brain, and you became irritable, fretful and peevish; to be followed by an impotent, raging condition of the nerve centers, ringing in the ears, and sleepless, miserable nights? Dr. Miles' Nervine Restores Health. Mrs. Eugene Section 119 Bloomington St., Elkhart, Ind., says: "My nervous troubles had made me nearly insane and my physicians were unable to help me. My memory was almost gone and every little thing worried me until I was becoming a maniac. I really feared I was losing my mind and would imagine all sorts of evil things and cry over nothing. I commenced taking Dr. Miles' Restorative Nervine and four bottles of this wonderful medicine completely cured me, and I am as well as I ever was." Dr. Miles' Nervine is sold on guarantee. Best bottle will benefit or money refunded.
