

Prince of Monaco Coming to Juneau

The Prince of Monaco will be in Juneau during the coming summer, according to E. D. Beattie, who is engaged in the business of bringing big game hunters to Alaska, and of making arrangements for their sport up on arrival here. The Prince of Monaco is recognized as one of the true sportsmen of the world and is lavish in the expenditure of money along his lines. He maintains a 250-foot yacht on the Atlantic, requiring a crew of 50 men to care for it. In his letter to Mr. Beattie the Prince says that he has fully considered all points in the great Northland and has determined that Juneau is the best place to make his headquarters. His letter was for the purpose of having Mr. Beattie make arrangements for his hunting in this country. Accompanying the Prince on this expedition will be three other noted sportsmen of continental Europe.

Among other European sportsmen who will visit Juneau during the coming summer will be Mr. and Mrs. James Morris, who were here last year, and a prominent Paris banker. Mr. and Mrs. Morris were delighted with their visit last year and declared on leaving that they would return again some day; that they are coming south demonstrates that the call of the North is irresistible to those who have heard it.

Several hunting parties, consisting of Eastern men of note have also communicated with Mr. Beattie for the purpose of making arrangements for spending a few weeks in Alaska during the coming summer.

FIRE DESTROYS BUNK HOUSE AND HOIST

Fire destroyed the old Hammond house at the lower end of Sheep creek basin and the hoist house for the Sheep Creek tramway this morning and for a time threatened not only the experimental mill nearby but also the Sheep creek settlement on account of the raging forest fire that resulted from the burning house. At 7:30 the fire had gained considerable headway in the forest and things looked serious. Practically all the men in camp, between 300 and 400 were called out to stamp it out. At 1 p. m., the situation was reported to be safe and what fire that remains is under control and will be effectively stamped out before the fighting force quits.

The Hammond House was a large two-story structure built several years ago for a residence for the manager of the old Sheep creek mines, and it was being used as a bunk house by the Alaska Gastineau Mining company.

The flames from the burning building caught in the dry grass and under brush and the heavy wind that is prevailing carried the fire toward the beach camp. Before its progress could be stopped it caught the hoist building and reducing it to ashes swept on toward the settlement. The hill soon swarmed with men and its further progress in that direction was stopped. According to latest reports it was all out except a little stretch of timber on the opposite side of Sheep creek.

Strong passed from the limits of Alaska yesterday Surrogate-General and Territorial Secretary Charles E. Davidson became Acting Governor of Alaska. This is the first time this responsibility has been placed upon Gen. Davidson since he took office last fall.

Acting Gov. Davidson's first act as the head of the Territory was the signing of a check today as "Governor."

NEW NOTION STORE OPENED IN JUNEAU

Juneau secured a new and promising mercantile establishment when Mrs. A. Christopher opened the new store next to I. Goldstein's lower Front street place. She is confident that she can satisfy anybody's notion about almost anything.

DRAPER CLUB MOVES FOR PUBLIC LIBRARY

At an enthusiastic meeting of the Draper Club held yesterday afternoon it was decided to establish and maintain a free public library for the community. In seeking support for the movement, the Draper Club issued this statement:

"William J. Bryan says: 'The system of free public libraries now being established in the country is the most important development of modern times. The library is a center from which radiates an ever widening influence for the enlightenment, the uplift and the advancement of the community.'"

"The club will need the support of all the citizens of Juneau in this undertaking, which will supply a long-felt want. That the Capital of Alaska should continue longer to be without a public library and reading room would be deplorable. As a commercial center and distributing point for Southeastern Alaska, Juneau cannot afford to be without a library, which Sir Walter Besant calls 'The greatest educational factor we have. Not only the town itself, but the students in the high school and grammar grades will reap the benefit of this movement.'"

JACKLING LEAVES JUNEAU CONTENTED

"I am more than satisfied," said Col. Jackling last night, after having passed through the Sheep Creek tunnel and inspecting the Perseverance mine. "I am contented. I did not hope to have the pleasure of going through the mountain at this time. We had at first counted on the last of April, then April 15, and recently April 5. That it was finished on the morning of April 1, is a demonstration that those in charge here have the ability to do things. So far as I know the work of Mr. O'Neil is an achievement without parallel—a landmark in this sort of development and he is deserving of great credit."

"I have no hesitancy in saying that this tunnel will be capable of handling 20,000 tons of ore each day by adopting systematic methods and economic facilities. It will therefore be an easy matter to handle the 5,000 tons required for the mill now being erected."

"It is particularly gratifying to know that on the tunnel level the ore body where it has been but proves to be larger and better than on the mine levels above."

Col. Jackling says Juneau shows a wonderful improvement over past conditions each time he comes here and he looks for the place to become a great little city. He expects to come next June again and hopes that the trip will be made in his yacht Cypress.
