CIRCLE OF STEEL STEADILY PRESSES ON CENTRAL POWERS FROM ALL SIDES

With the French driving on toward Peronne, the Russians taking Carpathian points, pressing on to Hungary; with Roumania on the east and Italy on the west pushing northward against Austria; with strong allied forces at Salonika, Greece pitted against Bulgaria and the Teutonic forces; with the right of the sea blocked to any of the ships of the central powers, an effective ring of iron is now drawn around Germany and her allies. This is most graphically illustrated by this map. Shaded countries in map are those that are at war with Germany.

"Civilization" the Wonder Feature Is Here

We have been treated in the past to a number of super features such as "Birth of a Nation" and "Cabra," but yesterday at the Grand theatre the much heralded "Civilization" opened a four days' engagement and those who witnessed this massive production were unanimous in pronouncing it the greatest feature ever presented in the city. To try and describe "Civilization" is almost an impossibility suffice to say that its massiveness is tremendous, its battle scenes terrific, its effects gorgeous and the story beyond comparison.

One in witnessing the production is concerned of one thing that is creator, Thos. H. Ince, is the greatest producer the world has ever seen and it is safe to predict that it will be a long time before we will witness another production like "Civilization." You owe it to yourself and family to see it. Standard clock in the Paris observatory are kept 9 feet under ground where the variation in temperature has been less than one degree for several years. WINNERS OF PRIZES SWINE DEPARTMENT

Exhibit Attracted Many and Showed Keen Interest Taken in Industry

The stock exhibit at the fair this year was perhaps the finest ever shown there, and this in all classes. In the swine department the excellent showing gives evidence of the awakened interest in this branch and it promises in the near future to take first place in the livestock industry of the state. The small time required to get established from a small start makes it peculiarly attractive. The awards this year are as follows:

Killed Himself When His Act Was Discovered

Des Moines, Iowa, Oct. 2.—After he had begged the father of Esther Whitney to kill him for alleged intimacies with the 17-year-old high school girl, John Douglas, aged 41, prominent married farmer living near Maxwell, killed himself Saturday night as an officer sought him with warrants sworn out by Whitney.

The men were neighbors. Confronted by the girl's father earlier, Douglas broke down. Grieved with grief, Whitney struck him and rushed away to swear out the warrant.

A BUFFALO INSTITUTION Known All Over the United States.

Dr. Richard C. Cabot, who is head of the Massachusetts General Hospital, has been writing for the American Magazine, April and May, on the subject of "Better Doctoring for Less Money."

He says that "A new era has come in the practice of medicine, but most people do not know it yet. We have begun to emerge from that stage of medical work in which the doctor was a peddler selling goods from house to house, into the more advanced and sensible era in which the doctor stays at his place of business, like anyone else who has goods to sell, and the people who want these goods come to him. The shop where he has his goods to sell is generally called a hospital and he has associated with him there a body of men and women similar to work people, foremen and managers of any industrial plant or dry goods store. He has there some beginnings of a satisfactory division of labor and specialization of function. Therefore, he can give the public a much better article for less money."

"The article I refer to is sound medical advice and treatment." This is just what Dr. Pierce has been doing at the Invalids' Hotel in Buffalo, New York. Dr. V. M. Pierce has associated with him Dr. Lee H. Smith, who is vice president and head surgical director and operator, and there are a dozen other physicians and specialists, as well as four chemists, and the poor and the very rich get the best medical attention. As Dr. Cabot has properly said, "When you go to a doctor's office you may complain of nothing more abstruse than a headache or a stomach-ache, yet for the solution of the problem represented by your suffering there may be needed an X-ray examination, chemical tests such as very few experts are capable of making,
