FARMING DEVELOPS IN KNIK COUNTRY

CORDOVA, Aug. 3. — Among the passengers going through on the Evans for Kalk was Axel Olson and family. Axel is an old Alaskan sourdough and sailed from Seattle with a complete modern outfit of machinery, tools and other equipment, to establish a farm 15 miles from Knik Anchorage. The shipment contains everything needed for general and dairy farming, including plows, cultivators, harrows, mowers, milk separators, coolers and the hundred and one other appliances needed on a farm. In addition Olson is taking a shipment of stock up on the Evans. Ten Jersey and Holstein cows, six hogs, 50 chickens, three geese and three horses form the major part of the shipment.

Another passenger on the Evans was Fred Laubner, a mining man, formerly of Seward. Mr. Laubner recently sold his addition to Seward townsite for \$30,000 to Robert Ashland, and will go into the stock-raising business near Knik. He is shipping 15 head of fine cattle to Knik on the Admiral Evans as a nucleus of his herds.

KETCHIKAN ASSAYER LOCATES PLATINUM

KETCHIKAN, Aug. 1.—Recently in assaying a copper ore from Karta Bay, Edwin Brown, assayer, detected the presence of platinum—further investigation showed it to be present in quantities varying from a trace to .32 oz. per ton (present quotation \$44.00 per ounce.) His attention was called to platinumiferous copper ore from the Clarence straits side of Kasaan peninsula an assay showing \$1.80 per ton platinum. These points are several miles from one another. Both are in altered peridotite. That platinum is wide-spread is apparently evident. The Bureau of Mines has asked to be kept informed and if further results warrant they will make a special investigation.

FINE ORE SPECIMEN FROM GOLDEN EAGLE

CORDOVA, Aug. 4.—Harry Rolfe returned Monday evening from Port Wells, to which place he had towed a barge loaded with lumber and supplies for the Golden Eagle Mining Company. He brought with him a large sample of ore from the property of the company, which has been placed on exhibition in the window of the Chamber of Commerce rooms.

The specimen is a fair average of the ore body on the claim, and while not of the spectacular variety, it shows some free gold. The vein from which the ore was taken is fifty feet in width, and an average of sixteen assays of the ore from various places along the width and length of the vein gives \$16.40 to the ton. Within this vein, however, are three stringers ranging from one to three feet in width, which run extremely high in value.

A five-stamp mill, Pelton wheel, pipe, etc., has been purchased by the company, and left Seattle on the steamer yesterday. The company expects to have the same installed and the mill in operation within a very short time, all the preliminary work, such as the foundations for the mill, cutting out for the pipe line, and the erection of a dam, having been completed. The stream supplying the water for power carries an ample supply for the purpose all the year round.

PETERSBURG FISHERMAN LOSES SEINE BOAT

PETERSBURG, Aug. 1.—Capt. Hadland, of the Redfish, returned from Point Ellis Friday morning and reported having had a stormy trip.

The Captain brought the news that Pete Seth had lost his seine boat last Tuesday evening while Mr. Seth and his two partners were crossing the sound between Spruce and Turnabout Islands, with their boat loaded with fish. An immense wave struck the boat and filled it, and in no time it sank in 160 fathoms of water. The men had barely time to jump aboard a small skiff they had in tow before their load went down.

The Schoold, which was the name of the boat, was used partly for living quarters for the men and partly for carrying the fish. Consequently, they lost, clothes, provisions and all.

Since the law went into effect requiring owners of motor vehicles to secure licenses for their machines, certificates have been taken out for twenty-four automobiles and four motorcycles in Dawson. Several more automobiles are coming, and the town probably will have 30 to 35 before snow flies.

ALASKA'S OPPORTUNITY IS NOW AT HAND

Alaska's opportunity is at hand. The government is preparing to install an exhibit of Alaskan products at the Panama-Pacific International exposition, and a special invitation has been extended to all farmers of the Territory to furnish samples of the crops that can be grown under the tropical rays of the midnight sun. Tannan farmers especially are requested to contribute to the collection of Northern-grown cereals and other products, and we feel safe in predicting that the exhibit shipped from our fertile valley will constitute one of the big attractions of the exposition.

This is the opportunity we have been anxiously awaiting. It gives us our chance to show the world what we can do, agriculturally, in this Northern country, and we have no doubt the display will prove sufficiently impressive to attract many home-seekers to Interior Alaska. It is the best kind of advertising that we can get, and the more complete the exhibit, the greater the results will be.

The Alaska exhibit will be seen by hundreds of thousands of persons who have heard much but who know little of our country and less of the particular valley which is our home. Their interest in Alaska has been aroused by the passage of the railroad bill and by the promise of development in all parts of the Territory. They will look for the Alaska exhibit if they know that there is one at the exposition, but we venture to say that few of the strangers will be prepared for the sight which will greet their eyes. They will learn from one glimpse at the Alaska exhibit than we could hope to teach them with many volumes of printed matter descriptive of our resources.

The farmers of Interior Alaska appreciate the importance of such an exhibit, and we can rely upon them to respond enthusiastically to the call for samples which has been issued by the government through Superintendent Neal of the experiment farm. But someone must assist in the work of assembling the exhibit and preparing it for shipment to San Francisco. This comes properly within the scope of the Commercial club, and affords that body a splendid opportunity to contribute to the success of the undertaking. A friendly administration has given us the chance to show what we can do, and it is up to us to make good. It is to be hoped that there will be no lack of co-operation.—Fairbanks Times.

WHAT BIG CROPS MEANS TO COUNTRY

It is difficult to grasp the full meaning of the figures published by the Federal Department of Agriculture on the crop profits of the present year. Of the thirty-eight million persons engaged in gainful occupations in the entire country, as reported in the last census, twelve millions, or nearly one-third, are at work on the farms. Fancy the increased ability to buy commodities that unprecedented harvests will bring to these millions! And when they begin to buy all the wheels of industry and trade are set in motion. The entire economic structure from the bottom up is lifted. And as to money values—it is likely that this year's crops will be worth at least \$10,000,000,000. Alongside such a sum the \$82,000,000 gold exported to Europe since the beginning of the year looks like "loose change."—New York Herald.

FOR SALE.

I am forced to sell my fine small pony (part Shetland and part Arabian) and two seated carriage. Will sell to right party cheap. Enquire Jaxon's rink. 8-3-14.

PACKING SOUTHEASTERN SALMON IN GLASS JARS

The Swift-Arthur-Crosby Company, which operates a salmon cannery on Heceta Island, in Southeast Alaska, will try the experiment this season of packing Red salmon in glass jars, two thousand of which have been brought North to the cannery. The jars, which will each hold one pound of salmon, are fitted with automatic sealing tops. The company hopes that the Red salmon will present such an exceedingly attractive appearance in these jars that a better price will be obtained than for those packed in tin cans.

NOTICE TO EAGLES.

Douglas Aerie, No. 117, will meet in the new Eagles Hall Friday the 7th. Initiation. Good attendance requested.—Geo. Spence, Sec'y. 8-3-14.

The Bergmann Dining room offers home cooked table board at \$1 per day. Special rates to permanent guests. Sunday night special dinners at 50 cents per plate. Breakfast served from 6 to 9; luncheon, 12 to 1:30; dinners, 5 to 7. 7-27-14

THE OVERWHELMING SUCCESS of Benjamin Clothes

In the clothes industry we represent the independent spirit of all that is up-to-the-minute. We waste no time or effort watching competition. Our prices, methods, merchandise and service follows no precedent or rut. They are in a class by themselves. Now is the time to get in touch with the line of clothes that leads them all.

New Suits Arriving on Every Boat—Prices to Fit Every Pocket-book

HANAN SHOES

The New English Last. This new English last was first produced by Hanan for their London and Paris stores. It was such a decided success there that they introduced it in America and today it is one of the big selling new styles in all the large cities.

DO YOU KNOW THAT EVERY INDESTRUCTO TRUNK IS GUARANTEED FOR FIVE YEARS? Does this mean that if an Indestructo trunk is damaged by careless handling within five years after your purchase, we will repair or replace it without charge? IT DOES!

Does it mean that even if your Indestructo is destroyed in a wreck we will replace it? ASSUREDLY IT DOES! Why don't you make up your mind that the next trunk you buy will be an Indestructo. Many arrangements and prices; no other trunk besides the Indestructo gives you a five years' service guarantee. Prices reasonable.

WHO BRANDED THIS 200 POUND HALIBUT?

Down at the New England plant in Ketchikan is a big halibut that weighs over two hundred pounds dressed, with marks on its back that look like the figures and letters "1907 A. K."

The fish was caught off Cape George by the schooner Senator and taken to Ketchikan, and the fact of the markings on its back reported to the Customs House. As far as anyone has been able to discover there has been no attempt on the part of either the American or Canadian governments to mark any halibut. This kind of fish grow slowly, which makes it hard to believe that the fish could have been caught as recently as 1907, and then turned loose after being marked, as the general impression among the fishermen is that the halibut grows but a few pounds a year, which would make this particular specimen weigh at least 150 pounds in 1907, which was seven years ago. In case anyone reading this knows anything about this particular fish, the New England Fish company would appreciate it if word concerning same would be sent them as many people are naturally interested in knowing about it.

Advertisement of Attachment. WHEREAS, A libel has been filed in the District Court of the Territory of Alaska, Division Number One, at Juneau, Alaska, against Bert Lang, owner, and the gasoline launch White Star, alleging that between the 16th day of October, 1912, and the 21st day of March, 1913, at the special request of said owner, libellants furnished said launch merchandise, stores and supplies, on the credit of said owner and said launch, to the value of \$153.85, and which has not been paid, and praying that the said launch, her engines, boilers, machinery, tackle, apparel and furniture, may be condemned and sold to pay the demands of the said court to me directed, I do hereby, in pursuance of the mention of the said court to be directed, I do hereby give public notice to all persons claiming, or otherwise having, any interest in the said vessel, her engines, boilers, machinery, tackle apparel and furniture, that they be and appear before the said court on the 3d day of September next, at 10 o'clock in the forenoon, then and there to interpose their claims and make their allegations in that behalf.

SHOE BUSINESS SHOWS INCREASE

ROCHESTER, N. Y., Aug. 5.—At the summer meeting of 100 traveling salesmen of Endicott, Johnson & Co., in Endicott, it was reported that the increase in shipments of shoes during the last six months amounted to \$2,000,000 over the corresponding period of last year. The men reported the outlook bright for the largest fall business in the history of the firm.

ROCHESTER, N. Y., Aug. 5.—At the summer meeting of 100 traveling salesmen of Endicott, Johnson & Co., in Endicott, it was reported that the increase in shipments of shoes during the last six months amounted to \$2,000,000 over the corresponding period of last year. The men reported the outlook bright for the largest fall business in the history of the firm.

DAWSON SPUDS ARE WORTH MANY THOUSANDS
DAWSON, Aug. 5.—It is estimated the potato crop within a few miles of Dawson this year will aggregate 200 to 225 tons. Allowing the average local price of five cents a pound obtained by the Dawson growers, this will mean \$20,000 to \$25,000 kept in the country. Other crops grown near here also will keep thousands of dollars in the country.
The tomato crop this year is splendid. Tons of them are being produced near here. Carrots, turnips, celery, beets, parsnips, lettuce, radishes and the like will add greatly to the aggregate. Rhubarb also is grown here with great success. Malcolm McLaren, the Sunnydale veteran, brought to the News office today a splendid specimen of rhubarb of the tall, tender variety which is virtually skinless, and cooks without having to be stripped. He has thirty acres in various crops this year, and others have similar big farms all yielding splendidly.

ROCHESTER, N. Y., Aug. 5.—At the summer meeting of 100 traveling salesmen of Endicott, Johnson & Co., in Endicott, it was reported that the increase in shipments of shoes during the last six months amounted to \$2,000,000 over the corresponding period of last year. The men reported the outlook bright for the largest fall business in the history of the firm.

"Give me five years of life in this region," said Alfred Burbank, brother of the great specialist in plant life, at the Regina hotel in Dawson, "and I will evolve a potato that will be the ideal potato of this country and Yukon and Alaska then will be able to supply the United States with all the potatoes needed there."

PORTLAND PAPER COMMENTS ON ALASKA DOG RACES

The All-Alaska sweepstakes is perhaps the most remarkable race in the calendar of sport. It is a test of both man and dog. The latter, sensing his responsibility as the snowbound north's most dependable means of transportation for mail and supplies, shows tireless willingness to do his best. The man must husband his dog's strength, must show extraordinary skill in caring for his animals; he must be as intelligently careful of his dog as he is of himself.

It is a race suited only for red-blooded men, for once out upon Alaska's snowy wastes the man is placed upon his own resources. He has no friends nearby to assist in the event of falling, no person to cheer him on should he falter.
The contest last winter visualizes Alaska's great need. Transportation is the problem which is to be solved. The dog team will be supplanted by the railroad. Alaska may lose a spectacular sporting event, but the North will gain opportunity for development. When dog racing becomes history, there will be a new Alaska with hopes in the fulfillment.—Portland, Ore. Journal.

ROCHESTER, N. Y., Aug. 5.—At the summer meeting of 100 traveling salesmen of Endicott, Johnson & Co., in Endicott, it was reported that the increase in shipments of shoes during the last six months amounted to \$2,000,000 over the corresponding period of last year. The men reported the outlook bright for the largest fall business in the history of the firm.

We Sell Electric Washing Machines

Sold on Instalments The machine will pay for itself. Your only outlay is the first payment—the saving in laundry bills will more than make the future payments. Wash-day has no terrors for the woman who owns an electric washing machine. The cost is so low that any family can afford to own one. Cost of operation will not exceed five cents per hour. Come and look at it. Demonstrations any time.

laundry bills will more than make the future payments. Wash-day has no terrors for the woman who owns an electric washing machine. The cost is so low that any family can afford to own one. Cost of operation will not exceed five cents per hour. Come and look at it. Demonstrations any time.

EXCLUSIVE FEATURES

- A Reversible Wringer that can be operated by either Hand Lever or Foot Treadle.
- A patented one piece Metal Wringer Box. This box is in every way superior to the best wood wringer box that can be constructed.
- Shaft Driven Wringer — Noiseless, Safe and Certain.
- No mechanism on top of tub. All working parts being under tub, entirely protected and out of the way.
- Washer is designed for power exclusively and is more substantially built than competitive Machines.
- Metal drain cock on bottom of tub drains tub completely without tilting.
- 1-6 H. P. Electric Motor having ample power to handle the wash at all times.
- Complete Washer is mounted on castors and can be easily moved.
- By reason of the fact that the wringer on the Voss Electric Washer is controlled by either foot treadle or hand lever, it is the safest power wringer in the world. The action is positive and instantaneous. Must be seen to be appreciated.
