

# KIRKLAND

## Is In Seattle's Pathway

### EVERY DOLLAR HAS A HUNDRED CENTS

And like mankind was made to work.

#### ARE YOUR DOLLARS WORKING FOR YOU?

Did it ever occur to you that the earning capacity of a few dollars wisely invested is greater than that of the average man?

Four or five hundred dollars invested in Seattle Second Avenue property thirty years ago have since earned more than one man working steadily at \$100 per month could earn in 200 years.

It wasn't so many years ago that a Second Avenue clothier of Seattle advertised a sale of men's suits and to each purchaser he gave a warranty deed to a lot on the Western shore of Lake Washington; at that time nothing but a wilderness. The suits were soon worn out and cast aside but those lots today are worth from three to five thousand dollars each; for the city of Seattle with a population of over 300,000 has grown out to the Western shore and is NOW crossing the lake to the EAST SIDE AT KIRKLAND.

Seattle's population has increased 30 per cent. in the last four years while that of KIRKLAND has increased over 300 per cent. in the same period of time.

Seattle cannot spread to the WEST because of Puget Sound. It is shut off on the SOUTH by the Duwamish flats which are flooded in the high tide season. The rough and broken territory to the NORTH does not invite its growth in that direction. It must of necessity spread to the EASTWARD and today KIRKLAND finds itself right in the PATHWAY OF SEATTLE'S FUTURE GREATNESS.

The opening of the Lake Washington canal will give to SEATTLE and KIRKLAND one of the largest and finest fresh water harbors in the world.

Now is the time to put a few dollars at work for yourself in Kirkland.

Residence lots in the Capital Hill addition beautifully parked with splendid view of the lake, the city of Seattle and the Olympic mountains at \$125 to \$175 each. Business lots two blocks from the City Hall at \$400 to \$500 each. Terms one tenth cash and balance \$5 or \$10 per month.

## RICH PAY IS FOUND IN THE TOLOVANA

(Fairbanks News-Miner, Mar. 23.)

Olive creek grounds shows \$2.50 to the foot with only 24 feet to bedrock—Pans run from 10 cents to a dollar each—Pay-streak 200 feet in width opened in three places and shows uniformity of pay—Ground owned by Livengood and Ted Hudson—Conrad reports pay now lined up on Livengood creek for distance of two miles—70 feet in width so far as crosscut—The Tolovana looks good and getting better.

Authentic news was brought out from the Tolovana to the effect that rich pay has been opened on discovery claim, Olive creek. It was brought to Fairbanks by August Conrad and J. C. Kinney, two of the oldest and most conservative operators in the new camp, and is confirmed by Paul Ringseth, of Chatsanika, and others. It is the best mining news that has been received in Fairbanks for many a day and places in Tolovana in line as a producing district.

The lucky laymen are Herman Stone, Pat Lynch and Tom Verdi, who lease the ground from Livengood and Teddy Hudson. This lay covers the lower 1,000 feet, while Dave Cascadden has taken a lay on the upper 1,640 feet and expected to reach bedrock with his first shaft. The ground is only 24 feet deep on an average, with about 10 feet of muck. The new pay will average \$2.50 per square foot.

Stone, Lynch and Verdi have sunk three holes cross cutting for a distance of 200 feet, all of which shows the same average pay. Last Friday Dave Cascadden secured pans ranging from 10 cents to a dollar each from the pay gravel in these shafts. Pay runs all through the gravel but is richest in the last five feet above bedrock. A small amount of the gold has been brought to the city, but not

enough to be more than a sample of what is coming later.

On 1 below discovery Olive creek, Wheeler & Wagner have done some prospecting, they owning the ground. They got prospects but have not pushed their work far enough to get a fair showing as yet.

Olive creek is only two miles or so in length and empties into the Tolovana river just above the mouth of Livengood creek. It comes down on the right limit. Further up the Tolovana on the right limit Wilbur creek empties into the river and there some excellent prospects have been opened. Mr. Conrad said this afternoon that he had heard in coming out that good pay had just been found but he could give no details.

Conrad, in speaking of operations on Livengood creek, which is separated from Olive by a divide, said:

"We have now lined up pay on Livengood creek for a distance of nearly two miles, beginning from four above discovery. The paystreak runs along the right limit from the upper end of 5 bench claim, and Kinney and myself have crosscut it in a number of places. So far as crosscut it is 70 feet in width. How much wider it will go we do not yet know. Below us Hedstrom picked up the pay on discovery bench claim and has found it in two or three different shafts. Between his ground and 4 above there is a blank in which pay has not yet been located. Discovery on Livengood showed dollar gravel but beginning there the ground becomes very deep. The ground has not yet been thoroughly prospected on discovery.

"Conservatively speaking, we have found \$1 a foot on Livengood, though some of the ground runs much better. It is from 25 to 28 feet in depth and easily worked. When I was in the city before I was so thoroughly convinced that we had pay that I wired my partner, Jack Mihalick, who has just reached here from Seattle. However, we thought it the best policy to keep quiet until we were absolutely certain and have done so.

"Ruth, Alder, Corraide and Amy creeks all tributaries of Livengood, prospect well, and all may turn out to be producers. Our theory is that the gold comes off the Amy dome, which is the highest dome in that section and is at the head of Livengood creek, Tolovana river and Mike Hess creek. With pay found on Livengood and the Tolovana river, it would appear as though a considerable and rich district had been opened up and when it is thoroughly prospected, we may find we have uncovered something as rich as anything in Alaska.

"Remember that no prospecting was done to amount to anything before January as everybody was doing their preliminary location work to hold the ground. For the slow opening of the Tolovana district you can thank the present Roden law which surely should be repealed. Had it not been for the conditions imposed by that law, Tolovana would have been well prospected long before this and this winter we would have sent in mining outfits to work with next summer.

"As it is pay has been located so late in the season, that we cannot possibly get in heavy machinery over the snow and river transportation is still an unknown quantity. The result will be that most of us will continue prospecting this summer and lining up pay. With ground less than thirty feet deep, drift mining will not be necessary. It is an open cut country, with not much available water at that. Olive creek hasn't a quarter of a sluiceway and water will have to come from up the Tolovana river. The trail is breaking up now so that any heavy freighting is impossible.

Conrad and Kinney came in by dog team from Olness this morning. They are busy today answering questions and taking care of their own business matters and expect to return just as

quickly as they can get away. The latest discoveries in the Tolovana are the subject of live conversation all throughout the city today, and it is now believed that the future of the new camp is assured.

#### WAR SIDELIGHTS

The Paris Martin says the Germans had plans not only for the occupation of Paris after what they presumed would be its easy conquest, but also for using the capital as a means of blackmail for imposing a shameful peace on France. Paris was divided into seven sections, each of which was to receive 100,000 Germans. Then, unless the French government agreed to a peace with a cession of provinces to Germany and a large indemnity and troops to help an invasion of England, Paris was to be systematically sacked, section by section, until the government of France gave in.

The French ministry denies Bernhardi's statements that France and England planned to violate the neutrality of Belgium, asserting that the French army was concentrated along the German frontier while the English army did not consider taking the field until Germany violated their neutrality on August 5th, and did not concentrate until August 14 to 25.

On April 1, the hands of every clock in Germany were to be set forward one hour. By rising an hour earlier and retiring an hour earlier it is estimated that \$5,000,000 worth of petroleum will be saved during the six month of the summer.

The commander of the German cruiser Dresden blew her up after the complete disablement from the attack of three British warships, according to an official report. The British reports stated the Dresden hoisted a white flag and capitulated.

Prominent Belgians are discussing the proposals not to rebuild the ruined cities of Malines, Termonde, Louvain, and Liege after the war, but to erect new towns near by. It is thought that tourists would be attracted in great numbers to the ruins and will provide much of the capital necessary for building the new places.

In interviews published in Colliers' Weekly, Grand Admiral von Tirpitz, of the German navy says that "The Day" toast ascribed to German naval men is "An infamous English lie." I never heard such a toast proposed. We did not want war—did not expect it, could not believe it. Our ships were abroad, many of our warships were in foreign ports; much of our vast merchant marine was far away in the harbor of every country—do you think that if we had planned the war, or even foreseen it, we should not have gotten all our ships home before war was declared?"

#### SPRING IMPROVEMENTS ABOUT BEHRENS HOME

The grounds surrounding the B. M. Behrens home on the corner of Fifth and Dixon streets are being improved with a view to increasing its already exceeding beauty.

A large portion of the sod lawn is being sliced and rolled up for the purpose of smoothing the uneven ground, after which it will be replaced again. A strong plank butment is being constructed on the side of the lot facing Dixon street, the tops of the posts being securely held in place by means of anchors sunk in the bank above.

Several men are at work on the improvements which will require a number of days to complete.

#### CONSTRUCTION ENGINEER AWAITING DEVELOPMENTS

J. P. Mantell, construction engineer of the Pacific Coast Construction company of San Francisco and a former Alaskan, is staying at the Cain awaiting developments in regard to the building of the government railroad. He has been in the city off and on most of the winter, being interested in some construction matters in this region.

#### SUMMONS Case No. 1194-A

In the District Court For the Territory of Alaska, Division No. One At Juneau

First National Bank of Juneau, a corporation, Plaintiff.

To A. Christopher, Defendant.

IN THE NAME OF THE UNITED STATES OF AMERICA, by order made and entered in the above Court and cause, March 17th, 1915, you are hereby commanded to be and appear in the above-entitled Court, holden at Juneau in said Division of said Territory and answer the complaint filed against you in the above entitled action within thirty days from the date of the last publication of this summons, and if you fail so to appear and answer for want thereof the plaintiff will take judgment against you for six hundred (\$600) dollars with interest on five hundred (\$500) dollars from the 18th day of March, 1914 at ten per cent. per annum, and in respect on one hundred (\$100) dollars from March 25, 1914, at the rate of ten per cent. per annum, and its costs and disbursements herein incurred. And plaintiff will apply to the Court for, and the Court will grant, the relief demanded in the complaint herein, a decree of foreclosure on jewelry pledged, authorizing the sale of said pledged property, and the application of the proceeds, or sufficient thereof, in payment of plaintiff's judgment obtained herein.

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Seal of the above Court this 17th day of March, A. D. 1915.

(Seal) J. B. BELL, Clerk
