PRICE OF PRINT PAPER BEING INVESTIGATED

Commission Has Had 15 Experts Going Over Books of Factories

(United Press staff correspondent.) Washington, Aug. 1.—Increased print paper prices were placed under a government microscope today when newspaper publishers and representatives of newspaper associations from all parts of the United States met with the federal trade commission to discuss the subject.

An open hearing with the publishers had been arranged by the commission for two purposes:

To get any ideas publishers may have as to the cause and justice of the increased price of paper.

To show the publishers what the commission has been able to learn of the facts behind the price boost.

For two months the commission has had 15 accountants at work in paper manufacturing plants of the country going over the books to determine, if possible, what has made print paper suddenly more expensive. It has already been determined that the demand for paper has shown a tremendous increase.

The hearing tomorrow will develop the first report of the commission. The completion of its investigation with its formal report is expected by October first.

In the meantime hundreds of editors have written, some making suggestions of different kinds and values on means of bringing about a reduction. A number of big newspapers have met the situation by increasing the price of their street editions.

Not only will those publishers present be heard, but letters from many who were unable to come will be read and discussed.

For the most part, however, communications from editors put it up to the commission, with the hope that it will find some means of alleviating the new burden attached to newspaper publication.

STATE HOUSE NEWS

Attorney General Brown, in a letter to District Attorney Hill, of Albany, states that it is necessary for a county to have a regularly appointed roadmaster to prepare plans and advertise for bids on road improvement. The attorney general says that if there is no road master the county court may appoint one without waiting for the January session when appointments are made regularly.

There is no improvement in the car shortage situation, according to the daily report of the Southern Pacific company filed with the public service commission. Yesterday's report showed receipts of 111 closed under load and seven closed empty, 13 open empty and 13 under load. There were on hand empty 218 closed and 45 open, under load 230 closed and 49 open, while orders on file amounted to 518 closed and 259 open.

Marines, Sergeant Clarence D. Shoades, of the Marine Corps, told a party of society women visiting the battleship Utah today.

"The eye-painful brilliancy of our white clothes is due to the fact that we wash with our hands as well as our heads, and we let soap do its proper share of the work. Just enough water to thoroughly wet the wash is sufficient," the sergeant continued, "and the less water and more soap one uses the whiter the washing will turn out.

The fair visitors seemed greatly impressed with the lesson given them in an art that is dear to every woman's heart.

INDOOR LIFE MAKES FAT

TRY OIL OF KOREIN TO KEEP WEIGHT DOWN, OR TO REDUCE SUPERFLUOUS FAT.

People who are confined within doors and who are deprived of fresh, invigorating air and exercise must take precaution to guard against over-stoutness, as fat acquired by indoor life is unhealthy and a danger to the vital organs of the body. Lack of exercise in the fresh air is said to weaken the oxygen carrying power of the blood, so that it is unable to produce strong muscles and vitality and the formation of unsightly and unhealthy fat is the result.

If you are 15 or 20 pounds above normal weight you are daily drawing on your reserve strength and are constantly lowering your vitality by carrying this excess burden. Any persons who are satisfied in their own mind that the are too stout are advised to go to Central Pharmacy or a good druggist and get a box of oil of korein capsules, and take one after each meal and one just before retiring at night.

Even a few days treatment has been reported to show a noticeable reduction in weight, improved digestion and a return of the old energy; footsteps become lighter and the skin less flabby in appearance as superfluous fat disappears.

Oil of korein is inexpensive, cannot injure, and helps the digestion. Any person who wants to reduce 15 or 20 pounds is advised to give this treatment a trial.
