Have You Ever Tried Salem's Botanical Doctor?

He absolutely cures cancers, tumors, gravel, kidney and bladder troubles, bone diseases, asthma, skin diseases--all without the use of the knife or poisonous minerals or mineral of any kind.

Instructions.

My Dear Friend: You must bear in mind that this medicine is not a poisonous tonic, nor a stimulant, nor a temporary relief, which you get from poisonous drugs, where the results are sure death sooner or later. Those poisons go in your bones and destroy the life of them and create all kinds of diseases, cancerous tumors, consumption, dropsy, bone diseases, etc. Do not blame the medicine when it takes an effect and sits up the poisons or disease in the system. You must not expect to be cured in a few days, for your sickness or disease has been a long time coming on, and it will take a long time to get it out of your system. It will take months or a year to build up a new body from the bones up. This is what the people do not understand.

They are used to being humbugged. My medicines are composed of nature's herbs--what the human system requires. When the animals get sick they will help themselves to those herbs, for they have the instinct, and the people have not, so we have to make a study of it. It has been a life study with me. Do not get weary; this life is too short and too sweet to worry out of this world.

Dr. Cook cures all kinds of diseases. Dr. J. F. COOK, 301 Liberty St., Salem, Ore., is the man you ought to consult. He is a natural doctor. He is descended from a line of German herbals, the best physicians in the world.

This is his fourth year in Salem, and scores of patients and friends can testify to his skill in their cases.

All three of the candidates--Pattison for governor, Guthrie for lieutenant-governor, and Nolan for secretary of internal affairs--were present, together with members of the state committee and other prominent party leaders from every county. The auditorium at the Mt. Penn Tower was found inadequate for the accommodation of the crowds, and impromptu overflow meetings, with speech-making, were held in the open air. A reception in honor of the candidates in the Fifth-street Auditorium this evening winds up the rally.

ALBANY WAREHOUSE CASE

How Receiverships Drag Along for Years

Judge Boise is at Albany hearing some of the final proceedings in the Albany warehouse receivership cases that have been in the courts for years. This is one of the most famous of the grain delinquencies, and in the class with the more prominent receiverships at Salem. It is recalled that the Williams & England bank failed in 1892, and its affairs are not yet wound up. It was again further complicated by the failure of the Gilbert Brothers' bank, and the character of the securities in that institution will drag the receivership along many years. The musical instrument notes many of them have yet years to run, and the receivership will take the better part of ten years. These long-winded receiverships are teaching the people to avoid having much to do with a business likely to go into the hands of a receiver, unless they want their financial affairs to become permanently involved.

President W. H. Wehring, of the state fair board, has engaged carpenters and begun the building of forty additional stalls at the fair grounds, to accommodate the exhibitors and the horsemen. Never has there existed the demand for stall room at the state fair as exists this year. President Wehring fears that even with the 40 additional stalls now being constructed, that the number will not be equal to the demand.

Two new turnstiles are being built along the west side of the grounds, to facilitate the passage of visitors to and from the grounds. A platform 128 feet in length is being constructed along the railroad sidetrack for the convenience of horsemen and stock exhibitors, in loading and unloading their stock on the cars.
