Aeroplane flying imposes unforeseen and trying conditions on a watch. The aeroplane vibrates constantly. It tilts at all angles. Often it lands with a jolt that would ruin

GEORGE, THE JEWELER

the balance-wheel of many a watch.

The Wright Brothers had most unsatisfactory experiences with all the watches they tried in Europe and America—until they adopted the HOWARD.

The HOWARD Watch is the finest practical timepiece in the world. Its special hard-tempered steel balance cannot jolt out of true with the roughest service. The HOWARD adjustment is permanent.

Every HOWARD is made and adjusted as a fine watch. Cased and timed in its own case by the HOWARD watch-makers.

The price of the HOWARD is fixed—\$40 to \$150—and a printed price-ticket attached.

We carry this distinctive watch and would like to show it to you.
