## REPUBLICAN TICKET.

For President,  
**WILLIAM M'KINLEY,**  
Of Ohio.  
For Vice President,  
**THEODORE ROOSEVELT,**  
Of New York.

Bryan's hand is at the helm say all reports from Kansas City  
It having been established that the German minister to China has been murdered the country now looks to Germany for a declaration of war. In other respects conditions in the Flowery Kingdom grow worse day by day.

Kansas City is the hub of the great prosperity belt. The Kansas and Missouri farmers never were so prosperous. It is not an ideal place for a calamity gathering.  
In declaring for the repeal of the Goebel law, the Hon. Jo Blackburn makes a vicious kick at the ladder which enabled him to secure a reelection to the United States senate.

Is it not about time some one was resigning from the election commission in this county? At least one of the occupants of a place on this board is a state office holder and is therefore ineligible.  
If the gang has its way Beckham will be nominated for governor by the so-called Democratic convention. And it does appear as if the better element of the party proposes to remain away from the county conventions and let the gang get what they want and receive it in the neck in November.

There was always more than one way to kill a snake and it seems the fact Democrats haven't forgotten this goal.  
While all the appropriations made during the last session of congress were \$24,000,000 larger than in 1899, it should be remembered that nine millions will be expended in taking the census and upwards of seventeen millions will be used for improving the postal service, while another seven millions will be spent in increasing our navy. In other directions there has been an actual decrease in the appropriations.

The party that constantly endeavors to drag foreign questions into a presidential campaign is naturally afraid of its domestic record.  
A Republican victory in Nebraska this year would be a fitting climax for the Democratic campaign on false issues.  
The Hon. John R. McLean has retired from Ohio politics and sailed for Europe. Mr. McLean's experience with the Ohio voters was anything but encouraging.

Governor Beckham has gone to the Kansas City convention. He hopes, no doubt to secure recognition there, to offset the distinction shown Governor Taylor at Philadelphia.

Democrats are trying to make the farmers discontented because they are paying a little more money this year for their wire nails and wire fencing. Of course they never point out to the farmers that his extra profit this year on two or three bushels of corn will pay for any increase in the price of a keg of nails, and that his profits on all his farm products in this year alone will pay for many times the cost of his barbed wire, besides leaving him a handsome surplus to put in bank or pay off his mortgage.

The fact that the liabilities of banks that failed in the last two years averaged nearly \$30,000,000 less than the annual liabilities of the banks that failed during President Cleveland's term will probably be used by the Democrats as an argument to put them in power again, so that they can smash the capitalist once more. But the people won't be fooled this way; they prefer no panics and no runs on the banks, as they would rather have their money safe in sound institutions.

How Methodist Ministers Are Paid.  
The average salary paid to the Methodist preachers of the United States last year was \$473.35.

...in this region.

What more need be said as proof of fear and not righteousness on the part of the Democrats?  
**RAILROAD NOTES**  
**NEW NIGHT YARD MASTER APPOINTED YESTERDAY.**  
Chief Dispatcher Allen Jorgenson Has Returned Home—Railroaders Want a Picnic.  
Conductor Dugan is off on account of his mother's death at Louisville.  
Chief Dispatcher Allen Jorgenson has returned from Boston.  
Mrs. May Bennett, formerly stenographer in Berry & Harrison's law office, has accepted the position of stenographer for General Yardmaster W. L. Surran, of the Illinois Central.  
Mr. W. E. Carney, until recently foreman of one of the switch engines, has been appointed night yardmaster to succeed Mr. J. S. Taylor, transferred.  
Mr. W. W. Sloan, late of Greenville, is agent at Kuttawa, succeeding Former Agent Sizemore, resigned.  
Mr. Charles Richardson, one of the clerks in the Illinois Central freight department, had a foot painfully mashed by a wagon Saturday afternoon.  
The big pond near the new Illinois Central depot has been drained into Island creek. Thousands of fish were caught by men and boys as the water became shallow. The draining of the lake consumed two weeks.

The employees of the Illinois Central shops here desire to have a big basket picnic. It will be given at Kuttawa Springs between the 24th and 28th of the month. As yet the committee has not decided upon any certain time for having the outing. The date will be entirely at the disposal of the transportation department of the I. C.  
About 1200 persons are expected to attend the picnic from this city. A committee composed of the following has been appointed to confer with the officials: Emile Gourieux, chairman, of the car building department; Charles G. Morris, secretary of the master mechanic's office; J. C. Martin, paint department; George Bonurant, planing mill department; Charles Meyers, tinner's shop, and Foreman W. C. Schofield, of the blacksmith department. About \$200 has been raised to defray the expenses of special trains, etc.

**The Antiquity of Beds.**  
Beds were unknown among the ancients, who slept on the floor or on a divan covered with skins. It was in the middle ages that beds first became common, being made of rushes, leather or straw. It is supposed that feather beds were known to the Romans, since men are reviled by one of the Latin poets for their luxury in sleeping upon "feathers." Hellogabalus, the most effeminate of the Roman emperors, possessed an air cushion and an air mattress as early as A. D. 210. In England the better classes began to use feather beds for the first time during the reign of Henry VIII., and in certain districts of Holland and Germany bedsteads are still fitted as they were then, with two feather beds; upon one the sleeper lies, the other being used for covering. The Russian peasant places his bed on the top of the oven for the sake of the warmth given out by the fire.—Philadelphia Times.

**Found Valuable Papyrus.**  
Buried under rubbish and debris of fallen houses and temples two members of the Egyptian exploration fund have found valuable papyrus and objects of domestic use preserved from the ancient and famous classic Greek town in Egypt, Oxyrhynchus. Among them is this petition for alimony: "To Heracles, priest, chief justice and superintendent of Chramatistae and other courts, from Syra, daughter of Theon—married Saraphion, bringing him by cession a dowry amounting to 200 drachmae of silver. As he had no means of his own at all, I received him into my parents' house, and I, for my part, conducted myself blamelessly in all respects. But Saraphion, having squandered my dowry as he pleased, was constantly ill-treating me and insulting me, and using violence towards me, and having reduced me to poverty, he finally deserted me, leaving me in a destitute condition. Therefore, I beg you that he be compelled to support me."  
Only the best of London fire engines pump 500 gallons a minute, whereas the famous Kinzua viaduct, near Bradford, Pa., which has for years been object of curiosity for sightseers, is to be replaced by a wholly different structure. The bridge is 301 feet high at the highest point, and until the completion of the Garabit viaduct was the highest bridge in the world. The Garabit span, the Trayer in the south of France, is 1249 feet long and at the highest point the rail level is 401 feet above the river. It was designed by M. Hefel, builder of the famous tower, and was completed in 1884. The Kinzua bridge is 2060 feet long. The valley of the Kinzua, which this great trestle spans, is one of the wildest regions yet left in western Pennsylvania. Bears are plentiful and deer are occasionally found in this valley.

**GLOBE SIGHTS.**  
As a rule a man who can wait patiently, has nothing to do.  
Everyone thinks he works for a man who is mighty unappreciative.  
After a man does a clever thing, he usually talks about it too much.  
There is a disease among cattle known as big jaw; many people catch it.  
"I never appreciate the politeness of a man who has something he wishes to sell me,"—Drake Watson.  
A girl deserts her father during the period of her love affairs, but she comes back to him after she has married, and brings her husband with her.  
People who are very positive that they have a right to their opinions, deny the same right to others.  
Those who give nothing to charity themselves, usually criticize those who do, and say they should give more.  
We are tired of being bluffed into silence by being asked if we have read the latest book. We are also tired of the air of pity that follows when we admit that we have not only not read it, but hadn't heard of it before. There is surely something more to living than to be up at daylight to read the newest book published during the night. Do people no longer read good books, or is it only new books that are read.—Atchison Globe.  
**SCIENTIFIC STATEMENT.**  
Careful measurements prove that the average curvature of the earth is 6.99 inches to the statute mile.  
The soil of Hawaii is of a dark chocolate or reddish brown, and the darker is best adapted to growing coffee.  
From the 140 pounds of gas tar extracted in coking a ton of coal over 2,000 distinct shades of aniline dye are made.  
If we moved our legs proportionately as fast as an ant, it is calculated we could travel nearly 800 miles an hour.  
A notable event in municipal engineering is the operation of an electric light plant at Shoroditch, London, in which the steam is generated by the combustion of city refuse.  
A twenty-years' record shows about a fourth of the days at Greenwich observatory to be mistless, while only 14 per cent of the days from May to September have ten hours of sunshine.  
A Paris florist after many experiments is able to grow chrysanthemums with the odor of the rose, sunflowers with the perfume of the jasmine, and calla lilies with the scent of a violet.

## For Malaria, Chills and Fever

MAKES CHILDREN AND ADULTS AS FAT AS PIGS

### THE BEST PRESCRIPTION IS

## Grove's Tasteless Chill Tonic.

The formula is plainly printed on every bottle—hence you know just what you are taking when you take Grove's. Imitators do not advertise their formula knowing that you would not buy their medicine if you knew what it contained. Grove's contains Iron and Quinine put up in correct proportions and is in a Tasteless form. The Iron acts as a tonic while the Quinine drives the malaria out of the system. Any reliable druggist will tell you that Grove's is the **Original** and that all other so-called Tasteless Chill Tonics are imitations. An analysis of other chill tonics shows that Grove's is superior to all others in every respect. You are not experimenting when you take Grove's—its superiority and excellence are well established. Grove's is the only Chill Tonic that has entire malarial sections of the body.
