

Congressman Klobberg.

Texas, is quite indignant that some blunder the New York Journal should have classed him with those Congressmen who will vote for the Lodge McCall New England anti-immigration Know-Nothing Republican bill. He has requested us to state that he is utterly opposed to any such bill, as we have enough legislation to keep out bad immigration. During the last Congress he had voted every time against the Lodge bill, and he will do so in this Congress. We beg our colleagues to make that correction.

As the whole German press is against that bill, this question will be made at the next election an issue against every Congressman, Republican and Democrat, who should have voted for that Know-Nothing bill.

Hon. Wm. R. Morrison has left the city, his term of office as Interstate Commerce Commissioner, which he has so creditably filled, having expired. He has gone to his home at Waterloo.

Col. Morrison, who is about two years older than the writer, we met the first time in October, 1856, 47 years ago, at Waterloo. Under the auspices of the National Democratic Committee we were then on the stump in Illinois, and when we came to Waterloo, we reported to Col. Morrison, a member of the State Central Committee, and he took us in charge, selected the places of meeting and accompanied us for three days, to Columbia, Waterloo, Berryville and New Design settlement, at which places we spoke.

Later on we frequently met the Colonel. Gradually we both have grown older, but our friendship has remained the same as when we met the first time.

We regret the Colonel's departure from Washington. He was our warm friend of the adoption of the Constitution, and to help him to get into active life again, we would once more go on the stump. Farewell to him, but with one Auf Wiedersehen!

Stand by Your Friends!

The work of the Democratic minority during the present session of the New York State Legislature, as outlined recently by one of the leaders of that party, includes a vigorous and systematic attack on the Raines Law and an attempt to secure the repeal of that obnoxious measure. The Republican "bosses" have already expressed themselves as satisfied with its operation and determined to resist any attempt at its modification, let alone its repeal, relying on their control of the Executive and the Senate and a narrow majority in the Assembly, to enable them to protect the law, in whose platform it was pledged, and to increase the horrors of new legislation. Shame, shame on you!

And there are hundreds of thousands of dollars of head money, paid by the immigrants, in the Treasury! Ellis Island was built before the fire, and is being built now, with that immigrant money. The salaries of Powderly and all the other officers are paid out of it.

And you cannot, after taking their money, accommodate those poor people flocking to our shores, the land of liberty, with decent lodging and clean covers, to be paid with their money, before you have examined them?

This is no exaggeration, it is the mere truth. That Congressman who will offer a resolution to investigate this outrage and put a stop to it, will indeed be a humane, patriotic man and deserve the thanks and support of every citizen of this country who still believes in the honor of the latter.

And all that is done under a Republican Administration!

The Latest Miracle.

The alleged discovery of Dr. Schenk of Vienna, that the sex of children can be controlled by varying the food of the mother before their birth, is of more importance, if genuine, than the complications in Asia, the partition of Africa, or any other of the spectacular performances of statesmen. And there is no reason why it should not be true. It is only the latest of a number of seemingly miraculous achievements by which man has penetrated further into the secrets of nature within the past few years than in all the centuries before. It is less incredible that we should be able to see our own skeletons, or that a human being should be made to live without a stomach.

That this discovery, if verified, must have tremendous social consequences is obvious, but their nature is not so clear. The tear has been expressed that it would lead to the speedy depopulation of the world, since parents always long for boys, and if they had the power of choice girls would cease to be born. But that opinion does not seem to be well founded. Among some uncivilized and semi-civilized races daughters have been so unwelcome as to run the risk of prompt extinction at birth. Among other peoples in similar stages of advancement girls have

to their Republican attorney, Mr. Butterworth. What shortsightedness and blundering! The 4 cents additional tax on beer would be also a law now, had not our friend, Senator Gorman, induced the Democratic Senators to resolve in caucus to oppose any increase of the tax on "the poor man's beverage." If in the present Congress the Democrats will not do the same, there is but little doubt that the tax will be doubled.

A National Shame!

Barbaric Treatment of Immigrants in New York

Under Government's Supervision

Siberia and Cuba Outdone in Cruelty!

In the interest of humanity, in the name of the reputation of the country and the civilization of the age, we demand of Congress, to have immediately a committee appointed to visit New York and put a stop to the terrible condition in which hundreds of immigrants, men, women and children, are kept by United States officers, at the Barge office, the present abode of the steerage passengers, who are awaiting their relatives, or intending to leave New York, or are waiting for a vessel to carry them back as undesirable to Europe. In a room 80 by 30 feet, as many as 500 are kept like prisoners, and are without the necessary accommodation for cleanliness, being forced to sleep, women and children, on the bare, dirty floor, if they do not want to cover themselves with blankets and comforts full of lice. Emigrant Commissioner Fitchie acknowledges himself that with the insufficient space for so many he cannot keep the place clean, and that he and his officers get full of lice, when they enter the room.

All this is due to mismanagement of both the Washington and New York immigrant officers, who evidently seem to be utterly incapable of performing their duties. It was not so under the last Administration.

Now let the Lodge-McCall bill pass. Let every emigrant above 16 years be made to read and write five lines from the Constitution, which will in each case take at least five minutes, and thousands of immigrants, as a result, will at times be forced to remain at the Barge office, in those lousy quarters, before they can be examined!

Talk of humanity, of "Old Glory!" Shame that you suffer such barbarities, and are now trying to increase the horrors of new legislation. Shame, shame on you!

And there are hundreds of thousands of dollars of head money, paid by the immigrants, in the Treasury! Ellis Island was built before the fire, and is being built now, with that immigrant money. The salaries of Powderly and all the other officers are paid out of it.

And you cannot, after taking their money, accommodate those poor people flocking to our shores, the land of liberty, with decent lodging and clean covers, to be paid with their money, before you have examined them?

The Latest Miracle.

The alleged discovery of Dr. Schenk of Vienna, that the sex of children can be controlled by varying the food of the mother before their birth, is of more importance, if genuine, than the complications in Asia, the partition of Africa, or any other of the spectacular performances of statesmen. And there is no reason why it should not be true. It is only the latest of a number of seemingly miraculous achievements by which man has penetrated further into the secrets of nature within the past few years than in all the centuries before. It is less incredible that we should be able to see our own skeletons, or that a human being should be made to live without a stomach.

That this discovery, if verified, must have tremendous social consequences is obvious, but their nature is not so clear. The tear has been expressed that it would lead to the speedy depopulation of the world, since parents always long for boys, and if they had the power of choice girls would cease to be born. But that opinion does not seem to be well founded. Among some uncivilized and semi-civilized races daughters have been so unwelcome as to run the risk of prompt extinction at birth. Among other peoples in similar stages of advancement girls have

been welcomed as sources of wealth, being ultimately disposed of at high figures either for wives, as in South Africa, or for slaves, as in Georgia and Circassia. But parents in enlightened nations have no extreme preference for one sex over the other. As a rule they may wish the eldest child to be a son, but after that, as a rule, they do not desire to have all sons and no daughters. They look to the harmonious completeness of the family life, which cannot be attained without a fair representation of each sex.

A slight artificial increase in the proportion of male births might be useful to correct the present natural inequalities. In most old countries, including the older States of our Union, there is a marked excess of females over males. Nature tries to correct this discrepancy by producing more boys than girls, but she does not go far enough. Although in England there are 1,037 males to 1,000 female births, there are 1,041 living females to 1,000 males. The boys get killed off by dangerous occupations, or kill themselves off by irregular habits. If nature were helped a little further, the lonely army of surplus English women would disappear. Some such result is a much more likely consequence of Dr. Schenk's discovery than the depopulation of the earth.

Theatrical.

The attraction at the Academy of Music next week will be the romantic American play entitled "Northern Lights." Since its original production last season this play has met with approval wherever it has been seen. "Northern Lights" tells a tale of Montana's plains during the period of Gen. Custer's immortal charge down to awful death in the stronghold of 6,000 war-painted savages. Its authors, Messrs. James W. Harkins, Jr. and Edwin Barbour, in their joint essay, have pitched their scenes on the Sioux reservation at the period when the United States troops, under Gen. Crook, Terry and Gibbon, made a concerted attack on the encampment of Sitting Bull. The title is based on the old Indian tradition accepting the appearance of the aurora borealis as a signal for a general uprising. The story of the play is interesting, and the climaxes are well worked up. A military air pervades each scene, and the scenic embellishments are as fine as those of any similar play on the stage.

The play is in four acts and a half dozen scenes, among which are Fort Terry, Mont., the parade ground on the Sioux reservation, Gen. Crook's headquarters, and Hell's Canyon, above the Tongue River.

A large number of supernumeraries are employed to give effectiveness to the military scenes. The comedy element is furnished by two Wall Street speculators, who are prospecting for gold mines, and a pair of youthful lovers, who had themselves in all sorts of predicaments before they escape from the besieged camp.

The company includes Robert Broderick, Robert Neil, F. D. Denison, Ernest Lamson, Mark Heisey, Will S. Gill, Frank M. Allen, J. H. Ferris, J. W. Horne, Fred E. Jones, H. E. Martin, Barrett Lawrence, M. E. Mann, A. K. Adams, W. E. Evans, Albert Elmer, Arthur Howard, Frank Sedgely, David Levy, Lillian Brainerd, Ethelyn Palmer, Nellie Callahan and Maureen Allen.

Whitehall Terminal.

Whitehall Terminal, the new entrance into New York City, opened for business by the Baltimore and Ohio R. R. on Monday, July 19th, is the most convenient station to and from all parts of New York City and Brooklyn. This terminal is at South Ferry, east of Battery, and from it, under the same roof, direct connections are made with trains of the Second, Third, Sixth and Ninth Avenue Elevated Roads; Broadway, Columbus and Lexington Avenue Cable Lines; East and West Side Belt Lines of horse cars; South Ferry, Staten Island Ferry, Hamilton Avenue and Thirty-ninth Street (Brooklyn) Ferry.

The present company includes among its various members Ezra Kendall, a comedian who made his appearance in minstrelsy for the first time this season. Carroll Johnson, a famous black face artist, and corpulent Billy Rice, known by all patrons of this class of entertainments. Among the others of the company are Trovello, a ventriloquist, who is to present a novelty in the shape of some cleverly constructed automata which are not only made to appear to possess the power of speech but of locomotion as well. Schrecks Brothers, acrobats and pantomimists who were formerly with the Hanlon's; Falke and Semon, musical comedians; and George W. Lewis, a noted dancer who is to introduce the latest thing in the art of terpsichore called "Melo-phrase dancing." Among the vocalists are Charles Kent, Louis Pritzlow, and Alec Carteron, from all of whom sweet strains of music may be expected. "The Zouave Patrol," Wm. H. West's newest grand march, is to be a feature to be presided over by Mr. West himself, while "The Animated Music Sheet" is expected to create a sensation. In the "First part," the distinctive feature of a minstrel performance, only the eight men are to appear with blackened faces.

Three Catholic religious orders for women have for their founders women who were classmates in the girls' school at Aix la Chapelle. The order of the Poor Child Jesus, founded by Clara Fey, and the Society of Poor Franciscans, established by Francisca Schervier, are Aix la Chapelle institutions, while the Sisters of Christian Charity, founded by Pauline von Mallinckrodt, has already 78 houses and 1,215 Sisters in the United States alone.

Whitehall Terminal.

Events tend to confirm the widespread impression that King George will abdicate before the end of the year and with his sons leave Greece. Royalty gives them no additional rank, prestige of fortune, and serves only to depreciate them in the eyes of all Europe, and to antagonize them with those who should be most near and dear to them.

THEATRICAL.

Coming to the Grand, Week of Jan. 10.

When through the columns of the New York World, R. F. Outcalt first introduced the "Yellow Kid" with all its comical situations, pictured in many colors, it was with the hope that it would at least please a few of the readers of that celebrated paper, and his surprise can be better imagined than described when on Monday morning after the first issue, he was notified of arriving at the World office that the demand had been so great for the first "Yellow Kid" edition that all the presses and full complement of men had been pressed into service to fill the extra orders. As the weeks rolled by and the demand became greater and greater, Mr. Outcalt discovered he had hit New York right under the fifth rib. It was not long before it became a fad, and a fad in New York means much, all New York went crazy; soon there were "Yellow Kid" hats, "Yellow Kid" gowns, "Yellow Kid" this and "Yellow Kid" that. Mr. Outcalt was dined and wined, and had he not been a very cool headed and modest man, he would have lost his head altogether.

One evening he was invited and accepted an invitation to attend a "Club Racket" with some friends, among whom were two very popular comedians—those high-salaried artists, Messrs. Gilmore and Leonard. After the usual complement of dances, songs and story telling, Gilmore and Leonard were invited to do their turn; they sprang a surprise by giving a very funny monologue on the "Yellow Kid" subject; time and time again they were forced to repeat, and it was there and then that Mr. Outcalt conceived the idea of building a play, or rather a comedy, from the "Yellow Kid" stories, and he said to the audience, inasmuch as my very estimable friends Gilmore and Leonard have first introduced the subject in stage shape, they shall have the play, and he kept his word. In less than six weeks the names of Gilmore and Leonard were the stars of "Hogan's Alley," and it made a hit beyond any question. Wealth came quick and sure, and the result has warranted (or as Mr. Leonard puts it) forced them to organize two companies in order to satisfy the great demand for it. The wonder is, time has not robbed it of any of its popularity, for it is still one of the most laughable comedies produced in recent years. Both Gilmore and Leonard are rich through its medium, and like sensible men are feathering their nests in a substantial manner. During the past summer they each built two beautiful cottages at Atlantic City, and are now contented with building a joint winter home for themselves and their families when the public shall have had enough of "Hogan's Alley." By the present outlook that time is far in the distance, however.
