THE WHARF PROPOSITION.

THE JUNEAU wharf proposition should be a matter of accounting and the application of the sound business axiom that every business concern should pay a reasonable interest on the investment in it.

IN THE WRONG PARTY.

AMOS PINCHOT cannot read Geo. W. Perkins out of the Progressive party without reading Theodore Roosevelt out too.

No one favors the sale or lease of the property so far as we know. At least no one has suggested the proposition in the city council.

If Amos Pinchot stands for the destruction of monopoly, instead of its regulation as stand Perkins and Roosevelt, the only matter with him is that he is in the wrong political party.

That brings us to where we began. The question is one of bookkeeping and business, and The Empire has absolute confidence that the city council will handle the matter in a manner that will be fair to all concerned.

Here is how they reason that Pinchot must not drive Perkins out of the Progressive party: If Perkins is intolerable, so is Boss Finn; if both go, there will be none to provide campaign funds; many investigations have demonstrated that The Colonel likes campaign funds; Perkins must be retained.

The late Gov. William Ogilvie, former Commissioner of Yukon Territory, geologist and all round scientist, who was as closely associated with the opening of the Canadian North as any other man, has left a rare legacy to those who survive him in his book, "Early Days in the Yukon."

The debt that the United States owes Colombia for taking Panama away from that country is just as great an obligation now that it is proposed to pay it as it was when it was simply an academic theory.

For Sale—One empire's indicator; inquire at Barragar's Postoffice store.

The defeat of the Constitutionalists at Zacaetac possibly had something to do with the hasty reconciliation of Villa and Carranza. The presence of Villa seems to be a necessary element in securing Constitutional victories.

By the time Mr. Edison gets his energy direct from the unburned coal, somebody will show us how to apply certain June temperatures to February snow-drifts.

It takes only a few hours—and a suffragette—to burn down an English church 400 years old.
